Fasold, Deborah Schiffrin, 1989-01-01 The study of language variation in social context continues to hold the attention of a large number of linguists This research is promoted by the annual colloquia on New Ways of Analyzing Variation in English N.W.A.V.E This volume is a selection of revised papers from the N.W.A.V.E XI held at Georgetown University It deals with a number of items some of which have often been discussed others that have been less emphasized The first group of articles in the volume center on a frequent theme speech communities as the essential setting for understanding variation in

language Earlier work in linguistic variation dealt for the most part with phonological variation and change Syntactic and morphological change and variation in syntax are also discussed A selection on the role of variation in understanding first language acquisition comprises three papers Articles in the last section of the volume concern theoretical controversy and methodological advances     **Papers in Austronesian Linguistics** ,1991     Lexical and Syntactical Constructions and the Construction of Meaning Marjolyn Verspoor,Ki-dong Yi,Eve Sweetser,1997-01-01 The basic tenet of cognitive linguistics is that every linguistic expression is a construal relation The first section of this volume focuses on issues of such construal and presentation of information including figure ground relations image schematic structures and the role of syntactic constructions in information structure In sections two and three papers are presented on cross categorial polysemy between lexical and grammatical uses of a morpheme and between different grammatical senses and on the relationship between earlier lexical senses and later grammatical ones The final section of the volume brings together studies which shed further light on transitivity and argument structure The study of transitivity necessarily entails exploration of the relationship between syntactic constructions and the pragmatics and semantics conveyed by such constructions As a whole this collection of papers gives new evidence on the complexity and motivation of the mapping between linguistic form and function and offers a wealth of new directions for research on the construction of meaning at every level of the sentence     The Laws of Indo-European N. E. Collinge,1985-01-01 This book collects all the named laws of Indo European presents each in its original form and rationale and then provides an evaluation of all major attacks revisions and exploitations along with a full bibliography and index Complete thorough exhaustive     **Simultaneity in Signed Languages** Myriam Vermeerbergen,Lorraine Leeson,Onno A. Crasborn,2007-02-21 Signed language users can draw on a range of articulators when expressing linguistic messages including the hands torso eye gaze and mouth Sometimes these articulators work in tandem to produce one lexical item while in other instances they operate to convey different types of information simultaneously Over the past fifteen years there has been a growing interest in the issue of simultaneity in signed languages However this book is the first to offer a comprehensive treatment of this topic presenting a collection of papers dealing with different aspects of simultaneity in a range of related and unrelated signed languages in descriptive and cross linguistic treatments which are set in different theoretical frameworks This volume has relevance for those interested in sign linguistics in teaching and learning signed languages and is also highly recommended to anyone interested in the fundamental underpinnings of human language and the effects of signed versus spoken modality     **English Historical Linguistics 2006** Marina Dossena,Richard Dury,Maurizio Gotti,2008-07-09 The papers collected in this volume were first presented at the 14th International Conference on English Historical Linguistics Bergamo 2006 Alongside studies of syntax morphology lexis and semantics published in two sister volumes many innovative contributions focused on geo historical variation in English A carefully peer reviewed selection including two plenary lectures appears here in print for the first time

bearing witness to the increasing scholarly interest in varieties of English other than so called standard English In all the contributions well established methods of historical dialectology combine with new theoretical approaches in an attempt to shed more light on phenomena that have hitherto remained unexplored or have only just begun to be investigated Perceptual dialectology is also taken into consideration and state of the art tools such as electronic corpora and atlases are employed consistently ensuring the methodological homogeneity of the contributions

**Papers from the Regional Meeting, Chicago Linguistic Society** Chicago Linguistic Society. Regional Meeting, 1973 Vols for 1985 issued in two parts pt 1 being the Papers from the regional meeting pt 2 being the papers of the Parasession Previous to 1985 the Parasession papers were issued as separately analyzed monographs

**From Case to Adposition** Vít Bubeník, 2006-01-01 In the historical development of many languages of the IE phylum the loss of inflectional morphology led to the development of a configurational syntax where syntactic position marked syntactic role The first of these configurations was the adposition preposition or postposition which developed out of the uninflected particle preverbs in the older forms of IE by forming fixed phrases with nominal elements a pattern later followed in the development of a configurational NP article nominal and VP auxiliary verbal The authors follow this evolution through almost four thousand years of documentation in all twelve language families of the Indo European phylum noting the resemblances between the structure of the original IE case system and the systemic oppositions to be found in the sets of adpositions that replaced it Quite apart from its theoretical analyses and proposals which in themselves amount to a new look at many traditional problems this study has a value in the collected store of information on cases and on adpositions and their usage There is also a considerable store of etymological information that is relevant to the description of the systemic development
