Survey of American Foreign Relations 1928-1931 Charles Prentice Howland, 1928 **Catalogue of the Public Documents of the ... Congress and of All Departments of the Government of the United States for the Period from ... to ...**, 1910 **Catalogue of the Public Documents of the ... Congress and of All Departments of the Government of the United States for the Period from ... to ...** United States. Superintendent of Documents, 1908 *Catalogue of the Public Documents of the [the Fifty-third] Congress [to the 76th Congress] and of All Departments of the Government of the United States* United States. Superintendent of Documents, 1896 *Catalogue of the Library of the United States Senate* United States. Congress. Senate. Library, 1910 *Catalogue of the Public Documents of the ... Congress and of All Departments of the Government of the United States* United States. Superintendent of Documents, 1908 *Freedom of the Seas and US Foreign Policy* Connor Donahue, 2024-04-05 This book critically analyzes US political military strategy by arguing that freedom of the seas discourse is fundamentally unfit for an era of maritime great power competition The work conducts a genealogical intellectual history of freedom of the seas discourse in US foreign policy to show how the concept has evolved over time to facilitate American control over the global ocean space It concludes that the contemporary discourse works to establish the high seas as an arena free from claims of sovereignty so that the United States as the presumed unrivaled naval power can intervene globally on behalf of its national interests However since sea control strategies depend on a preponderance of material force as the United States wanes in relative material capability it becomes less able to support political military strategies predicated on the assumption of global naval dominance The book provides a timely commentary on the current geopolitical competition between the United States and China and critiques the US approach toward China in the maritime domain in order to highlight potential avenues of foreign policy action that may enable the two countries to mitigate the risk of conflict This book will be of much interest to students of naval history maritime security US foreign policy and international relations *The Political Economy of Latin American Independence* Alexandre Mendes Cunha, Carlos Eduardo Suprinyak, 2016-09-19 Although historians usually trace its origins to the Haitian Revolution of the late 18th Century Latin American political economic and cultural emancipation is still very much a work in progress As new national identities were developed fresh reflection and theorising was needed in order to understand how Latin America related to the wider world Through a series of case studies on different topics and national experiences this volume shows how political economy has occupied an important place in discussions about emancipation and independence that occurred in the region The production of political economic knowledge in the periphery of capitalism can take on many forms importing ideas from abroad translating and adapting them to local realities or else producing concepts and theories specifically designed to make sense of the uniqueness of particular historical experiences The Political Economy of Latin American Independence illustrates each of these strategies exploring issues such as trade policy money and banking socio

economic philosophy nationalism and economic development The expert authors stress how the originality of Latin American economic thought often resides in the creative appropriation of ideas originally devised in different contexts and thus usually ill suited to local realities Taken together the chapters illustrate a fertile methodological approach for studying the history of political economy in Latin America This book is of great interest to economic historians specialising in Latin America as well as those who study history of economic thought political economy and Latin American history *The Cambridge History of British Foreign Policy, 1783-1919* Adolphus William Ward, George Peabody Gooch, 2011-12-22 Published between 1922 and 1923 the first comprehensive survey of foreign policy during Britain's emergence as a major international power **the cambridge history of british foreign policy 1783-1919**, *Annual Report of the Superintendent of Documents* United States.
