Papiamentu Textbook:

Papiamentu Textbook E. R. Goilo, 1997 **A Description of Papiamentu** Yolanda Rivera Castillo, 2022-06-20 This book constitutes a primary data supported comprehensive grammar of Papiamentu. It analyzes spontaneous speech data from two varieties spoken in Aruba and Curaçao. The author examines structural features so far unexplored in the areas of phonology, morphology, syntax, and aspects of sentential semantics. Particular attention is given to nominal classifiers, non-pro-drop syntactic constructions, and absolute tense marking traits that are rarely described in regards to Creole or Romance languages. Researchers interested in formal analyses of Papiamentu, Creole languages, and in language contact will find this book an indispensable tool.

Papiamentu Textbook E.R. Goilo, **Focus and Grammatical Relations in Creole Languages** Francis Byrne, Donald Winford, 1993-01-01 For review see Silvia Kouwenberg in *New West Indian Guide* Nieuwe West Indische Gids vol 70 no 3 p 369-371

Pidgin and Creole Tense/Mood/Aspect Systems John Victor Singler, 1990-01-01 More than any other area of the grammar, tense mood aspect (TMA) has provided evidence to fuel the ongoing debates about creole genesis and about the relevance of pidgin and creole phenomena to language theory more generally. This volume advances the debate in two ways. First, it makes available in print for the first time and in its original form William Labov's *On the Adequacy of Natural Languages I: The Development of Tense*. Second, the volume features detailed analyses of the TMA systems of seven diverse pidgins and creoles which vary in terms of their lexifying superstrate languages, their location, and their social histories. With the authors employing a broad range of theoretical perspectives for their analyses, the study demonstrates both the extent to which pidgins and creoles share a single prototypical TMA system and the degree to which individual pidgins and creoles diverge from that prototype. This is a volume that brings forward our knowledge and understanding of pidgin and creole TMA. The seven languages analyzed are Capeverdean Crioulo, Kituba, Papiamentu, Berbice Dutch, Haitian Creole, Kru Pidgin, English, and Eighteenth Century Nigerian Pidgin, English.

Creoles in Education Bettina Migge, Isabelle Léglise, Angela Bartens, 2010 This volume offers a first survey of projects from around the world that seek to implement Creole languages in education. In contrast to previous works, this volume takes a holistic approach. Chapters discuss the sociolinguistic, educational, and ideological context of projects, policy developments, and project implementation, development, and evaluation. It compares different kinds of educational activities focusing on Creoles and discusses a list of procedures that are necessary for successfully developing, evaluating, and reforming educational activities that aim to integrate Creole languages in a viable and sustainable manner into formal education. The chapters are written by practitioners and academics involved in educational projects. They serve as a resource for practitioners, academics, and persons wishing to devise or adapt educational initiatives. It is suitable for use in upper level undergraduate and postgraduate modules dealing with language and education, with a focus on lesser used languages.

Pidgins and Creoles: Volume 1, Theory and Structure John A. Holm, 1988-05-05 This first volume of Holm's major survey of pidgins and creoles

provides an up to date and readable introduction to a field of study that has become established only in the past few decades. Written for both students and general readers with a basic knowledge of linguistics the book's original perspective will also attract specialists in the field seeking a broad overview of the linguistic relationships among these languages. Creolized or restructured versions of English, French, Spanish, Dutch, Portuguese and other languages arose during European colonial expansion. These resulted in such creoles as Jamaican, Haitian, Papiamentu and some one hundred others as well as such semi-creoles as Afrikaans, non-standard Brazilian Portuguese, Papiamentu and American Black English. Scholars have tended to work on particular language varieties in relative isolation making comparative research into the genesis, development and structure of creoles difficult. In writing this book Holm draws on broad studies of many languages to make clear how far reaching creole similarities are and to challenge current linguistic theories on creoles and pidgins. The emphasis of this volume is largely empirical rather than descriptive. Its core is a comparative study of creoles based on European languages in Africa and the Caribbean that demonstrates the striking similarities among the languages in terms of their lexical semantics, phonology and syntax. A forthcoming volume provides a socio-historic overview of variety development and text examples with translations of the restructured languages.

[Encyclopedia of Linguistics](#) Philipp Strazny, 2013-02-01 Utilizing a historical and international approach this valuable two volume resource makes even the more complex linguistic issues understandable for the non-specialized reader. Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars the Encyclopedia of Linguistics explores the varied perspectives, figures and methodologies that make up the field.

Creole Genesis, Attitudes and Discourse John R. Rickford, Suzanne Romaine, 1999-12-15 This collection in honor of creolist Charlene Junko Sato 1951-1996 brings together contributions by leading specialists in pidgin/creole studies in three primary areas: Pidgin/Creole Genesis and Development, Attitudes and Education, and Creole Discourse and Literature. The varieties covered come from English, French and Spanish lexical bases and from places as far apart as Africa, Australia, Hawaii and the Caribbean. Editors Rickford and Romaine introduce each of the papers and provide a biography and bibliography of Sato. A short story and poems in Hawaiian Creole, Sato's native language and the variety which was the focus of her research and writing round out the collection.

Netherlands Antilles and Aruba Jo Derkx, 2025-01-20

An Introduction to Pidgins and Creoles John Holm, 2000 A clear and concise introduction to the study of how new languages come into being.

Functional Categories in Three Atlantic Creoles Claire Lefebvre, 2015-07-15 This book is about the functional categories of three Caribbean creoles: Saramaccan, Haitian Creole and Papiamentu with two specific goals. The first one is to evaluate the respective contribution of the source languages to the functional categories of these three creoles. The second is to evaluate the degree of similarity/dissimilarity of the functional categories across these creoles. This study is cast within the relabeling-based account of creole genesis. Several lexical items discussed in this book may fulfill more than one grammatical function thus raising the issue of multifunctionality.

No such in depth comparative work of these three creoles with their source languages and of the three creoles among themselves is available elsewhere in the literature This book is addressed to linguists including Master and PhD students interested in syntactic categories and more specifically in functional categories to creolists and to researchers interested in language contact

When Creole and Spanish Collide , 2021-05-25 Generations of West Indian migrants have long called Central America home The descendants of these Creole English speakers live in communal enclaves along the Caribbean coast of Central America where their Creole heritage and language are in contact zones with Spanish language and culture When Creoles and Spanish Collide Language and Culture in the Caribbean presents contemporary insight into these intra Caribbean diasporic communities on how they grapple with evolving Creole identity and representation language contact language endangerment and linguistic discrimination Communal resilience oftentimes manifests itself via linguistic innovation and creativity Editors Glenda Alicia Leung and Miki Loschky showcase the scholarship of emerging and

established regional and transatlantic scholars in *When Creoles and Spanish Collide* which serves as a decolonizing research space Atlantic Meets Pacific Francis Byrne, John A. Holm, 1993 For review see Peter Bakker in *New West Indian Guide* Nieuwe West Indische Gids vol 70 no 1 p 190 192 **Social and structural aspects of language contact and change** Bettina Migge, Shelome Gooden, 2022-10-20 This book brings together papers that discuss social and structural aspects of language contact and language change Several papers look at the relevance of historical documents to determine the linguistic nature of early contact varieties while others investigate the specific processes of contact induced change that were involved in the emergence and development of these languages A third set of papers look at how new datasets and greater sensitivity to social issues can help to re assess persistent theoretical and empirical questions as well as help to open up new avenues of research In particular they highlight the heterogeneity of contemporary language practices and attitudes often obscured in sociolinguistic research The contributions all focus on language variation and change but investigate it from a variety of disciplinary and empirical perspectives and cover a range of linguistic contexts **Child Language, Creolization, and Historical Change** Eduardo D.
