Para Una Historia De La Arquitectura Mexicana:

Para una historia de la arquitectura mexicana Carlos Lira Vásquez,1990 Guía de recorridos urbanos de la colonia hipódromo Marisol Flores García,2002 **Modern Architecture in Mexico City** Kathryn E. O'Rourke,2017-02-10

Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s a new generation of architects created profoundly visual modern buildings intended to convey Mexico s unique cultural character By midcentury these architects and their students had rewritten the country s architectural history and transformed the capital into a metropolis where new buildings that evoked pre conquest colonial and International Style architecture coexisted Through an exploration of schools a university campus a government ministry a workers park and houses for Diego Rivera and Luis Barragan Kathryn O Rourke offers a new interpretation of modern architecture in the Mexican capital showing close links between design evolving understandings of national architectural history folk art and social reform This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession Juan O'Gorman, arquitectura escolar 1932 J. Victor Arias Montes,2005 The book examines the life and architectonic and didactic legacy of noted architect O Gorman b Mexico with critical texts by expert scholars regarding some of his ideas on the aesthetics of architecture with a special emphasis in public primary schools Includes a reprint of the booklet titled Escuelas Primarias 1932 by O Gorman as a report while working for the Mexican Ministry of Education SEP of the construction of 28 public primary schools in Mexico City Provided by vendor **Tendencias actuales de la arquitectura mexicana** Gilberto Romero Moreno,2005 *Artifacts of Revolution* Patrice Elizabeth Olsen,2008-09-11

This innovative history utilizes the built environment as a means of tracing the path of the consolidation of the Mexican Revolution Patrice Elizabeth Olsen considers the physical changes in Mexico City s built environment using them to evaluate the extent and direction of regime consolidation of successive governments during the critical period from 1920 to 1940 Architects engineers politicians and entrepreneurs alike expressed visions of what modern Mexico should be and sought to improve the nation through an array of initiatives Their successes and failures and thus the direction of the revolution is written in the capital city The author s interdisciplinary approach offers an important contribution to the study of Mexican political history and the aesthetics of modernity *Modernity and the Architecture of Mexico* Edward R. Burian,2010-06-28

Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural

historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obreg n Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus Modernity and the Architecture of Mexico will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect s agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barragán Jos Villagrán García Juan O Gorman Pedro Ramírez Vázquez Agustín Hernández Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan José Díaz Infante Enrique Norten Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture's uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture

Constructing Identity in Contemporary

Architecture Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

Resurrecting Tenochtitlan Delia Cosentino, Adriana Zavala, 2023-05-16 How Mexican artists and intellectuals created a new identity for modern Mexico City through its ties to Aztec Tenochtitlan

Modernización y nacionalismo de la arquitectura mexicana en cinco voces: 1925-1980 Yolanda Guadalupe Bojórquez Martínez, 2016-06-06 Los discursos teóricos de José Villagrán García Luis Barragán Pedro Ramírez Vázquez Juan O'Gorman e Ignacio Díaz Morales son el cimiento a través del cual la autora asienta su búsqueda de los elementos que llevaron a la construcción de un país modernizado lleno tanto de contradicciones rivalidades y antagonismos como de acuerdos y reconocimientos Más allá todavía y desde una lectura estructuralista de la cultura en donde un contexto y una sociedad específicos se interrelacionan con la producción y la toma de posturas de los diversos actores Yolanda Bojórquez parte del análisis del discurso de los cinco arquitectos todos ellos clave en el siglo XX en México para abrir la puerta a la configuración de una teoría de la arquitectura un campo por lo general

descuidado en nuestro país. Esta obra nos permite un acercamiento rico, especializado y apasionante dirigido a estudiantes y profesionales de la arquitectura, así como a cualquier lector interesado en la arquitectura y su evolución en México y en la historia cultural que durante el siglo pasado constituyó esta nación. ITESO **Divergences** Ingrid

Quintana-Guerrero, 2024-03-01. *Divergences: Architecture in Latin America and Discourses of the End of the Century* is a significant contribution to the critical analysis of modern architecture in Latin America. Edited by Ingrid Quintana Guerrero, this volume adds to a series of recent publications that delve deeply and rigorously into the various currents and discourses that have shaped architectural development in the region. From a perspective that challenges the previously predominant celebratory tone in regional canonical studies, this work brings together works by prominent academics who offer a fresh and critical perspective on the reasons, contexts, and outcomes of modern architecture in the southern part of the continent.
