Paracelsus And His Medical Theory:

Paracelsus's Theory of Embodiment Amy Eisen Cisló, 2015-09-30 Paracelsus has been called the father of modern chemistry and is legendary for his treatment of syphilis. This work argues that Paracelsus developed an understanding of the body as composed of two distinct sexes revolutionizing early modern conceptions of the female body as an inversion of or flawed approximation of the male body.

Paracelsus and His Medical Theory John Maxson Stillman, 2005-12-01 This scarce antiquarian book is a facsimile reprint of the original. Due to its age it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving and promoting the world's literature in affordable, high-quality modern editions that are true to the original work.

Hegel and the Hermetic Tradition Glenn Alexander Magee, 2001 Glenn Alexander Magee's book argues that Hegel was decisively influenced by the Hermetic tradition, a body of thought with roots in Greco-Roman Egypt. In the Middle Ages and modern period, the Hermetic tradition became entwined with such mystical strands of thought as alchemy, Kabbalism, Millenarianism, Rosicrucianism, and theosophy. Recent scholarship has drawn connections between the Hermetic counter tradition and many modern thinkers including Leibniz and Newton.

The Alchemy of Light Urszula Szulakowska, 2021-10-01 This study concerns the late Renaissance metaphysics of light in its adoption to a Paracelsian alchemical context by John Dee, Heinrich Khunrath, Michael Maier, and Robert Fludd. Their alchemical theosophy is contextualised within Protestant reformism of the 1590s to 1620s, specifically that of Valentin Weigel and Johannes Arndt. This results in a reassessment of the Rosicrucian movement which challenges the existing historiography and problematises the character of the movement. The volume includes fifty illustrations from alchemical treatises of the period, the emphasis being placed on Khunrath's *Amphiteatrum Sapientiae Aeternae* (1595/1609). In an innovative manner, the study investigates these images using analytical tools drawn from semiotics, structuralism, and post-structuralism. This method yields an unusual interpretation of the geometry, optical diagrams, and spatial structures employed in such alchemical engravings.

Fatal Thirst Elizabeth Lane Furdell, 2009 Using unpublished and published sources, this book examines the history of diabetes in Britain from the perspective of healer and sufferer alike, focusing on medieval treatments, Renaissance era diabetology, and the centuries-long debate among specialists over the site and cure of the disease.

Jacob Böhme and His World Bo Andersson, Lucinda Martin, Leigh Penman, Andrew Weeks, 2018-11-12 Jacob Böhme (1575-1624) is famous as a shoemaker and spiritual author. His works and thought are frequently studied as a product of his mystical illumination. *Jacob Böhme and His World* adopts a different perspective. It seeks to demystify Böhme by focusing on aspects of his immediate cultural and social context and the intellectual currents of his time, including Böhme's writing as literature, the social conditions in Grlitz, Böhme's correspondence networks, a contemporary crisis of piety, Paracelsian and kabbalistic currents, astrology, astronomy, and

alchemy and his relationship to other dissenting authors Relevant facets of reception include B hme s philosophical standing his contributions to pre Pietism and early English translations of his works

Incommensurability and Cross-Language Communication Xinli Wang,2017-05-15 A dominant epistemological assumption behind Western philosophy is that it is possible to locate some form of commonality between languages traditions or cultures such as a common language or lexicon or a common notion of rationality which makes full linguistic communication between them always attainable Xinli Wang argues that the thesis of incommensurability challenges this assumption by exploring why and how linguistic communication between two conceptually disparate languages traditions or cultures is often problematic and even unattainable According to Wang s presuppositional interpretation of incommensurability the real secret of incommensurability lies in the ontological set ups of two competing presuppositional languages This book provides many original contributions to the discussion of incommensurability and related issues in philosophy and offers valuable insights to scholars in other fields such as anthropology communication linguistics scientific education and cultural studies

Conner,2009-04-24 We all know the history of science that we learned from grade school textbooks How Galileo used his telescope to show that the earth was not the center of the universe how Newton divined gravity from the falling apple how Einstein unlocked the mysteries of time and space with a simple equation This history is made up of long periods of ignorance and confusion punctuated once an age by a brilliant thinker who puts it all together These few tower over the ordinary mass of people and in the traditional account it is to them that we owe science in its entirety This belief is wrong A People s History of Science shows how ordinary people participate in creating science and have done so throughout history It documents how the development of science has affected ordinary people and how ordinary people perceived that development It would be wrong to claim that the formulation of quantum theory or the structure of DNA can be credited directly to artisans or peasants but if modern science is likened to a skyscraper then those twentieth century triumphs are the sophisticated filigrees at its pinnacle that are supported by the massive foundation created by the rest of us *Making*

Medicine and the Reformation Andrew Cunningham, Ole Peter Grell, 2013-05-13 The tremendous changes in the role and significance of religion during Reformation and the Catholic Counter Reformation affected all of society Yet there have been few attempts to view medicine and the ideas underpinning it within the context of the period and see what changes it underwent Medicine and the Reformation charts how both popular and official religion affected orthodox medicine as well as more popular healers Illustrating the central part played by medicine in Lutheran teachings the Calvinistic rationalization of disease and the Catholic responses the contributors offer new perspectives on the relation of religion and medicine in the early modern period It will be of interest to social historians as well as specialists in the history of medicine

Transformation of the Psyche Joseph L. Henderson, Dyane N. Sherwood, 2004-06-02 Written by Joseph L Henderson one of the first generation of Jungian analysts and Dyane N Sherwood a practising analyst this book is a striking and unique contribution to the resurgence of interest in alchemy for its way of representing the phenomenology of creative experience Transformation of the Psyche is organized around 22 illuminated paintings from the early Renaissance alchemical manuscript the Splendor Solis and is further illustrated by over 50 colour figures The images of the Splendor Solis are possibly the most beautiful and evocative alchemical paintings to be found anywhere and they are widely known to students of alchemy Jung reproduced several Splendor Solis images in his works yet prior to this book no one has explored the symbolism of the paintings as a series in relation to the process of depth psychological transformation This book is the first scholarly study of the paintings in their entirety and of the mythological

and historical allusions contained within the images Transformation of the Psyche does not simply explain or analyze the pictures but invites the reader to participate in the creative and transforming process evoked by these images Transformation of the Psyche is a truly unique book that will be of immense value and interest to analysts and psychotherapists as well as scholars of mediaeval and renaissance intellectual history and students of spiritual disciplines

Always Reforming Craig D. Atwood, 2001 Always Reforming highlights the fact that in the modern era the notion of heresy has fallen apart Every church has been declared heretical at some time or other by another church and it is not the role of the historian to decide who is right or wrong on doctrinal issues Christians have adapted to sweeping social changes including scientific discoveries and changing world views This volume attempts to uncover some of the hidden dynamics of faith within the many ways in which other Christians have tried to live out the gospel in an uncertain world It also demonstrates that all human institutions including churches change over time Jacket
