Young People and the Shaping of Public Space in Melbourne, 1870-1914 Simon Sleight, 2016-02-11 Baby booms have a long history In 1870 colonial Melbourne was perspiring juvenile humanity with an astonishing 42 per cent of the city's inhabitants aged 14 and under a demographic anomaly resulting from the gold rushes of the 1850s Within this context Simon Sleight enters the heated debate concerning the future prospects of Young Australia and the place of the colonial child within the incipient Australian nation Looking beyond those institutional sites so often assessed by historians of childhood he ranges across the outdoor city to chart the relationship between a discourse about youth youthful experience and the shaping of new urban spaces Play street work consumerism courtship gang related activities and public parades are examined using a plethora of historical sources to reveal a hitherto hidden layer of city life Capturing the voices of young people as well as those of their parents Sleight alerts us to the ways in which young people shaped the emergent metropolis by appropriating space and attempting to impress upon the city their own desires Here a dynamic youth culture flourished well before the discovery of the teenager in the mid twentieth century here young people and the city grew up together

Knowledge Workers in the Information Society Catherine McKercher, Vincent Mosco, 2008-01-01 Knowledge Workers in the Information Society addresses the changing nature of work workers and their organizations in the media information and knowledge industries These knowledge workers include journalists broadcasters librarians filmmakers and animators government workers and employees

in the telecommunications and high tech sectors Technological change has become relentless Corporate concentration has created new pressures to rationalize work and eliminate stages in the labor process Globalization and advances in telecommunications have made real the prospect that knowledge work will follow manufacturing labor to parts of the world with low wages poor working conditions and little unionization McKercher and Mosco bring together scholars from numerous disciplines to examine knowledge workers from a genuinely global perspective **Distributing Status** Samuel

Clark, 2016-05-01 Honorific rewards are all about status and illustrate status processes in a way that few other social phenomena do Why do we have so many honorific awards and prizes Although they are a major feature of modern societies they have received little scholarly attention Samuel Clark argues that answering this question requires a separate historical analysis of different awards and prizes He presents a comprehensive explanation of the origins and evolution of state honours in the British Isles France and the Low Countries Examining cultural social and political changes that led to the massive growth in state honours and shaped their characteristics Distributing Status also demonstrates their functions as instruments of cultural power collective power disciplinary power and status power Clark supports his conclusions with a cross cultural statistical analysis of twenty societies Lucid and logical Distributing Status explicates an important historical change in Western Europe while at the same time contributing to several bodies of sociological literature including evolutionary theory theories of collective action writings on discipline in modern societies and studies of status processes **Index Digest,**

divisive monuments ceremonies and processions assert and reinforce claims to territory legitimacy and dominance These contested symbols and rituals strengthen and lend meaning to communal boundaries confer and renew identities and inflame tensions between groups polarizing communities and at times triggering violence In Contentious Rituals Jonathan S Blake focuses on one such controversial tradition Protestant parades in the streets of Northern Ireland Marchers say they are celebrating their culture and commemorating their history as they have done for two centuries Catholics see the parades as carnivals of bigotry and strident assertions of power The result is heightened inter communal friction and occasional violence Drawing on over 80 interviews an original survey and ethnographic observations Blake investigates why participants choose to march in parades that are known to be a primary source of sectarian conflict today His analysis reveals their reasons for acting the meanings supplied to them and how they make sense of the contention that surrounds them Ultimately he discovers many paraders are not interested in the politics of their actions at all but rather in the allure of the action itself the satisfactions of joining with others to express a collective identity and carry on a cherished tradition An insightful exploration

of the characteristics and dynamics of nationalism in action *Contentious Rituals* offers an innovative approach to the contested politics of culture in divided societies and a new explanation for an old source of conflict in Northern Ireland
