*Still Searching for Oz* John A. Murray,2015-08-18 So what is this book about At its core its a poetry and art book But in retrospect its so much more Growing up in the 80s I was influenced by two things art and music Combine those two things with a personal reflection on the times and what was going on in the world when I wrote each piece and you will get a hint of what you will find within the pages of this book The writing of this book brought me from a high school

student to a college student to a Soldier in Desert Storm to 9 11 to deployments to Iraq and Afghanistan and everywhere in between I hope that you enjoy reading this as much as I enjoyed writing it I learned a lot about myself during this entire process and happened to relive some good and bad times in my life If nothing else comes of this that's enough Intriguing huh

*American Book Publishing Record* ,1998      **Computer Chess Compendium** D. LEVY,2013-06-29 For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could find My files are now quite large and a considerable amount of time effort and expense has been required to build up this collection I have often thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work Unless one has access to a good reference library the task is almost impossible I therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject Such a selection is naturally somewhat subjective and I hope that I will not offend authors whose works have been excluded In particular I have decided to exclude any material which has appeared in the Journal of the International Computer Chess Association ICCA or in its precursor the ICCA Newsletter The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources For further information on ICCA membership and publications the reader is invited to contact Professor H 1 van den Herik or Dr Jonathan Schaeffer University of Limburg Computing Science Department Department of Computer Science University of Alberta 6200 MD Maastricht Edmonton Netherlands Alberta Canada T6G 2H1      *Accounts and Papers, Viz.
