**American Book Publishing Record** ,1998 *Computer Chess Compendium* D. LEVY,2013-06-29 For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could

find My files are now quite large and a considerable amount of time effort and expense has been required to build up this collection I have often thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work Unless one has access to a good reference library the task is almost impossible I therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject Such a selection is naturally somewhat subjective and I hope that I will not offend authors whose works have been excluded In particular I have decided to exclude any material which has appeared in the Journal of the International Computer Chess Association ICCA or in its precursor the ICCA Newsletter The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources For further information on ICCA membership and publications the reader is invited to contact Professor H 1 van den Herik or Dr Jonathan Schaeffer University of Limburg Computing Science Dcpaitment Department of Computer Science University of Alberta 6200 MD Maastricht Edmonton Netherlands Alberta Canada T6G 2HI

*Viral Performance* Miriam Felton-Dansky, 2018-05-15 Digital culture has occasioned a seismic shift in the discourse around contagion transmission and viral circulation Yet theater in the cultural imagination has always been contagious *Viral Performance* proposes the concept of the viral as an essential means of understanding socially engaged and transmedial performance practices since the mid twentieth century Its chapters rethink the Living Theatre s Artaudian revolution through the lens of affect theory bring fresh attention to General Idea s media savvy performances of the 1970s explore the digital age provocations of Franco and Eva Mattes and Critical Art Ensemble and survey the dramaturgies and political stakes of global theatrical networks *Viral performance* practices testify to the age old and ever renewed instinct that when people gather something spreads *Performance* an art form requiring and relying on live contact renders such spreading visible raises its stakes and encodes it in theatrical form The artists explored here rarely disseminate their ideas or gestures as directly as a viral marketer or a political movement would rather they undermine simplified forms of contagion while holding dialogue with the philosophical and popular discourses old and new that have surrounded viral culture *Viral Performance* argues that the concept of the viral is historically deeper than immediate associations with the contemporary digital landscape might suggest and far more intimately linked to live performance
