## **Paradox Of Peace Leaders Decisions And Conflict Resolution:**

*The Paradox of Peace* John Orme, 2004-06-19 This wide ranging text examines the foundations of peace by using diverse case studies to look at the calculations of political leaders and their reliance on optimism Drawing on global examples from various historical periods John D Orme calls into question the longstanding assumption that optimism about the benefits of peace leads to conflict termination Instead he suggests that when leaders perceive little opportunity for gains through sustained conflict the likelihood of peace through compromise may be most likely Bringing together key issues of foreign policy statesmanship and diplomacy this book offers a provocative and straightforward case against the use of optimism in international relations

*Analyzing Strategic Rivalries in World Politics* William R. Thompson, Kentaro Sakuwa, Prashant Hosur Suhas, 2021-11-20 Strategic rivalries are contests between states that view one another as threatening competitors and treat each other as enemies A disproportionate amount of interstate conflict is generated by a relatively small number of these pairs of states engaged in rivalries that can persist for years Thus to understand interstate peace and conflict it is useful to know how rivalries work in general and more specifically In the past two decades a strenuous effort has been mounted to introduce the concept of rivalry and demonstrate its utility in unraveling conflict situations Yet all rivalries are not exactly alike We need to move to a more rewarding differentiation of how they differ in general Principal rivalries are those antagonisms that are most significant to the decision makers in a state The main distinction on issues about which rivals dispute are positional and spatial concerns Positional rivalries contend over regional and global influence Spatial rivals contend over which state deserves to control disputed territory Interventionary rivalries predominate in sub Saharan Africa Their primary focus involves neighboring states attempting to influence who rules and how co ethnics are treated This book updates the inventory of strategic rivalries from 1816 to 2020 Principal rivalries are identified for the first time and cover the same period A theory stressing the two main types of rivalry positional and spatial is elaborated and tested Regional variations on the origins and terminations of spatial rivalry are explored and interpreted In addition attention is paid to fluctuations in the intensity of positional rivalries by examining the working of the contemporary major power triangle United States Soviet Union Russia and China and more generally the dynamics of regional power that are rising in terms of their relative capability and status in the system Variations in cooperation and termination dynamics both in general and according to rivalry type are also examined Overall the emphases of the book are split between demonstrating the utility of distinguishing among rivalry types and examining selected rivalry dynamics

**Confrontation, Strategy and War Termination** Christopher Tuck, 2016-05-23 At the heart of this book is the problem of war termination Britain won an almost unbroken string of tactical military victories during an undeclared war against the Republic of Indonesia in the 1960s yet it proved difficult to translate this into strategic success Using conflict termination theories this book argues that British strategy during Confrontation was both exemplary and flawed both of which need not be mutually exclusive The British

experience in Indonesia represents an illuminating case study of the difficulties associated with strategy and the successful termination of conflicts. The value of this book lies in two areas as a contribution to the literature on British counter insurgency operations and as a contribution to the debates on the problems of war termination in the context of strategic thought.

Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton, 2014-06-30. The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players. Rivalry and Alliance Politics in Cold War Latin America. Christopher Darnton's comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn't work. Specifically, he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders' foreign policy initiatives and complicate regional alliances. His thorough evaluation of several twentieth-century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles. Darnton examines the domestic political and economic conditions that contribute either to rivalry, continued conflict, or rapprochement, diplomatic reconciliation, while assessing the impact of U.S. foreign policy. Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics, including a multilayered examination of Argentine-Brazilian strategic competition and presidential summits over four decades, three rivalries in Central America following Cuba's 1959 revolution, and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries. These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts, creates stronger incentives for improving diplomatic ties between states, and builds effective alliances. The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror, its examination of failed rapprochement efforts between Algeria and Morocco, and its assessment of obstacles to U.S. coalition building efforts.

*For the City* Matt Carter, Darrin Patrick, 2011-05-03. What makes a healthy church? Specifically, what defines a successful church in heavily populated, richly diverse areas? This book will explore what it means to be a church for the city God has called you to engage. Help you learn from past success stories as well as past mistakes in urban ministry. Guide you in developing a philosophy of ministry that can lead to restoration and renewal in your city. According to the United States Census Bureau, over 80% of the population lives in urban areas. Churches in or near cities have to work hard to minister effectively to a diverse group of people, welcoming those of different backgrounds, engaging both the poor and marginalized as well as the wealthy and influential. Church planters Matt Carter and Darrin Patrick explain the biblical, theological, and historical foundations of ministry within the urban core and how to plant churches where the gospel is faithfully shared and brings substantial benefits to those living in the community. *For the City* relates the wisdom gleaned from years of serving their cities for the sake of God's kingdom. Carter and Patrick practically equip church leaders.

and Christians to look at their city as a mission field where individuals and churches can faithfully proclaim the gospel and live out the reality of a community changed and transformed by its message

**Judging Justice** James David Meernik, Kimi Lynn King, 2019-02-07 Some injustices are so massive so heinous and so extraordinary that ordinary courts are no longer adequate The creation of international courts and tribunals to confront major violations of human rights sought to bring justice to affected communities as well as to the entire world Yet if justice is a righting of the imbalance between what has happened and what is reflected in the law no amount of punishment and no judgment could compensate for that suffering and loss In order to understand the meaning of justice James David Meernik and Kimi Lynn King studied the perspective of witnesses who have testified before the International Criminal Tribunal for the Former Yugoslavia ICTY Using a unique survey Meernik and King look at the identity of the victims and their perception of the fairness of ICTY Because of the need to justify the practical and emotional difficulties involved in testifying before an international tribunal witnesses look not just to the institution to judge its effectiveness but also to their own contribution by testifying effectively The central elements of the theory Meernik and King develop identity fairness and experience transcend specific conflicts and specific countries and are of importance to people everywhere

**Military Threats** Branislav L. Slantchev, 2011-02-03 Is military power central in determining which states get their voice heard Must states run a high risk of war to communicate credible intent In this book Slantchev shows that states can often obtain concessions without incurring higher risks when they use military threats Unlike diplomatic forms of communication physical military moves improve a state s expected performance in war If the opponent believes the threat it will be more likely to back down Military moves are also inherently costly so only resolved states are willing to pay these costs Slantchev argues that powerful states can secure better peaceful outcomes and lower the risk of war but the likelihood of war depends on the extent to which a state is prepared to use military threats to deter challenges to peace and compel concessions without fighting The price of peace may therefore be large states invest in military forces that are both costly and unused

**Understanding Near Crises and Escalation in World Politics** Steven E. Lobell, Patrick James, Scott A. Silverstone, Victor Asal, Kyle Beardsley, Edward Gonzalez, Norrin M. Ripsman, 2025-07-31 This book introduces the near crisis phase of conflict and escalation These time sensitive disputes between states and even with violent non state actors do not involve significant risk of military escalation at least in the moment Investigating how and why some near crises escalate while others do not requires an explanation of the different dynamics of international disputes and the policy tools that states and international institutions can employ We ask an expanded set of questions about specific cases and general patterns of conflict behavior such as why did Israeli leaders respond to Hezbollah s 2006 cross border raid with escalation resulting in the Second Lebanon War while in previous instances the Israelis limited their retaliation Why didn t the 2015

Iranian Ballistic Missile Test or the 1995 Norwegian Black Brant Missile Launch escalate while the 2009 North Korea Missile Movement and the 1995 Taiwan Straits dispute tipped into a full blown crisis and why did the 2008 Russia Georgia conflict escalate from near crisis to war We use primary sources and newly created data on near crises to answer these questions and others The overall conclusion is that an ounce of prevention at the near crisis phase is worth a pound of cure in averting a full blown crisis or war This book will be of great interest to students of security studies conflict studies foreign policy and international relations *Building a Global Civic Culture* Elise Boulding,1990-03-01 [Handbook of Politics](#) Kevin T. Leicht,J.
