Native Peoples, Politics, and Society in Contemporary Paraguay Barbara A. Ganson, 2021-06 This unique collection of multidisciplinary essays explores recent developments in Paraguay over the course of the last thirty years since General Alfredo Stroessner fell from power in 1989 Stroessner's strong authoritarian legacy continues to exert an impact on Paraguay's political culture today where the conservative Colorado Party continues to dominate much of the political landscape in spite of the country having transitioned into a modern democracy The essays in *Native Peoples Politics and Society in Contemporary Paraguay* provide new understandings of how Paraguay has become more integrated into the regional economy and societies of Latin America and changed in unexpected ways The scholarship examines how the political change impacted Paraguayans especially its indigenous population and how the country adapted as it emerged from authoritarian traditions Each contribution is exemplary in the scope and depth of its understanding of Paraguay especially its indigenous peoples politics women's rights economy and natural environment

Tropical Forests Bozzano G Luisa, 2012-12-02 Proceedings of a conference on Tropical Forests Botanical Dynamics Speciation and Diversity held at the University of Aarhus Denmark August 8-10 1988 The increasing rate of destruction of the world's tropical forests gives grave cause for concern on several counts In conservative terms species are being lost at an incredible rate many before they have even been described In scientific terms habitats communities and unique systems are lost before they can be studied and used to broaden our understanding of ecological processes in general The meeting on which this book is based aimed to address two basic needs to describe some of the marvellous biological treasures of tropical forests and to learn what they can tell us about processes in ecology and to alert us all once again to the disaster which is overtaking this rich and varied environment

Hunting for Sustainability in Tropical Forests John Robinson, Elizabeth L. Bennett, 2000-02-08 Throughout the world people are concerned about the demise of tropical forests and their wildlife Hunting by forest dwelling people has a dramatic effect on wildlife in many tropical forests frequently driving species to local extinction with devastating implications for other species and the health of the forests themselves But wildlife is an important source of protein and cash for rural peoples Can hunting be managed to conserve biological communities while meeting human needs Are hunting rates as practiced by tropical forest peoples sustainable If not what are the biological social and cultural implications of this failure Answering these questions is ever more important as national and international agencies seek to integrate the development of local peoples with the conservation of tropical forest systems and species This book presents a wide array of studies that examine the sustainability of hunting as practiced by rural peoples Comprising work by both biological and social scientists *Hunting for Sustainability in Tropical Forests* provides a balanced viewpoint on the ecological and human aspects of this hunting The first section examines the effects of hunting on wildlife in tropical forests throughout the world The next section looks at the importance of hunting to local communities The third section looks at institutional challenges of resource management while the fourth draws on economic perspectives to understand both hunting and sustainability A final section
