

THE PIRATE ECONOMY

As recently as the early 1990s, piracy on Africa's coast was a small-time affair, involving only "a few disorganized Somali fishermen," in the words of David Johnson, the CEO of the security consultancy firm Risk Management Group. Now, the pirate economy has grown into a \$100-million-a-year legal infrastructure, along with the infrastructure of ship-hijacking masterminds, coastal lawlessness, and a growing market for ransom money. The number of hijackings exploded in the

late 1990s. Pirate networks retained tightly, knowledge, some pirates are backed by international networks, and others have their own structures to negotiate deals and sharing experiences. At their peak in 2008, Somali pirates are estimated to have collected as much as \$100 million in ransoms.

And yet last year, the number of successful hijackings dropped all the way to zero, thanks to ships' deployment of a host

of defensive mechanisms, from coast radar and more intense on-board security to more important, highly trained teams of robust armed guards. Still, the economic impact of piracy is higher than ever: the amount spent on private security last year alone far exceeded the amount that pirates have been paid out during the past decade. Here's the story of piracy and a pirate piece of the state of Africa, in numbers.
