literature Russia's Capitalist Realism will appeal to readers interested in nineteenth century Russian literature and history the relationship between capitalism and literary form and theories of the novel Recipes for Russia Alison K. Smith, 2008-02-26 Alison K Smith examines changing attitudes behaviors and beliefs about the production and consumption of food in Russia from the late eighteenth century through the mid nineteenth century She focuses on the way that competing ideas based either in traditional Russian practice or in new practices from the rational West became the basis for Russians understanding of themselves and their society The Russians who participated in the process of self definition were variously private authors and reformers or public servants of the Russian imperial state Some had great success in creating a sense of themselves as ultimate authorities on a given topic For example a series of cookbook authors developed a system of writing Russian cookbooks in ways that borrowed from but were still quite different from foreign sources Others found the process of mediating these ideas more difficult agricultural reformers in particular sometimes found traditional practices now deemed irrational hard to eliminate Recipes for Russia looks at the process of nation building within the framework of the modern world that is it looks at the way individuals sought to define their nationality not only against outside influences but also by incorporating those outside influences into some coherent yet national whole While Smith looks at food as part of Russian culture she also connects it with the social legal and economic background that formed the culture while examining the pre reform period in significant detail As a result Recipes for Russia illuminates the great changes of this period both in the food habits of Russians and in their views of themselves and of their nation *From Religious Empires to Secular States* Birol Bařkan, 2014-03-26 In the 1920s and the 1930s Turkey Iran and Russia vehemently pursued state secularizing reforms but adopted different strategies in doing so But why do states follow different secularizing strategies The literature has already shattered the illusion that secularization of the state has been a unilinear homogeneous and universal process and has convincingly shown that secularization of the state has unfolded along different paths Much however remains to be uncovered This book provides an in depth comparative historical analysis of state secularization in three major Eurasian countries Turkey Iran and Russia To capture the aforementioned variation in state secularization across three countries that have been hitherto analyzed as separate studies Birol Ba kan adopts three modes of state secularization accommodationism separationism and eradicationism Focusing thematically on the changing relations between the state and religious institutions Ba kan brings together a host of factors historical strategic and structural to account for why Turkey adopted accommodationism Iran separationism and Russia eradicationism In doing so he expertly demonstrates that each secularization strategy was a rational response to the strategic context the reformers found themselves in **Russian Conservatism** Glenn Diesen, 2021-01-12 Russian conservatism is making a forceful return after a century of experimenting with socialism and liberalism Conservatism is about managing change by ensuring that modernization evolves organically by building on the past Conservatism has a natural attraction for Russia as its thousand year long history is largely

characterized by revolutionary change the destructive process of uprooting the past to give way to modernity Navigating towards gradual and organic modernization has been a key struggle ever since the Mongols invaded in the early 13th century and decoupled Russia from Europe and the arteries of international trade Russian history has consisted of avoiding revolutions that are either caused by falling behind on modernization or making great leaps forward that disrupts socio economic and political traditions Russian conservatives are now tasked with harmonizing the conservative ideas of the 19th century with the revolutionary changes that shaped Russia in the 20th century The rise of Asia now provides new opportunities as it enables Russia to overcome its fixation on the West and develop a unique Russian path towards modernization that harmonizes its Eurasian geography and history

Twilight of the Titans Paul K. MacDonald, Joseph M. Parent, 2018-04-15 In Twilight of the Titans Paul K MacDonald and Joseph M Parent examine great power transitions since 1870 to determine how declining powers choose to behave identifying the strong incentives to moderate their behavior when the hierarchy of great powers is shifting Challenging the conventional wisdom that such transitions push declining great powers to extreme measures this book argues that intimidation provocation and preventive war are not the only alternatives to the loss of relative power and prestige Using numerous case studies MacDonald and Parent show how declining states tend to behave the policy options they have how rising states respond to those in decline and what conditions reward particular strategic choices

Theatre and Identity in Imperial Russia Catherine Schuler, 2009-05 What role did the theatre both institutionally and literally play in Russia's modernization How did the comparatively harmonious relationship that developed among the state the nobility and the theatre in the eighteenth century transform into ideological warfare between the state and the intelligentsia in the nineteenth How were the identities of the Russian people and the Russian soul configured and altered by actors in St Petersburg and Moscow Using the dramatic events of nineteenth century Russian history as a backdrop Catherine Schuler answers these questions by revealing the intricate links among national modernization identity and theatre Schuler draws upon contemporary journals written and published by the educated nobility and the intelligentsia who represented the intellectual aesthetic and cultural groups of the day as well as upon the laws of the Russian empire and upon theatrical memoirs With fascinating detail she spotlights the ideologically charged binaries ascribed to prominent actors authentic performed primitive civilized Russian Western that mirrored the volatility of national identity from the Napoleonic Wars through the reign of Alexander II If the path traveled by Russian artists and audiences from the turn of the nineteenth century to the era of the Great Reforms reveals anything about Russian culture and society it may be that there is nothing more difficult than being Russian in Russia By exploring the ways in which theatrical administrators playwrights and actors responded to three tsars two wars and a major revolt this carefully crafted book demonstrates the battle for the hearts and minds of the Russian people

Boundaries of Utopia - Imagining Communism from Plato to Stalin Erik van Ree, 2015-05-22 The idea that socialism could be established in a single country was adopted as an official doctrine by the Soviet Union in 1925 Stalin and Bukharin being the main formulators of the policy Before this there had been much debate as to whether the only way to secure socialism would be as a result of socialist revolution on a much broader scale across all Europe or wider still This book traces the development of ideas about communist utopia from Plato onwards paying particular attention to debates about universalist ideology versus the possibility for socialism in one country The book argues that although the prevailing view is that socialism in one country was a sharp break from a long tradition that tended to view socialism as only possible if universal in fact the territorially confined socialist project had long roots including in the writings of Marx and Engels

Russia Richard Anderson, 2015-11-15 This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia's rapid cultural

economic and social revolutions over the past century Richard Anderson looks at Russia's complex relationship to global architectural culture exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia's architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it

Reckoning with Rebellion Aaron Sheehan-Dean, 2020-04-29 An innovative global history of the American Civil War *Reckoning with Rebellion* compares and contrasts the American experience with other civil and national conflicts that happened at nearly the same time the Indian Rebellion of 1857 the Polish Insurrection of 1863 and China's Taiping Rebellion Aaron Sheehan Dean identifies surprising new connections between these historical moments across three continents Sheehan Dean shows that insurgents around the globe often relied on irregular warfare and were labeled as criminals mutineers or rebels by the dominant powers He traces commonalities between the United States British Russian and Chinese empires all large and ambitious states willing to use violence to maintain their authority These powers were also able to control how these conflicts were described affecting the way foreigners perceived them and whether they decided to intercede While the stories of these conflicts are now told separately Sheehan Dean argues the participants understood them in relation to each other When Union officials condemned secession they pointed to the violence unleashed by the Indian Rebellion When Confederates denounced Abraham Lincoln as a tyrant they did so by comparing him to Tsar Alexander II Sheehan Dean demonstrates that the causes and issues of the Civil War were also global problems revealing the important paradigms at work in the age of nineteenth century nation building A volume in the series *Frontiers of the American South* edited by William A Link

Writing Russia Melissa-Ellen Dowling, 2021-07-18 *Writing Russia* offers the first systematic analysis of Anglophone national histories of Russia By deconstructing preeminent historical works on the history of Russia this book provides insight into the hidden ideological underpinnings of the texts and their representations of Russia in the West It demonstrates that historians employ a range of literary techniques to smooth over contradictions in their narratives of Russia generating a seemingly cohesive depiction of Russia as a liminal Other nation This is a process that this book theorises as *discordus* representing an original conceptual framework for examining national history texts It identifies patterns in the language and emplotment of Anglophone Russian histories across several defining historical epochs from the

Mongol conquests to the Putin presidency revealing the extent to which historians wield the narrative power to make or break nations Postmodern in approach the work pushes the boundaries of historiography and calls into question the nature of history
