Russian Assignment Leslie C. Stevens,1953 *Russian Assignment* Leslie C. Stevens,1954 Legal guide to investing in Russia , **The World Atlas of Language Structures** Martin Haspelmath,2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world s languages 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels tone systems gender plurals tense word order and body part terminology Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages The Atlas will be especially valuable for linguistic typologists grammatical theorists historical and comparative linguists and for those studying a region such as Africa Southeast Asia North America Australia and Europe It will also interest anthropologists and geographers More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics No institution involved in language research can afford to be without it The Russian Armed Forces at the Dawn of the Millennium ,2000 This anthology is an outgrowth of a conference titled The Russian Armed Forces at the Dawn of the Millennium held at the Collins Center of the Army War College s Center for Strategic Leadership from 7 through 9 February 2000 The genesis for the conference was the realization by several members of the staff of the Collins Center and Army War College faculty that the U S led NATO operation in Kosovo resulted in a significant shift of Russian views on the United States and NATO The conference also complemented our general objective of examining the changing environment in which the United States including its armed forces finds itself The conference brought together over 50 individuals from academia and the policy and intelligence communities to examine the current state of the Russian military Focusing primarily on the socio political dimension of the military but not ignoring the military technical dimension the presentations delivered during the conference looked at Russia s domestic environment the state of the military perceived threats and Russia s capacity to generate responses to those threats DTIC web site **Interrogativity** William Chisholm,Louis T. Milic,John A.C. Greppin,1984-01-01 This is a comparative study on the subject of interrogativity presenting broad and narrow attributes on this subject in diverse languages Russian Mandarin Georgian Bengali Bantu Japanese West Greenlandic and Ute Each contribution presents first the basic facts about the language in question its more recent provenience facts about numbers of speakers writing systems and related areal and sociolinguistic points An overview of the typological hallmarks follows together with a sketch of the grammar broadly construed Finally the grammar of interrogativity is described and the semantics and pragmatics of it are explored **Contract Law in Russia** Maria Yefremova,Svetlana

Yakovleva, Jane Henderson, 2014-12-01 The book explains Russian contract law in a form understandable to lawyers qualified in other countries especially common law countries The introduction gives a concise overview of the Russian legal system in general and contract law in particular as well as a brief insight into the history of contract law in Russia Then the main concepts of Russian contract law are explained using the conceptual framework of English contract law to make them accessible to someone not familiar with the codified Russian system The book not only considers the legislation regulating Russian contractual relations but also includes appropriate case law to show how the legislation is interpreted The focus is on contract law in Russia as it actually operates rather than merely the legislative texts so that it will be directly relevant to legal practitioners and others who wish to acquire knowledge of the practical application of an important element of the Russian legal system as well as those seeking an insight into the realities of codified law in action The target readership therefore includes legal practitioners who have to deal with Russian law academics and students with an interest in Russian law the law of contract and comparative civil law as well as scholars of comparative legal systems and Russian area studies

Programming is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography

contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries **To Amend the Joint Resolution Providing for the Adjudication of Claims of American Nationals Against the Government of the Union of Soviet Socialist Republics** United States. Systems of Nominal Classification Gunter Senft, 2000-08-03 This book first published in 2000 addresses the fundamental linguistic question of how the perceived world is expressed through systems of nominal classification that are grammatically encoded in various languages A team of leading international scholars reviews the whole spectrum of nominal classification from gender systems through to numeral classifiers providing cutting edge theoretical interpretations and empirical case studies based on a wide range of languages The volume presents ideas about the problems of classification advances theory by proposing typological categories and clarifies the interface between anthropological and grammatical work Focusing on systems that have a conceptual semantic basis the contributors reflect and represent approaches in nominal classification research This invaluable reference work will appeal to linguists anthropologists and psychologists alike as well as specialists in languages as diverse as Australian Amazonian Mayan and Japanese **Text, Speech and Dialogue** Václav Matoušek, Pavel Mautner, Tomáš Pavelka, 2005-08-25 The International Conference TSD 2005 the 8th event in the series on Text Speech and Dialogue which originated in 1998 presented state of the art technology and recent achievements in the field of natural language processing It declared its intent to be an interdisciplinary forum intertwining research in speech and language processing with its applications in everyday practice We feel that the mixture of different approaches and applications offered a great opportunity to get acquainted with the current activities in all aspects of language communication and to witness the amazing vitality of researchers from developing countries too The financial support of the ISCA International Speech Communication Association enabled the wide attendance of researchers from all active regions of the world This year's conference was partially oriented towards multi-modal human computer interaction HCI which can be seen as the most attractive topic of HCI at the present time In this way we are involved in a rich complex of communicative activity facial expressions hand gestures direction of gaze to name but the most obvious ones The interpretation of each user utterance depends on the context prosody facial expressions e.g. brows raised brows and gaze both raised and gestures Hearers have to adapt to the speaker e.g. maintaining the theme of the conversation smiling etc Research into the interaction of these channels is however limited often focusing on the interaction between a pair of channels Six significant scientific results achieved in this area in the USA Japan Switzerland Germany The Netherlands and the Czech Republic were presented by keynote speakers in special plenary sessions Further approach *Nominalizations, Double Genitives and Possessives* Anja Šarić, 2018-10-22 The goal of this work is twofold First it aims to account for double genitive constructions in Serbian Second

it aims to re evaluate the DP hypothesis in light of their existence in Serbian Based on evidence from the categorial status of possessives argumenthood in the nominal domain the morphosyntactic structure of nominalizations and the assignment of the genitive case it is argued that DP projection must be assumed in Serbian Supreme Court Appellate Division ,

American Diplomacy Before the Courts Stephen M. Millett,1977 Following the 1917 Bolshevik Revolution the American government refused to grant de jure recognition to the Soviet regime American courts likewise refuse to acknowledge the legal existence of the Soviet Union in matters concerning Russian property in the United States In the 1933 Litvinov Assignment when President Roosevelt granted conditional recognition to Moscow the Soviets assigned its rights to Russian property in the U S to the American government The assignment however proved to be difficult for courts to interpret and implement after 16 years of nonrecognition In 1937 the Supreme Court ruled in *United States v Belmont* that the assignment had been an executive agreement with the same domestic legal effect as a treaty Five years later it ruled that the American government had a superior claim to disputed Russian property to that of any private claimants because of the 1933 executive agreement A review of the cases concerning the legal effects of Soviet American relations from 1917 to 1942 demonstrates the domestic impacts of foreign relations and the role of the courts as they influence the conduct of foreign relations
