Russian Names for Russian Dogs Irene Zerebko, 1985 **Five Russian Dog Stories** Anton Chekhov, Mikhail Saltykov, Ivan Turgenev, 2012-07-12 Five Russian Dog Stories presents touching narratives from three giants in Russian literature Some heart warming some tear jerking none will easily be forgotten Turgenev's Mumi is rescued from drowning by a mute serf Gerasim and quickly becomes his closest friend and comforter until Gerasim's mistress intervenes with tragic consequences Shchedrin's Trezor is the perfect embodiment of canine fidelity carrying out his duties to the letter despite being chained up badly treated and sometimes not even fed Chekhov's Kashtanka when lost is taken in by a circus clown and trained for an act in the ring However she prefers to return to her former abusive master sitting in the audience at her first performance rather than remain with her new caring thoughtful owner These stories have long been held in high esteem tugging at the readers heartstrings When Turgenev died in 1883 a wreath was sent to the grave of the author of Moomoo by British Society for the Prevention of Cruelty to Animals *Russian Central Asia in the Works of Nikolai Karazin, 1842-1908* Elena Andreeva, 2021-02-03 This book provides a deep reading of Nikolai Karazin's works and his relationship with Central Asia Elena Andreeva shows how Karazin's prolific creations have much to tell us about Russian imperialism colonial and local society as well as Russians self identity as colonizers and Europeans The work offers an original contribution to the scholarship on Russian imperial history and that of Central Asia and Russian literary history also Karazin's importance at the time and now is appropriately highlighted Jeff Sahadeo Associate Professor Carleton University Canada Elena Andreeva's book resurrects a vital if forgotten figure from the Russian past Nikolai Karazin Russia's Kipling a multifaceted participant in Russian imperial expansion whose fiction journalism ethnography and visual representations may well have done more than any agent of the Russian state to represent and popularize Russia's conquest of Central Asia to a newly literate Russian public beyond the educated elites Archivaly based and carefully argued Andreeva's study of Karazin reveals the absence of any singular logic to Russian imperial expansion In her analysis Karazin emerges as a vernacular enthusiast of empire who was able to reconcile a skeptical attitude towards tsarist autocracy with an idealized view of Russia's civilizing mission in the East Harsha Ram Associate Professor University of California Berkeley USA This book is dedicated to the literary and visual images of Central Asia in the works of the popular Russian artist Nikolai Karazin It analyzes the ways Karazin's discourse inflected and was inflected by the expansion of the Russian empire and therefore sheds light on the place of art and culture in the Russian colonial enterprise It is the first attempt to interpret Karazin's images of Central Asia within Russian imperial networks and within the maze of the Russian national identity that informed them *Borzoi - The Russian Wolfhound. Animals in Space Colin Burgess, Chris Dubbs, 2007-07-05 Many readers will doubtless be

astonished to learn that animals were being fired aloft in U S and Soviet research rockets in the late 1940s In fact most people not only believe that the Russian space dog Laika was the first canine to be launched into space but also that the high profile precursory Mercury flights of chimps Ham and Enos were the only primate flights conducted by the United States In fact both countries had sent literally dozens of animals aloft for many years prior to these events and continued to do so for many years after Other latter day space nations such as France and China would also begin to use animals in their own space research Animals in Space will explain why dogs primates mice and other rodents were chosen and tested at a time when dedicated scientists from both space nations were determined to establish the survivability of human subjects on both ballistic and orbital space flights It will also recount the way this happened the secrecy involved and the methods employed and offer an objective analysis of how the role of animals as spaceflight test subjects not only evolved but subsequently changed over the years in response to a public outcry led by animal activists It will explore the ways in which animal high altitude and space flight research impacted on space flight biomedicine and technology and how the results both successful and disappointing allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence This book is intended as a detailed yet highly readable and balanced account of the history of animal space flights and the resultant application of hard won research to space technology and astrobiology It will undoubtedly become the ultimate authority on animal space flights
