Russian Regions And Regionalism:

Russian Regions and Regionalism Anne Aldis, Graeme P. Herd, 2003-08-29 The emergence of large regions within Russia as centres of gravity for political and international power and the changing relationship between these emerging regions and the centre are critically important factors currently at work within Russia This book examines the whole question of Russian regions and regionalism It considers important themes related to regionalism including demography security military themes and international relations and looks at a wide range of particular regions as case studies It discusses the extent to which regions have succeeded in establishing themselves as centres of power and assesses the degree to which President Putin is succeeding in incorporating regions into a hierarchy of power in which the primacy of the centre is retained **Russia's**

Regional Identities Edith Clowes, Gisela Erbslöh, Ani Kokobobo, 2018-01-17 Contemporary Russia is often viewed as a centralised regime based in Moscow with dependent provinces made subservient by Putin's policies limiting regional autonomy This book however demonstrates that beyond this largely political view by looking at Russia's regions more in cultural and social terms a quite different picture emerges of a Russia rich in variety with different regional identities cultures traditions and memories The book explores how identities are formed and rethought in contemporary Russia and outlines the nature of particular regional identities from Siberia and the Urals to southern Russia from the Russian heartland to the non Russian republics *The Decline of Regionalism in Putin's Russia* J. Paul Goode, 2011-05-11 This book reassesses Putin's attempt to reverse the decentralization of power that characterised centre regional relations in the 1990s focusing on regional responses to Putin's federal reforms It explains the decline of regionalism after 2000 in terms of the dynamics of regional boundaries understood as the juridical boundaries which demarcate a region's territorial extent and its resources institutional boundaries that sustain regional differences and cultural boundaries that define the ethnic or technocratic principles on which a region could claim legitimate existence The book questions the conventional wisdom regarding the success of Putin's regime It shows how regional governors responded not by attempting to deflect the reforms with outright resistance but by mimicking Putin's centralisation of power at the regional level In turn this facilitated the homogenisation of regional political regimes and regional mergers The book demonstrates how the reordering of regions advanced sporadically how pockets of resistance persist and how the potential for the revival of regionalism continues **Imagining Russian**

Regions Susan Smith-Peter, 2017-10-02 In *Imagining Russian Regions Subnational Identity and Civil Society in Nineteenth Century Russia* Susan Smith Peter shows how ideas of civil society encouraged the growth of subnational identity in Russia before 1861 Adam Smith and G W F Hegel's ideas of civil society influenced Russians and the resulting plans to stimulate the growth of civil society also formed subnational identities It challenges the view of the provinces as empty space held by Nikolai Gogol who rejected the new non noble provincial identity and welcomed a noble only district identity By 1861 these non noble and noble publics would come together to form a multi estate provincial civil society whose promise was not

fulfilled due to the decision of the government to keep the peasant estate institutionally separate **Holding-Together Regionalism: Twenty Years of Post-Soviet Integration** Alexander Libman, E. Vinokurov, 2012-09-27 An in depth analysis of one of the most important and complex issues of the post Soviet era namely the re integration of this highly interconnected region The book considers the evolution of holding together groups since the collapse of the Soviet Union in 1991 looking at intergovernmental interaction and informal economic and social ties **Regionalism and Modern Europe** Xosé M. Núñez Seixas, Eric Storm, 2018-12-13 Providing a valuable overview of regionalism throughout the entire continent Regionalism in Modern Europe combines both geographical and thematic approaches to examine the origins and development of regional movements and identities in Europe from 1890 to the present A wide range of internationally renowned scholars from the USA the UK and mainland Europe are brought together here in one volume to examine the historical roots of the current regional movements and to explain why some of them Scotland Catalonia and Flanders among others evolve into nationalist movements and even strive for independence while others Brittany Bavaria do not They look at how regional identities through regional folklore language crafts dishes beverages and tourist attractions were constructed during the 20th century and explore the relationship between national and subnational identities as well as regional and local identities The book also includes 7 images 7 maps and useful end of chapter further reading lists This is a crucial text for anyone keen to know more about the history of the topical and at times controversial subject of regionalism in modern Europe *Regionalization and Globalization in the Modern World Economy* Alex E. Fernández Jilberto, André Mommen, 2017-03-16 Originally published in 1998 This collection of outstanding essays explores the importance of regionalization and globalization to the world economy International contributions explore the process of regionalization in the Pacific Area The Americas Africa and Europe and question whether the world economy is characterized by increasing regionalization rather than globalization The book is an excellent contribution to debate on development economics It investigates how the processes of globalization and regionalization driven by liberalization of trade and capital markets weaken nationally established monopolies and protected industries and it looks at the challenge to Third World nations and the countries of the former socialist bloc Constructing the International Economy Rawi Abdelal, Mark Blyth, Craig Parsons, 2015-10-27 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere Constructing the International Economy sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents interests Constructing the International Economy portrays the diversity of models and approaches that exist among constructivists writing on the international political economy The authors outline and relate several

different arguments for why scholars might attend to social construction inviting the widest possible array of scholars to engage with such approaches They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm Contributors Rawi Abdelal Harvard Business School Jacqueline Best University of Ottawa Mark Blyth Brown University Mlada Bukovansky Smith College Jeffrey M Chwieroth London School of Economics Francesco Duina Bates College Charlotte Epstein University of Sydney Yoshiko M Herrera University of Wisconsin Madison Paul Langley Northumbria University Craig Parsons University of Oregon Catherine Weaver University of Texas at Austin Wesley W Widmaier Saint Joseph's University Cornelia Woll CERI Sciences Po Paris

Russian Regionalism Steven Rosefielde, 2003 **Between Heaven and Hell** G. Diment, Y. Slezkine, 2016-04-30 Siberia has no history of independent political existence no claim to a separate ethnic identity and no clear borders Yet it could be said that the elusive country behind the Urals is the most real and the most durable part of the Russian landscape For centuries Siberia

has been represented as Russia's alter ego as the heavenly or infernal antithesis to the perceived complexity or shallowness of Russian life. It has been both the frightening heart of darkness and a fabulous land of plenty, the House of the Dead and the realm of utter freedom, a frozen wasteland and a colourful frontier, a dumping ground for Russia's rejects and the last refuge of its lost innocence. The contributors to *Between Heaven and Hell* examine the origin, nature and implications of these images from historical, literary, geographical, anthropological and linguistic perspectives. They create a striking, fascinating picture of this enormous and mysterious land.

Regional politics in Russia Cameron Ross, 2024-06-04. This innovative multi-contributed book, now available in paperback, argues convincingly that Russia will never be able to create a viable democracy as long as authoritarian regimes are able to flourish in the regions. The main themes covered are democratisation at the regional level and the problems faced by the federal states in forging viable democratic institutions in what is now a highly asymmetrical Federation. A major strength of the book lies in its combination of thematic chapters with case studies of particular regions and republics. Very little has been published to date on the actual processes of democratisation in particular republics and regions. The book takes into account the literature available on the new institutionalism and outlines the importance of institutions in developing and maintaining democracy. It looks at the importance of sovereignty, federalism and democratic order and considers the distinct problems of party building in Russia's regions. Electoral politics are also considered fully before the book goes on to consider the whole issue of regional politics and democratisation in five particular areas of Russia: Novgorod, the Komi Republic, Russia's Far East, Tatarstan and Bashkortostan. The authors, the majority of whom are internationally recognised experts in their field, have been drawn from Britain, the USA, Russia and Germany, giving the book a truly global perspective.

Japan's Subnational Governments in International Affairs Purnendra Jain, 2006-03-13. 1 Contexts: conceptual, comparative and Japanese. 2 Japanese SNGs as international actors: domestic dimensions. 3 International exchanges: SNGs lead with a soft approach. 4 International cooperation: a strategic edge. 5 Economic diplomacy. 6 Hard diplomacy: SNGs and national security.

Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02. A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region. This idea prioritises both the intellectual and the practical development of regional studies. This book drives the discussion further. It stresses the complex forms of agency and advocacy involved in the production and reproduction of regional spaces and space of regionalism, as well as the importance of geohistory and context. The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s. The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations. This book was based on a special issue of *Regional Studies*.

Internationalization of Russian Regions and the Consequences

for Russian Foreign and Security Policy Jeronim Perović,2000 *Regional and National Elections in Eastern Europe*

Arjan H. Schakel,2017-02-11 This book is the second of two studies which systematically explore territoriality of the vote in Europe They investigate when and where voters treat regional elections differently from national contests and aim to increase our understanding of the dynamics of electoral competition which have become increasingly multifarious and complex in many countries due to the establishment and strengthening of regional government This volume brings together leading experts on elections who analyze differences between regional and national electoral outcomes in ten East European countries since 1990 Based on a common analytical framework each chapter investigates congruence between regional and national elections and traces and explains second order and regional election effects The editors applied a similar analytical framework in *Regional and National Elections in Western Europe* Palgrave 2013 which focused on 13 West European countries enabling the authors to compare regionalelectoral dynamics between Eastern and Western Europe and observe to what extent explanations for territorial heterogeneity in the vote in the West also apply to the East This book will be of particular interest to advanced students and scholars in the fields of comparative politics regional studies Eastern European politics and democratization *Shaping the Economic Space in Russia* Stefanie Harter,Gerald Easter,2018-04-27 This title was first published in 2000 As the El tsin era has now drawn to a close numerous questions remain unanswered regarding the course of Russia s post Communist traditions El tsin s exit from the presidential stage provides an opportunity to assess the achievements of Russia s multi faceted reforms to explain the factors that have most shaped the reform process and to identify the trends that are likely to continue under a presidential successor This volume embodies such an effort Its contents are the product of a conference held in May 1999 at the Federal Institute for East European and International Studies in Cologne Germany The institute convened an international group of scholars representing a variety of academic approaches to the study of transition economies in general and Russia in particular The title of this volume has been taken from the overarching theme of the conference The goal was determine the extent to which pre existing structures and norms of economic and political life have been fundamentally altered by the El tsin administration s reform campaigns and how these factors themselves have influenced the reform process
