Saar Struggle:

The Saar Struggle Michael T. Florinsky, 1934 This book deals with a question which is of primary importance in the political and economic history of post war post First World War Europe It describes the birth of the new state at the Peace Conference of Versailles and follows its development under the international government up to the autumn of 1934 The peculiar and complicated economic history of this tormented region is set up against the background of the Franco German conflict Dr Florinsky describes fully the labor conditions in the Saar Basin which present some unusual features and are largely responsible for whatever degree of success the international government has achieved The struggle for the Saar has entered into a new phase with the establishment of the Hitler regime in Germany and the approach of the plebiscite which in January 1935 is to decide the future of the territory The nature and character of this struggle are described by Dr Florinsky from personal observations He spent the summer of 1934 in the Saar Basin and had ample opportunities of discussing the situation with the members of the international government leaders of the political parties representatives of religious organizations industry trade unions as well as the rank and file of the people The book examines the probable economic and political consequences of the alternative solutions of the plebiscite from the point of view of the Saar Franco German relations and the peace of Europe and the world

Elizabeth Wiskemann Geoffrey Field, 2022-12-06 This biography examines the life and career of scholar journalist Elizabeth Wiskemann 1899 1971 from her youth and student years at Cambridge to

her death by suicide Disappointed in her hopes for an academic career she reinvented herself as a journalist in Berlin covering the overthrow of the Weimar Republic and the rise of Nazism for The New Statesman Nation and numerous other newspapers and periodicals Expelled from Germany she settled in Prague and funded by Chatham House wrote the most important account of the Czech German conflict and the Sudeten crisis still a classic followed by a detailed analysis of Nazi political and economic destabilization of the countries of eastern Europe Her journalistic skills served her well in the war years when she worked as a secret agent in Switzerland gathering intelligence running agents into Axis controlled Europe and working closely with Allen Dulles the O S S chief in Bern Postwar Wiskemann returned to freelance journalism focusing especially on Italy and Germany while also writing several books including the first scholarly study of the Hitler Mussolini relationship and the first major account of the expulsion of 12 million ethnic Germans from Eastern Europe Although a prolific writer and highly regarded as a commentator on international affairs she remained on the fringes of academia until 1958 when she was appointed Professor of International Relations at Edinburgh the first woman to receive a Chair there in any discipline she later became one of the first faculty recruited by the new Sussex University In her later years she published several works of contemporary history including Europe of the Dictators 1919 45 widely used in schools and universities Blinded in one eye by a botched surgery and increasingly anxious as her other eye deteriorated she became terrified of going completely blind and ended her life Aside from its intrinsic interest Wiskemann s biography is illustrative of a whole cohort of women graduates in the 1920s and 30s who found ways to pursue their interests in international affairs and contemporary history In this sense the book foregrounds the gendered experience of these pioneers whose professional lives often intersected through journalism Chatham House and service in the propaganda and intelligence agencies of the wartime state

Abstracts of Dissertations for the Degrees of Doctor of Philosophy and Doctor of Education Stanford University,1927 *Peacemaking by Democracies* Norrin M. Ripsman,2010-11-01 Challenging this assumption Peacemaking by Democracies breaks down the category of democracy to argue that differences in structural autonomy among democratic states have a lot to do with how foreign security policies are chosen and international negotiations are carried out The more structural autonomy the foreign security policy executive possesses the greater the policy independence from public and legislative opinion it is able to achieve Jacket **Statehood and the Law of Self-Determination** David Raic,2002-09-01 Although most international lawyers assumed that the distribution of the land surface of the earth between States was more or less final after the end of decolonization recent practice has disproved this assumption Eritrea separated from Ethiopia and new States were created out of the former Soviet Union the former Yugoslavia and the former Czechoslovakia There is no reason to believe that these events form the end of the creation of new States Numerous communities within existing States claim a right to full separate statehood on the basis of their entitlement to an alleged right to self determination However in most cases the international community rejected such claims to

statehood even if the territorial entity satisfied the traditional criteria for statehood On the other hand in other cases including some of those mentioned above the international community acknowledged the statehood of entities which clearly failed to meet these criteria In the light of the above mentioned developments this book examines the modern law of statehood and in particular the role of the law of self determination in the process of the formation of States in international law The study shows that the law of statehood has changed considerably since the establishment of the United Nations It is argued that the law of self determination is particularly relevant for explaining the international community's position regarding the general recognition or the general denial of statehood of different territorial entities under contemporary international law *Autonomy, Sovereignty, and Self-Determination* Hurst Hannum, 1996 The content of autonomy

History vs. Apologetics David Cymet, 2012-07-10 Set within the context of the political and ideological developments of the time History vs Apologetics examines the role played by the Catholic Church in the rise and consolidation of the Third Reich and in particular with regard to the Nazi persecution of the Jews Distanced in the beginning the Catholic Church and the Nazi party drew closer as Hitler's popularity increased At the ratification of the Concordat in Rome a commitment not to interfere with the Nazis Final Solution to the Jewish Question was traded for a verbal promise from Berlin to exclude the baptized converts While the Nazi government violated the Concordat at every turn the Church kept zealously its promise Pope Pius XII never mentioned the persecuted Jews by name and denied any knowledge of the annihilation of the Jews Even after the war Pius XII refused to condemn anti-Semitism and Germany's role in the Holocaust Instead the Vatican engaged in the protection of genocide perpetrators and assisted in their mass escape David Cymet's comprehensive critical analysis of the polemical literature on the topic makes it possible to separate legitimate history from apologetic allegations and misrepresentations bringing to light key elements of Church policy that is intentionally misinterpreted by apologists By surveying the Church's policy from just before the rise of Nazism to the present Cymet demonstrates how the Nazis were able to turn the Catholic Church into their ally in their war against the Jews **Radical Approaches to Political Science:**
