People and Computers XII Harold Thimbleby, Brid O'Connell, Peter J. Thomas, 2013-03-14 Most organisations try to protect their systems from unauthorised access usually through passwords Considerable resources are spent designing secure authentication mechanisms but the number of security breaches and problems is still increasing DeAlvare 1990 Gordon 1995 Hitchings 1995 Unauthorised access to systems and resulting theft of information or misuse of the system is usually due to hackers cracking user passwords or obtaining them through social engineering System security unlike other fields of system development has to date been regarded as an entirely technical issue little research has been done on usability or human factors related to use of security mechanisms Hitchings 1995 concludes that this narrow perspective has produced security mechanisms which are much less effective than they are generally thought to be Davis Price 1987 point out that since security is designed implemented used and breached by people human factors should be considered in the design of security mechanism It seems that currently hackers pay more attention to human factors than security designers do The technique of social engineering for instance obtaining passwords by deception and persuasion exploits users lack of security awareness Hitchings 1995 also suggests that organisational factors ought to be considered when assessing security systems The aim of the study described

Closing an Era Richard J. Cox, 2000-09-30 The importance of records in modern society is explored by re examining some of the historical antecedents for critical functions in the modern records professions The motivation for writing this book comes from a conviction of the importance of records and records professionals in organizations and society as well as the need to possess a stronger sense of the events trends people debates and controversies producing the modern records professions Archivists and records managers have tended to discount the importance of their historical antecedents ignoring the fact that many of the current debates and issues before the profession are not new but embedded in the historical evolution of the records professions Re examining some of the historical origins helps records professionals to re examine their mission to manage records for the benefit of organizations and of all of society Such re evaluation also helps to remind records professionals and others that the concerns generated by new electronic recordkeeping technologies are not new at all but built deep within the fabric of traditional records creation and administration

One Jump Ahead Jonathan Schaeffer, 2013-03-09 Why did I write this book I m still not sure After all I m a researcher which means I think I know how to write technical papers But writing for a n technical audience is something I know nothing about It took a lot of effort before I could force myself to sit down to write the first word Once I did however it was hard not to stop When I started this project I didn t know that I had a lot to say and in some sense the results show this The book is much longer than I even imagined it would be Worse yet is that there is a lot of material that I decided not to include It s a good thing that the publishers decided to limit how long the book could be However after much soul searching I think I now know the reasons why I wrote this book First and foremost this book tells an interesting story It s about the life of a checkers playing computer program Chinook from its creation in 1989 to its retirement in 1996 In reality the story revolves around two people with different views of the program As the creator of Chinook I wanted to push the program to become
