Sacred Gaia Holistic Theology And Earth System Science:

Sacred Gaia Anne Primavesi,2002-09-11 Gaia the scientific theory founded by James Lovelock in 1979 embraces the earth as a whole dynamic entity whose sum is always larger than its parts While science and theology are often seen as contraries which negate or dilute one another Gaia theory harmonizes both systems of thought Sacred Gaia cogently describes Gaia theory s analysis of human and earthly evolution Anne Primavesi s remarkable effortlessly coherent book helps us to recognize the sacredness of our origins and our responsibility for the future **Bonhoeffer's Christocentric**

Theology and Fundamental Debates in Environmental Ethics Steven C. van den Heuvel,2017-05-04 There is widespread understanding of the close connection between religion and the ecological crisis and that in order to amend this crisis theological resources are needed This monograph seeks to contribute to this endeavor by engaging the theology of Dietrich Bonhoeffer His theology is particularly suitable in this context due to its open ended nature and to the prophetic and radical nature of the questions he was prepared to ask that is why there are many other attempts to contextualize Bonhoeffer s theology in areas that he himself has not directly written about In this monograph Steven van den Heuvel first of all addresses the question of how to translate Bonhoeffer s theology in a methodologically sound way He settles on a modified form of the general method of correlation Then secondly van den Heuvel sets out to describe five major concepts in Bonhoeffer s work bringing these into critical interplay with discussions in environmental ethics and eco theology In making the correlations he thoroughly describes each concept situating it in the historic and intellectual background of Bonhoeffer s time He then transposes these concepts to contemporary environmental ethics describing what contribution Bonhoeffer s theology can make Earthy Realism Mary Midgley,2012-07-27

GAIA named after the ancient Greek mother goddess is the notion that the Earth and the life on it form an active self maintaining whole By its use of personification it attacks the view that the physical world is inert and lifeless It has a scientific side as shown by the new university departments of earth science which bring biology and geology together to study the continuity of the cycle It also has a visionary or spiritual aspect What the contributors to this book believe is needed is to bring these two angles together With global warming now an accepted fact the lessons of GAIA have never been more relevant and urgent **Ecotheology and the Practice of Hope**

Anne Marie Dalton, Henry C. Simmons,2010-09-29 Is there any hope for a more sustainable world Can we reimagine a way of living in which the nonhuman world matters Anne Marie Dalton and Henry C Simmons claim that the ecotheology that arose during the mid twentieth century gives us reason for hope While ecotheologians acknowledge that Christianity played a significant role in creating societies in which the nonhuman world counted for very little these thinkers have refocused religion to include the natural world To borrow philosopher Charles Taylor s concept they have created a new social imaginary reimagining a better world and a different sense of what is and what should be A new mindset is emerging inspired by ecotheological texts and evident in the many diverse movements and activities that operate as if the hope

imparted by ecotheology has already been realized While making this powerful argument Dalton and Simmons also provide an essential overview of key ecotheological thinkers and texts

A Non-Philosophical Theory of Nature A.
