Berberich, 2017-10-20 Truth came on winds of a raging storm Think you know what's real Read *The Enlightenment* and prepare to question everything Jack Tessler was profoundly disillusioned when his mother told him Santa Claus was nothing but an urban myth Yet unlike most children his age Jack did not take the news lightly His parents fabrication created festering doubts that forced their son to question everything he blindly accepted on faith and his parents trusted word Thus in time Jack's mission was to understand the world around him through the prism of science and reason The journey begins Its early Christmas morning 2017 All air traffic has been suspended as a blizzard of enormous scale pummels the US An alarm sounds in the Dulles air traffic control tower A 1950s era prop driven aircraft is on final approach and its one not seen aloft in four decades Meanwhile Jack Tessler receives an urgent call from NSA director Alex Long What the young physicist learns will radically alter his belief system and shake the very foundations of modern science It seems the plane in question left Boston's Logan Airport early Christmas morning 1954 Tesslers journey of discovery will take him to a place no human has ever gone It is the only place that's real **Sins of Science** Scudder Klyce, 1925 [The Telescope in the Ice](#) Mark Bowen, 2017-11-14 The IceCube Observatory has been called the weirdest of the seven wonders of modern astronomy by *Scientific American* In *The Telescope in the Ice* Mark Bowen tells the amazing story of the people who built the instrument and the science involved Located near the U S Amundsen Scott Research Station at the geographic South Pole IceCube is unlike most telescopes in that it is not designed to detect light It employs a cubic kilometer of diamond clear ice more than a mile beneath the surface to detect an elementary particle known as the neutrino In 2010 it detected the first extraterrestrial high energy neutrinos and thus gave birth to a new field of astronomy IceCube is also the largest particle physics detector ever built Its scientific goals span not only astrophysics and cosmology but also pure particle physics And since the neutrino is one of the strangest and least understood of the known elementary particles this is fertile ground Neutrino physics is perhaps the most active field in particle physics today and

IceCube is at the forefront The Telescope in the Ice is ultimately a book about people and the thrill of the chase the struggle to understand the neutrino and the pioneers and inventors of neutrino astronomy *Steve's Doughnut!* J. K. Smart, 2006
