Interviews on Science from THE NEW YORK TIMES

# SCIENTIFIC

### CONVERSATIONS

CLAUDIA DREIFUS

FOREWORD BY NATALIE ANGIER

**Elin Kelsey** 

Scientific Conversations Claudia Dreifus, 2002-11-01 In these thirty eight interviews originally published in the weekly Science Times section of The New York Times Claudia Dreifus brings all of her colorful personality to bear on her subjects as well as an arsenal of philosophy literature and current events and an unmistakable curiosity As each conversation unfolds we learn surprising and fascinating things about some of the most intriguing figures and issues in science today Dreifus s outsider status in the world of science is perhaps one of her greatest interviewing strengths A political journalist for much of her career she stumbled into a position at the Science Times section With little more scientific background than the average person she scrambled to prepare for her meetings with some of the greatest minds in a broad range of disciplines from astronomy to geology from biology and medicine to computer science and mathematics She soon found herself in a refreshingly candid environment so unlike the one she had known on the political beat It is from this perspective that she makes science tangible accessible and entertaining Encyclopedia of Science and Technology Communication Susanna Horniq Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind This is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences Journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments Scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences Funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research Science communication often in new forms must expand to meet all these needs Providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each For this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses Even so those entering the field rarely will have a comprehensive background in both science and communication studies This circumstance underscores the importance of compiling useful reference materials The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources Science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology

and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges This work will help to develop and enhance such understanding as it addresses these challenges and more Topics covered include advocacy policy and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo science in the news special problems in reporting science and technology science Medical Firsts Robert E. Adler, 2008-04-21 An exploration of medical discoveries from the ancient Greeks to the present Always help or at least do no harm Following this simple yet revolutionary idea Hippocrates laid the foundation for modern medicine over two millennia ago From the Hippocratic Oath to the human genome from Pasteur's germ theory to the worldwide eradication of smallpox Medical Firsts brings to life 2 500 years of medical advances and discoveries Organized chronologically the book describes each milestone in a vivid capsule history making it a fascinating and wonderfully readable resource for anyone interested in medicine's past progress and future promise Robert E Adler PhD Santa Rosa CA has worked as a psychologist and science journalist He writes about a wide variety of scientific and medical topics for New Scientist Nature and other publications and is the author of Science Firsts 0 471 40174 9 **Stockholm** István Hargittai, 2002 The Nobel Prize is by far the highest recognition a scientist may receive and the only one with which the general public is familiar Its prestige has reached improbable heights At the same time a lot of myth surrounds the Nobel Prize and this is compounded by the fact that people tend to view scientists with some bewilderment This book introduces the process of selection of the laureates discusses the ingredients for scientific discovery and for getting recognition It reviews the decisive moments of scientific careers en route to the Nobel Prize points to characteristic features of the laureates the importance of mentors and venues in scientific careers and other components of success It also covers some discoverers and discoveries for whom and for which the Nobel Prize never materialized Whereas there is no general recipe for receiving the Nobel Prize there are common features of successful scientific careers The book reveals some information about the scientists lives and careers that may guide other scientists in increasing their chances of becoming more effective and better recognized players although it is not expected to help anyone to receive the Nobel Prize For the general reader The Road to Stockholm reveals the human face of scientists and the human side of their endeavours The Nobel Prize has served as inspiration for scientists and the general public for a hundred years this book discusses its problems and celebrates its triumphs **Hope Matters** Elin Kelsey, 2020-10-27 This book comes at just the right moment It is NOT too late if we get together and take action NOW Jane Goodall Fears about climate change are fueling an epidemic of despair across the world adults worry about their children's future thirty somethings question whether they should have kids or not and many young people honestly believe they have no future at all In the face of extreme eco anxiety scholar and

award winning author Elin Kelsey argues that our hopelessness while an understandable reaction is hampering our ability to address the very real problems we face Kelsey offers a powerful solution hope itself Hope Matters boldly breaks through the narrative of doom and gloom to show why evidence based hope not fear is our most powerful tool for change Kelsey shares real life examples of positive climate news that reveal the power of our mindsets to shape reality the resilience of nature and the transformative possibilities of individual and collective action And she demonstrates how we can build on positive trends to work toward a sustainable and just future before it s too late Praise for Hope Matters Whether you consider yourself a passionate ally of nature a busy bystander or anything in between this book will uplift your spirits helping you find hope in the face of climate crisis Veronica Joyce Lin North American Association for Environmental Education 30 Under 30 A tonic in hard times Claudia Dreyquis author of Scientific Conversations Interviews on Science from the New York Times Beautifully written and an effective antidote against apathy and inaction Christof Mauch Director Rachel Carson Center for the Environment and Society Published in Partnership with the David Suzuki Institute Women Scientists Magdolna Hargittai, 2015-03-04 Magdolna Hargittai uses over fifteen years of in depth conversation with female physicists chemists biomedical researchers and other scientists to form cohesive ideas on the state of the modern female scientist The compilation based on sixty conversations examines unique challenges that women with serious scientific aspirations face In addition to addressing challenges and the unjustifiable underrepresentation of women at the higher levels of academia Hargittai takes a balanced approach by discussing how some of the most successful of these women have managed to obtain professional success and personal happiness Women Scientists portrays scientists from different backgrounds different geographical regions eighteen countries from four continents and leaders from a variety of professional backgrounds including eight Nobel laureate women The book is divided into three sections Husband and Wife Teams Women at the Top and In High Positions Hargittai uses her own experience to introduce her first section on the lives of prominent scientific couples and addresses the joys and disadvantages of husband and wife teams The second section is a comprehensive exploration of the struggles and triumphs of women at the top Hargittai introduces women from countries where relatively little has been written about female scientists The final section focuses on women scientists involved with science administration and leadership Hargittai's biographical sketches role models for budding scientists. The book is a much needed account of female presence and influence in the sciences Carolina Science and Math Carolina Biological Supply Company, 2003 Science Journalism Martin W Angler, 2017-06-14 Science Journalism An Introduction gives wide ranging guidance on producing journalistic content about different areas of scientific research It provides a step by step guide to mastering the practical skills necessary for covering scientific stories and explaining the business behind the industry Martin W Angler an experienced science and technology journalist covers the main stages involved in getting an article written and published from choosing an idea structuring your pitch researching and interviewing to writing effectively for magazines newspapers and online publications. There are chapters dedicated to investigative reporting handling scientific data and explaining scientific practice and research findings to a non specialist audience Coverage in the chapters is supported by reading lists review questions and practical exercises The book also includes extensive interviews with established science journalists scholars and scientists that provide tips on building a career in science journalism address what makes a good reporter and discuss the current issues they face professionally The book concludes by laying out the numerous available routes into science journalism such as relevant writing programs fellowships awards and successful online science magazines For students of journalism and professional journalists at all levels this book offers an invaluable overview of contemporary science journalism with an emphasis on professional journalistic practice and success in the digital What is Consciousness? Ervin Laszlo, Jean Houston, Larry Dossey, 2016-06-14 What is consciousness Conventional thinking tells us it is the images sensations thoughts and feelings produced by the brain When the neurons in the brain stop firing consciousness ceases to be But does it Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-05 This unprecedented collection of 27 000 quotations is the most comprehensive and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind's scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither's Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories

The Gene Wars Robert M. Cook-Deegan,1994 Cook Deegan a former director of the Biomedical Ethics Advisory
Committee of the US Congress and an advisor to the National Center for Human Genome Research gives a firsthand account
of the struggle to launch the Human Genome Project Using primary documents and interviews Cook Deegan explains
scientific details chronicles the origins of the project covers the conflicts and partnerships between the organizations
involved and examines ethical legal and social issues of DNA research Includes bandw photos Annotation copyright by Book
News Inc Portland OR The Co-Presidency of Bush and Cheney Shirley Anne Warshaw,2009-04-14 This analysis of the
Bush administration reveals how the president willingly ceded power to a calculating vice president with disastrous
consequences Under the relatively inexperienced president George W Bush Dick Cheney was perhaps the most powerful vice
president in American history In this excellently documented work presidential scholar Shirley Anne Warshaw debunks the
popular myth that Bush s authority was hijacked or stolen Instead drawing on extensive research as well as personal
interviews with White House Staffers and Washington insiders she demonstrates how Bush and Cheney operated as nothing

less than co presidents While Bush focused on building what he called a moral and civil society anchored by a war on science and by the proliferation of faith based programs he allowed Cheney to lead in business and foreign policy Warshaw highlights Cheney s decades long career in Washington and his familiarity with its inner workings to present a complete picture of this calculating political powerhouse From Cheney s unprecedented merging of presidential and vice presidential authority to his abhorrence of what he deemed congressional interference Warshaw paints an intriguing and at times frightening portrait

Universities and Their Leadership William G. Bowen, Harold T. Shapiro, 2016-06-28 On the occasion of the 250th anniversary of Princeton University leading educators and commentators participated in a symposium jointly sponsored by Princeton and The Andrew W Mellon Foundation Universities and Their Leadership is a collection of original essays from presenters at the Princeton Conference on Higher Education Individually these essays discuss aspects of contemporary higher education in the U S Taken together they offer a useful perspective on issues that face American universities as they enter the twenty first century The opening essay The University and Its Critics by Frank Rhodes confronts criticisms of the American university examines how universities have changed over recent decades and suggests a plan of action to restore public confidence and strengthen bonds of community within universities On the Accountability of Higher Education in the United States by Martin Trow deals with the critical issue of responsibility Harold Shapiro s essay University Presidents Then and Now blends personal insights with a historical account of changes over time in the roles of university presidents In commenting on Shapiro s paper Hanna Gray draws on her experiences as a university president and her training as a historian to demonstrate that university presidents have always operated under constraints Henry Rosovsky and Inge Lise Ameer collaborate in the essay A Neglected Topic Professional Conduct of College and University Teachers to which Amy Gutmann responds in an essay entitled How Can Universities Teach Professional Ethics Oliver Fulton contributes a cross cultural perspective in Unity or Fragmentation Convergence or Diversity The Academic Profession in Comparative Perspective in the Era of Mass Higher Education Daniel J Kevles s essay A Time for Audacity What the Past Has to Teach the Present about Science and the Federal Government considers the historical partnership between the scientific community and the government In reaction Frank Press in New Policies for New Times comments on the shifting actions of major political parties in supporting research and Maxine Singer in her essay On the Future of America's Scientific Enterprise surveys opportunities and problems that have been created by recent scientific advances **Communicating Science** Eileen Scanlon, 1999 Communicating Scienceis an ideal introduction for anyone who wants to learn about the relationship between science the media and the public The Baltimore Case: A Trial of Politics, Science, and Character Daniel J. Kevles, 2000-01-17 You read with a rising sense of despair and outrage and you finish it as if awakening from a nightmare only Kafka could have conceived Christopher Lehmann Haupt New York Times David Baltimore won the Nobel Prize in medicine in 1975 Known as a wunderkind in the field of immunology he rose quickly through the ranks of the scientific

community to become the president of the distinguished Rockefeller University Less than a year and a half later Baltimore resigned from his presidency citing the personal toll of fighting a long battle over an allegedly fraudulent paper he had collaborated on in 1986 while at MIT From the beginning the Baltimore case provided a moveable feast for those eager to hold science more accountable to the public that subsidizes its research Did Baltimore stonewall a legitimate government inquiry Or was he the victim of witch hunters The Baltimore Case tells the complete story of this complex affair reminding us how important the issues of government oversight and scientific integrity have become in a culture in which increasingly complicated technology widens the divide between scientists and society China's Cold War Science Diplomacy Gordon Barrett, 2022-08-25 During the early decades of the Cold War the People's Republic of China remained outside much of mainstream international science Nevertheless Chinese scientists found alternative channels through which to communicate and interact with counterparts across the world beyond simple East West divides By examining the international activities of elite Chinese scientists Gordon Barrett demonstrates that these activities were deeply embedded in the Chinese Communist Party s wider efforts to win hearts and minds from the 1940s to the 1970s Using a wide range of archival material including declassified documents from China's Ministry of Foreign Affairs Archive Barrett provides fresh insights into the relationship between science and foreign relations in the People's Republic of China Think Like a Rocket Scientist Ozan Varol, 2020-04-14 One of Inc com s 6 Books You Need to Read in 2020 According to Bill Gates Satya Nadella and Adam Grant Adam Grant s 1 pick of his top 20 books of 2020 One of 6 Groundbreaking Books of Spring 2020 according to Malcolm Gladwell Susan Cain Dan Pink and Adam Grant A former rocket scientist reveals the habits ideas and strategies that will empower you to turn the seemingly impossible into the possible Rocket science is often celebrated as the ultimate triumph of technology But it s not Rather it s the apex of a certain thought process a way to imagine the unimaginable and solve the unsolvable It's the same thought process that enabled Neil Armstrong to take his giant leap for mankind that allows spacecraft to travel millions of miles through outer space and land on a precise spot and that brings us closer to colonizing other planets Fortunately you don't have to be a rocket scientist to think like one In this accessible and practical book Ozan Varol reveals nine simple strategies from rocket science that you can use to make your own giant leaps in work and life whether it's landing your dream job accelerating your business learning a new skill or creating the next breakthrough product Today thinking like a rocket scientist is a necessity We all encounter complex and unfamiliar problems in our lives Those who can tackle these problems without clear guidelines and with the clock ticking enjoy an extraordinary advantage Think Like a Rocket Scientist will inspire you to take your own moonshot and enable you to achieve liftoff Science in <u>Culture</u> Stephen R. Graubard, 2018-04-27 Twenty five years ago Gerald Holton's Thematic Origins of Scientific Thought introduced a wide audience to his ideas Holton argued that from ancient times to the modern period an astonishing feature of innovative scientific work was its ability to hold simultaneously deep and opposite commitments of the most fundamental

sort Over the course of Holton's career he embraced both the humanities and the sciences Given this background it is fitting that the explorations assembled in this volume reflect both individually and collectively Holton's dual roots In the opening essay Holton sums up his long engagement with Einstein and his thematic commitment to unity The next two essays address this concern In historicized form Lorraine Daston returns the question of the scientific imagination to the Enlightenment period when both sciences and art feared imagination Daston argues that the split whereby imagination was valued in the arts and loathed in the sciences is a nineteenth century divide James Ackerman on Leonardo da Vinci meshes perfectly with Daston's account showing a form of imaginative intervention where it is irrelevant to draw analogies between art and science Historians of religion Wendy Doniger and Gregory Spinner pursue the imagination into the bedroom with literary theological representations Science culture and the imagination also intersect with biologist Edward Wilson and physicist Steven Weinberg Both tackle the big question of the unity of knowledge and worldviews from a scientific perspective while art historian Ernst Gombrich does the same from the perspective of art history To emphasize the nitty gritty of scientific practice chemists Bretislav Fredrich and Dudley Herschback provide a remarkable historical tour at the boundary of chemistry and physics In the concluding essay historian of education Patricia Albjerg Graham addresses pedagogy head on In these various reflections on science art literature philosophy and education this volume gives us a view in common a deep and abiding respect for Gerald Holton's contribution to our understanding of science in culture Peter Galison is Mallinckrodt Professor of History of Science and of physics at Harvard University Stephen R Graubard is editor of the American Academy of Arts and Sciences and its journal Daedalus and professor of history emeritus at Brown University Everett Mendelsohn is director of the History of Science Program at Harvard University **Totally Random** Tanya Bub, Jeffrey Bub, 2018-08-21 An eccentric comic about the central mystery of quantum mechanics Totally Random is a comic for the serious reader who wants to really understand the central mystery of quantum mechanics entanglement what it is what it means and what you can do with it Measure two entangled particles separately and the outcomes are totally random But compare the outcomes and the particles seem as if they are instantaneously influencing each other at a distance even if they are light years apart This in a nutshell is entanglement and if it seems weird then this book is for you Totally Random is a graphic experiential narrative that unpacks the deep and insidious significance of the curious correlation between entangled particles to deliver a gut feel glimpse of a world that is not what it seems See for yourself how entanglement has led some of the greatest thinkers of our time to talk about crazy sounding stuff like faster than light signaling many worlds and cats that are both dead and alive Find out why it remains one of science s most paradigm shaking discoveries Join Niels Bohr s therapy session with the likes of Einstein Schr dinger and other luminaries and let go of your commonsense notion of how the world works Use your new understanding of entanglement to do the seemingly impossible like beat the odds in the quantum casino or quantum encrypt a message to evade the Sphinx s all seeing eye But look out or you might just get teleported back to the beginning of the

book A fresh and subversive look at our quantum world with some seriously funny stuff Totally Random delivers a real understanding of entanglement that will completely change the way you think about the nature of physical reality <a href="Forthcoming Books">Forthcoming Books</a> Rose Arny,2003

Fuel your quest for knowledge with Authored by is thought-provoking masterpiece, Dive into the World of **Scientific Conversations Interviews On Science From The New York Times**. This educational ebook, conveniently sized in PDF (
PDF Size: \*), is a gateway to personal growth and intellectual stimulation. Immerse yourself in the enriching content curated to cater to every eager mind. Download now and embark on a learning journey that promises to expand your horizons.

Scientific Conversations Interviews On Science From The New York Times Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Scientific Conversations Interviews On Science From The New York Times Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Scientific Conversations Interviews On Science From The New York Times: This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Scientific Conversations Interviews On Science From The New York Times: Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Scientific Conversations Interviews On Science From The New York Times Offers a diverse range of free eBooks across various genres. Scientific Conversations Interviews On Science From The New York Times Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Scientific Conversations Interviews On Science From The New York Times Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Scientific Conversations Interviews On Science From The New York Times, especially related to Scientific Conversations Interviews On Science From The New York Times, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Scientific Conversations Interviews On Science From The New York Times, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Scientific Conversations Interviews On Science From The New York Times books or magazines might include. Look for these in online stores or libraries. Remember that while Scientific Conversations Interviews On Science From The New York Times, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Scientific Conversations Interviews On Science From The New York Times eBooks for free, including popular titles.Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Scientific Conversations Interviews On Science From The New

York Times full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Scientific Conversations Interviews On Science From The New York Times eBooks, including some popular titles.

#### FAQs About Scientific Conversations Interviews On Science From The New York Times Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Scientific Conversations Interviews On Science From The New York Times is one of the best book in our library for free trial. We provide copy of Scientific Conversations Interviews On Science From The New York Times.
