*Scientific German by the Method of Discovery* Kurt F. Leidecker, 1947      **Theories of Scientific Method** Robert Nola, Howard Sankey, 2014-12-18 What is it to be scientific Is there such a thing as scientific method And if so how might such methods be justified Robert Nola and Howard Sankey seek to provide answers to these fundamental questions in their exploration of the major recent theories of scientific method Although for many scientists their understanding of method is something they just pick up in the course of being trained Nola and Sankey argue that it is possible to be explicit about what this tacit understanding of method is rather than leave it as some unfathomable mystery They robustly defend the idea that there is such a thing as scientific method and show how this might be legitimated This book begins with the question of what methodology might mean and explores the notions of values rules and principles before investigating how methodologists have sought to show that our scientific methods are rational Part 2 of this book sets out some principles of inductive method and examines its alternatives including abduction IBE and hypothetico deductivism Part 3 introduces probabilistic modes of reasoning particularly Bayesianism in its various guises and shows how it is able to give an account of many of the values and rules of method Part 4 considers the ideas of philosophers who have proposed distinctive theories of method such as Popper Lakatos Kuhn and Feyerabend and Part 5 continues this theme by considering philosophers who have proposed naturalised theories of method such as Quine Laudan and Rescher This book offers readers a comprehensive introduction to the idea of scientific method and a wide ranging discussion of how historians of science philosophers of science and scientists have grappled with the question over the last fifty years      *Scientific and Technical Translating and Other Aspects of the Language Problem* Unesco, 1957

**One Culture** George Lewis Levine,Alan Rauch,1987 This is the first in a planned series of volumes on science and literature which grow from three basic assumptions explicit in this first volume first that science and literature are two alternative but related expressions of a culture s values and beliefs and second that understanding science in its relation to culture and literature requires some understanding not only of its own internal processes but of pressures exercised by social political and psychological forces third that the idea of influence of one upon the other must work both ways It is not only science that influences literature but literature that influences science the authors say ISBN 0 299 11300 0 45 00 ISBN 0 299 11304 3 pbk 12 95 *Bibliography of Scientific and Industrial Reports* ,1948 Geographical thought Lalita Rana,2008

**The Dual Penal State** Markus D. Dubber,2018-09-04 In The Dual Penal State Markus Dubber addresses the rampant use of penal power in Western liberal democracies The interference with the autonomy of the very persons upon whose autonomy the legitimacy of state power is supposed to rest is systemically normalized rather than continuously scrutinized The fundamental challenge of the penal paradox the prima facie illegitimacy of modern punishment remains unaddressed and unresolved Focusing on the United States and Germany and drawing on his influential account of the patriarchal origins of

police power Dubber exposes the persistence of a two sided criminal justice regime the dual penal state The dual penal state combines principled punishment of equals under the rule of law on one side with punitive discipline of others under the rule of police on the other Slavery has long played a central role in drawing the line between the two sides of the dual penal state In Europe the slave appears in the classic and still foundational accounts of liberal punishment from Beccaria to Kant as the paradigmatic other beyond the protection of law not a legal subject but a mere object of the master s or the state s discretionary discipline In America the patriarchal power to police portrays the continuum from the antebellum slaveholder s whipping of his slaves in private and the racial terror perpetrated by slave patrols in public to the apartheid regime of Jim Crow and the treatment of prisoners as slaves of the state and eventually to the late 20th century s systemic racial violence of the war on crime and the widespread killing of Black suspects by an increasingly militarized and armed police force that triggered the global Black Lives Matter movement

**Conjuring Science** Christopher P. Toumey, 1996 Toumey focuses on the ways in which the symbols of science are employed to signify scientific authority in a variety of cases from the selling of medical products to the making of public policy about AIDS HIV a practice he calls conjuring science It is this conjuring of the images and symbols of scientific authority that troubles Toumey and leads him to reflect on the history of public understanding and perceptions of science in the United States
