Early American Scientific Instruments and Their Makers Silvio A. Bedini, 2019-11-22 In *Early American Scientific Instruments and Their Makers* Silvio A. Bedini meticulously explores the intricate relationship between science and craftsmanship during America's formative years. This compelling study delves into the evolution of scientific tools and devices, highlighting the innovations and practical applications that characterized early American scientific advancement. With a literary style that expertly blends historical narrative with detailed descriptions, Bedini situates this work within the broader context of American intellectual history, presenting a vivid portrait of the makers who contributed to the country's scientific landscape. Silvio A. Bedini, a noted historian and curator, draws from a wealth of knowledge accumulated during his tenure at the Smithsonian Institution, where he dedicated himself to the preservation and study of scientific instruments. His passion for this niche area of history can be attributed to his belief in the significance of these tools as artifacts of human ingenuity and inquiry. In addition, Bedini's extensive research into various craftsmen and their contributions offers readers a nuanced understanding of the cultural and technological milieu of the time. *Early American Scientific Instruments and Their Makers* is an essential read for scholars, collectors, and enthusiasts alike, offering profound insights into the ingenuity of early American science. Whether you are a historian seeking a deeper understanding of America's technological past or simply curious about the evolution of scientific tools, Bedini's work is both informative and engaging, inviting you to appreciate the legacy of these remarkable creators.

*European Collections of Scientific Instruments, 1550-1750* Giorgio Strano, Stephen Johnston, Mara Miniati, 2009-01-26 These selected studies on sixteenth and eighteenth centuries European collections of scientific instruments, which were part of the princely wunderkammern, delineate an up-to-date panorama about the formation of the most important museums of the history of science.

**Scientific Instruments between East and West**, 2019-09-02

*Scientific Instruments between East and West* is a collection of essays on aspects of the transmission of knowledge about scientific instruments and the trade in such instruments between the Eastern and Western worlds, particularly from Europe to the Ottoman Empire. The contributors, from a variety of countries, draw on original Arabic and Ottoman Turkish manuscripts and other archival sources and publications dating from the fifteenth to the twentieth centuries, not previously studied for their relevance to the history of scientific instruments. This little-studied topic in the history of science was the subject of the 35th Scientific Instrument Symposium held in Istanbul in September 2016, where the original versions of these essays were delivered. Contributors are Mahdi Abdeljaouad, Pierre Ageron, Hamid Bohloul, Patrice Bret, Gaye Dan, an Feza G, nergun, Meltem Kocaman, Richard L. Kremer, Janet Laidla, Panagiotis Lazos, David Pantalony, Atilla Polat, Bernd Scholze, Konstantinos Skordoulis, Seyyed Hadi Tabatabaei, Anthony Turner, Hasan Umut, and George Vlahakis. **Making Scientific Instruments in the Industrial Revolution** A.D. Morrison-Low,2017-03-02 At the start of the Industrial Revolution it appeared that most scientific instruments were made and sold in London but by the time of the Great Exhibition in 1851 a number of provincial firms had the self confidence to exhibit their products in London to an international audience How had this change come about and why This book looks at the four main and two lesser English centres known for instrument production outside the capital Birmingham Liverpool Manchester and Sheffield along with the older population centres in Bristol and York Making wide use of new sources Dr Morrison Low curator of history of science at the National Museums of Scotland charts the growth of these centres and provides a characterisation of their products New information is provided on aspects of the trade especially marketing techniques sources of materials tools and customer relationships From contemporary evidence she argues that the principal output of the provincial trade with some notable exceptions must have been into the London marketplace anonymously and at the cheaper end of the market She also discusses the structure and organization of the provincial trade and looks at the impact of new technology imported from other closely allied trades By virtue of its approach and subject matter the book considers aspects of economic and business history gender and the family the history of science and technology material culture and patterns of migration It contains a myriad of stories of families and firms of entrepreneurs and customers and of organizations and arms of government In bringing together this wide range of interests Dr Morrison Low enables us to appreciate how central the making selling and distribution of scientific instruments was for the Industrial Revolution

**Irish National Inventory of Historic Scientific Instruments** Charles Mollan,1995-11-15 Carried out over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland It gives location date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated It also preserves information about

collections which have since been lost sold or otherwise dispersed      **How Scientific Instruments Have Changed Hands**, 2016-09-12 This collection of essays discusses the marketing of scientific and medical instruments from the eighteenth century to the First World War The evidence presented here is derived from sources as diverse as contemporary trade literature through newspaper advertisements to rarely surviving inventories and from the instruments themselves The picture may not yet be complete but it has been acknowledged that it is more complex than sketched out twenty five or even fifty years ago Here is a collection of case studies from the United Kingdom the Americas and Europe showing instruments moving from maker to market place and to some extent what happened next Contributors are Alexi Baker Paolo Brenni Laura Ch zaro Gloria Clifton Peggy Aldrich Kidwell Richard L Kremer A D Morrison Low Joshua Nall Sara J Schechner and Liba Taub      **Engineering Simulations as Scientific Instruments: A Pattern Language** Susan Stepney, Fiona A.C. Polack, 2018-11-01 This book describes CoSMoS Complex Systems Modelling and Simulation a pattern based approach to engineering trustworthy simulations that are both scientifically useful to the researcher and scientifically credible to third parties This approach emphasises three key aspects to this development of a simulation as a scientific instrument the use of explicit models to capture the scientific domain the engineered simulation platform and the experimental results of running simulations the use of arguments to provide evidence that the scientific instrument is fit for purpose and the close co working of domain scientists and simulation software engineers In Part I the authors provide a managerial overview the rationale for and benefits of using the CoSMoS approach and a small worked example to demonstrate it in action Part II is a catalogue of the core patterns Part III lists more specific helper patterns showing possible routes to a simulation Finally Part IV documents CellBranch a substantial case study developed using the CoSMoS approach      *Journal of the Optical Society of America and Review of Scientific Instruments*, 1922      Scientific Instruments, 1500-1900 Gerard L'Estrange Turner, 1998

Hemming Andersen,1996      How Scientific Instruments Speak Bas de Boer,2021-01-14 Science is highly dependent on technologies to observe scientific objects For example astronomers need telescopes to observe planetary movements and cognitive neuroscience depends on brain imaging technologies to investigate human cognition But how do such technologies shape scientific practice and how do new scientific objects come into being when new technologies are used in science In How Scientific Instruments Speak Bas de Boer develops a philosophical account of how technologies shape the reality that scientists study arguing that we should understand scientific instruments as mediating technologies Rather than mute tools serving pre existing human goals scientific instruments play an active role in shaping scientific work De Boer uses this account to discuss how brain imaging and stimulation technologies mediate the way in which cognitive neuroscientists investigate human cognitive functions The development of cognitive neuroscience runs parallel with the development of advanced brain imaging technologies drawing a lot of public attention sometimes called neurohype because of its alleged capacity to demystify the human mind By analyzing how the objects that cognitive neuroscientists study are mediated by brain imaging technologies de Boer explicates the processes by which human cognition is investigated      **Information**

from a collective study on philosophy of scientific practice PSP which began around 2002 and still ongoing There is an apparently increasing interest in scientific practice influenced by the historicistic philosophy of science and the sociology of scientific knowledge SSK Prof WU Tong and his research group believe that it is necessary for PSP to turn from the theory dominant position to the practice dominance PSP has also put forward the possibility of reinterpreting the epistemic status of local knowledge in Chinese tradition which provides the most significant motivation to participate this study In this book we have selected three main cases namely Chinese medicine Fengshui and Ethnobotany to examine the effect of PSP The aim of our collective study is not merely on theoretical construction of PSP but also to consider the various applications of PSP especially for re interpreting and demonstrating the variety of local knowledge from traditional China which seems to be a genuine contribution to the international enterprise of philosophy of science particularly made by Chinese scholars      The
