

# Mathematical Concepts and its Theories in the Vedas

Dr. Subhajyoti Borgohain

Assistant Professor, Majuli University of Culture, Majuli, Assam, India

## ABSTRACT

Vedas are first in numbers; viz. Rigveda, Yajurveda, Samaveda and Atharvaveda. The word 'Veda' itself means knowledge. The Vedic users invented mathematical, geometrical, astronomical, botanical formulas without which health the present development in various aspects cannot be imagined.

The Vedic civilization originated in India bears literary evidence of Indian culture, literature, astronomy and mathematics. The Vedas and Vedāṅgas are primarily religious in content but embody a large amount of astronomical and mathematical knowledge. Although the requirement of mathematics in Vedic period was clearly not for its own sake, but for the purpose of religion and astronomy, since the Vedas are not texts on mathematics, but they mention a lot of mathematical concepts.

In this paper, an attempt has been made to highlight different mathematical concepts and theories as found in the Vedas.

**KEYWORDS:** Area of triangle, big number of Yajurveda, concept of infinity, Concept of Algebra

## INTRODUCTION

The souls of the Vedic religion have given the first literary evidence of Indian culture and hence mathematics. Though the Vedas and Vedāṅgas are primarily religious in content, but they embody a large number of astronomical knowledge. In the Vedic age the requirement for mathematics was to determine the correct times for Vedic ceremonies and the accurate construction of altars. Thus it led to the development of astronomy and geometry.

Mathematics has been found mostly in Vedāṅga Kalpa and Jyotiṣa and in the Vedas, such as Rig-Veda, Yajurveda and Atharvaveda and also in Śatapatha Brāhmaṇa. Of course, R̥gveda is considered as the oldest. They contain several mathematical concepts.

Mathematics is classified as *aparā vidyā* in the Vedic lore. There is a dialogue between Nārada and the sage, Saṁsat Kumar found in Chāndogya Upaniṣad<sup>[1]</sup>. Here, it is said that when Nārada approaches the sage for supreme knowledge, at that time Saṁsat Kumar asks what sciences and arts he already knows. Thereupon, Nārada tells him that he was learned astronomy and arithmetic (*viditavidyā*). Thus mathematics is introduced in the scriptures as an aid and adjunct to *paravidyā*, the spiritual knowledge of Brāhmaṇa.

Mathematics is considered to be the most pre-existent and essential science. It is said in *vedāṅga jyotiṣa* as:

“*et yathā viditā mayā viditāḥ vidyāḥ samayā paritā/*  
*tanvāsvēdāṅga ātānāśatāḥ gopāṁśu anāśānāśānāḥ//*”

“As the events on the heads of geococles, as the gems on the heads of serpents, so is mathematics (to be reckoned) at the crown of the sciences known as *vedāṅga*”<sup>[2]</sup>

The *Veda Saṁhitā* is composed of hymns for various duties and also hymns praising all forms of knowledge. Thus the Vedas are not texts on mathematics but they mention a lot of mathematics, but they mention a lot of mathematical concepts. Since Vedic came down as an oral tradition for very long, no Vedic evidence is primarily indirect and is more of an indication of the kind of concepts that existed than a definition or explanation of these concepts.

Modern age is the age of globalization and of science and technology. So it is obvious to see surrounding us the wide use of mathematics in the field of science and technologies. Though mathematics is developed in later Vedic age by several mathematicians like Aryabhaṭa, Bhāskara, Pythagoras etc. but its concepts found in Vedas also. And these concepts found in the Vedas are in later period developed and explained by the mathematicians and by scholars. Here we will have a discussion about mathematical concepts in the Vedas.

R̥gveda is the oldest of the Vedas. It contains a wealth of knowledge on a variety of subjects. Some of them relate to the broader field of mathematics.

The science of geometry was first invented in India by the Hindus from the Vedic rules for the construction of sacrificial altars. Geometry is used throughout the R̥gveda. However, the emphasis was not based on proofs but on usage. On the other hand modern geometry is based on only proofs. The word geometry comes from *geo* and *metri*. *Geo* in Sanskrit means earth and *metri* means measurement. So *geometry* means measuring the earth. Some of the hymns, which deal with cosmology, imply that these poets were very familiar with geometry.

Sridhar Chitta,2022-01-07 About Book The book explores the relation between the Divine Reality and the ritualistic worship practised by Hindus The first chapter describes interpretations of the symbols used by Rishis in Rig Vedic hymns and of important slokas of Isha Upanishad and also describes the Vedic and Sankhyaic Paradigms which are frameworks for the knowledge embodying Creation In the following three chapters discussions of the origins of the Vedas and the evolution of Vedic auxiliary texts are provided In most Hindu households worshippers seldom discuss the spiritual significance of mantras and stothrams making it appear that the Gods they worship are different from reality The fifth and following chapters are interpretations of the Lalitha and Vishnu sahasranaamas Ganapathi Vaibhavam Sri Rudra and Gajendra Moksham including their spiritual context About the Author Sridhar Chitta is a retired Professor of Electronics and Communication Engineering after several years of service in industries in India the Middle East and Canada When discussing spiritual matters with

friends and colleagues he noted their lack of awareness of the spiritual context of daily worship and felt a strong desire to write a book that discusses the connection Sri Aurobindo's scholarly interpretation of the Vedas and Upanishads made a deep impression on him and led him to explore the spiritual significance of the sahasranaamas and sthothrams of Hindu Devathas. After spending more than 5 years researching and listening to a few hundred discourses he began writing The Knowledge in the Vedas in 2018. He presently resides in Hyderabad India and continues to explore spirituality. He has also authored Fundamentals of Electric Theory and Circuits marketed by Wiley India.
