The Justification of Science and the Rationality of Religious Belief Michael C. Banner,1987 *Faith, Hope and Doubt in Times of Uncertainty* George Ellis,2008 Given contemporary attacks on religious faith this lecture asks what are the intellectual resources and sources of spirituality that can sustain us in these times of uncertainty It suggests that human moral life is a search to understand and implement that true nature of morality It is centred in love with the idea of kenosis letting go playing a key role because of its transformational qualities This book argues the various scientific realities are all partial and inadequate Science can be powerful in the service of an integral view but must not attempt to supplant it Religion is still a key context for a consideration of ethics aesthetics metaphysics and meaning

The Religion of Science Paul Carus,1896 Science, Religion and Reality Joseph Needham,1925 **The Justification of Science and the Rationality of Science and the Rationality of Religious Belief** Michael C. Banner,1990 **For Both Religion and Science** W. Curt Grosse,2013-10 This is a new release of the original 1936 edition **Harmony Between Science and Revelation (1889)** Januarius De Concilio,2008-08-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work

Rationality and Science Roger Trigg,1993 Can science hope to provide a Theory of Everything a final explanation of the nature of the Universe Is science our sole source of knowledge These questions are being increasingly asked and yet at the same time many distrust science and have become disillusioned with its effects on our world Can science and scientific practice be justified What are the rational foundations of science Many contemporary philosophers are bewitched by the idea that there must be some neutral ground or a God s eye view to which we can appeal when we wish to justify a whole conceptual scheme The impossibility of finding one drives many to relativism How far can reason and the idea of reality be upheld in the face of this criticism In this important new book Professor Trigg faces these issues squarely and examines how far it is possible to give reasons for trusting science In defending a realist outlook Trigg aims to show that even physical science must be given metaphysical foundations In so doing he explains and evaluates the views of Rorty Wittgenstein Quine Putnam and Hawking amongst others The limits of science and rationality are explored and the power of human reason is in the end upheld

The Mind of the Universe Mariano Artigas,2001 The Mind of the Universe written by a philosopher and physicist provides a study in which a competent presentation of physical discoveries is combined with a rational search for philosophical presuppositions of science An important contribution to the dialogue between religion and science it will inspire new attempts at bridging science and philosophy in their common search for the hidden meaning of the new scientific theories

The Blind Belief Guillermina Miscoe,2021-07-15 If you like to question everything or would like to have a different perspective on what is taken for

granted as normal this book is probably for you This book is about all the important aspects of blind beliefs people have on religion and spirituality Religions have become omnipresent Their beliefs reach people more easily than rational arguments against them We can find religious centers in every nook and corner of the world broadcasting their teachings If we want to learn about faiths abundant resources are occupying the bookshelves Then we have the preachers They are present everywhere from television to social media The Rationality of Science W. Newton-Smith,1999
