Popkewitz,2013-01-11 This volume considers the ways in which educational research is being shaped by policy across the globe Policy effects on research are increasingly influential as policies in and beyond education drive the formation of a knowledge based economy by supporting increased international competitiveness through more effective evidence based interventions in schooling education and training systems What consequences does this increased steering have for research in education How do transnational agencies make their influence felt on educational research How do national systems and traditions of educational research and relations with policy respond to these new pressures What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas The 2006 volume of the World Yearbook of Education explores these issues focusing on three key themes globalising policy and research in education steering education research in national contexts global local politics of education research The 2006 volume has a truly global reach incorporating transnational policy perspectives from the OECD and the European Commission alongside national cases from across the world in contrasting contexts that include North and South America Canada France Singapore China Russia and New Zealand The range of contributions reflect how pervasive these developments are how much is new in this situation and to what extent evidence based policy pressures on research in education build on past relationships between education and policy This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society *Making Sense of Epidemiological Research* Katherine W. Reeves,2025-07-08 Using clear language and real world examples this accessible textbook provides a concise guide to the understanding and critical evaluation of journal articles in epidemiology The book offers a step by step process beginning with how to find epidemiologic studies on a given topic It then shows readers how to identify and assess the key features of a study s design the methods of data collection and analysis the

conclusions that can be drawn and finally the questions that remain Including a chapter exploring the misuse of artificial intelligence this complete companion shows students not only how to evaluate individual studies but also to synthesize findings across multiple studies on a single topic as well as guidance on writing a critique of a given article Written by an experienced instructor with over 15 years of experience teaching and including activities so that readers can practice the skills they learn this will be essential reading for any student of epidemiology public health and medicine The Madras journal of literature and science ,1837 Collaborative and Distributed E-Research: Innovations in Technologies, Strategies and Applications Juan, Angel A.,Daradoumis, Thanasis,Roca, Meritxell,Grasman, Scott E.,Faulin, J.,2012-02-29 This book offers insight into practical and methodological issues related to collaborative e research and furthers readers understanding of current and future trends in online research and the types of technologies involved Provided by publisher The Chemical News and Journal of Physical Science ,1868 **Encyclopedia of Library and Information Science** Allen Kent,1996-05-24 Supplement 21 Concept Based Indexing and Retrieval of Hypermedia Information to Using Self Checkout Technology to Increase Productivity and Patron Service in the Library **Journal of the Franklin Institute** Franklin Institute (Philadelphia, Pa.),1911 Vols 1 69 include more or less complete patent reports of the U S Patent Office for years 1825 59 **Computer-Assisted Research in the Humanities** Joseph Raben,2014-05-18 Computer Assisted Research in the Humanities describes various computer assisted research in the humanities and related social sciences It is a compendium of data collected between November 1966 and May 1972 and published in Computer and the Humanities The book begins with an analysis of language teaching texts including the DOVACK system a program used for remedial reading instruction It then discusses the objectives types of computer used and status of the Bibliographic On line Display BOLD semiotic systems augmented human intellect program automatic indexing and similar research The remaining chapters present computer assisted research on language and literature philosophy social sciences and visual arts Students who seek a single reference work for computer assisted research in the humanities will find this book useful **Monthly Journal of Science, and Annals of Biology, Astronomy, Geology, Industrial Arts, Manufactures, and Technology** James Samuelson,William Crookes,1868 **Science and Medicine in the Old South** Ronald Numbers,Todd L. Savitt,1999-03-01 With a few notable exceptions historians have tended to ignore the role that science and medicine played in the antebellum South The fourteen essays in Science and Medicine in the Old South help to redress that neglect by considering scientific and medical developments in the early nineteenth century South and by showing the ways in which the South s scientific and medical activities differed from those of other regions The book is divided into two sections The essays in the first section examine the broad background of science in the South between 1830 and 1860 the second section addresses medicine specifically The essays frequently counterpoint each other In the first section Ronald Numbers and Janet Numbers argue that the South s failure to keep pace with the North in scientific areas resulted from demographic factors William Scarborough

asserts that slavery produced a social structure that encouraged agricultural and political careers rather than scientific and industrial ones Charles Dew offers a strong indictment of slavery suggesting that the conservative influence of the institution severely discouraged the adoption of modern technologies Other essays examine institutions of higher learning in the South southern scientific societies and the relationship between science and theology The section on medicine in the Old South also examines the ways in which the medical needs and practices of the Old South were both similar to and distinct from those of other regions K David Patterson argues that slavery in effect imported African diseases into the Southeast and created a modified West African disease environment James H Cassedy points out that land management policies determined by slavery land clearing soil exhaustion also helped created a distinctive disease environment Other contributors discuss southern public health problems domestic medicine slave folk beliefs and the special medical needs of blacks Science and Medicine in the Old South is a long overdue examination of these segments of the southern cultural milieu These essays will do much to clarify misconceptions about the time and the region moreover they suggest directions for future research
