*Inductive, subjective, context-specific,
value-laden knowledge*

Positivism

Social phenomena can be explained using scientific methods

Constructivism

The individual mind creates meaning and reality

Post-structuralism

Meaning is coded in discourses and languages

Post-positivism

Social phenomena can be predicted only by using multiple methods

Interpretivism

The social world is too multifaceted to be explained by natural science methods

Post-modernism

Truth claims and methods are equally distrusted

Critical theory

Research is used to change situations (e.g., empower the subjects of social inquiry)

Pragmatism

The end justifies the means; all methods are equally good if they contribute to the understanding of the research problem

Scientific Perspectives:

Philosophical, Logical and Scientific Perspectives in Engineering Zekâi Şen, 2013-09-14 This book highlights and explains the significance of philosophical logical and scientific principles for engineering education training and engineering works In so doing it aims to help to rectify the neglect of philosophy and logic in current education and training programs which emphasize analytical and numerical methods at the expense of the innovative practical and creative abilities so important for engineering in the past Individual chapters examine the relation of philosophy logic and science to engineering drawing attention to for example the significance of ethics the relevance of the philosophy of science and the increasing importance of application of fuzzy logic to engineering Modeling principles and philosophy in engineering are discussed and the impact of different education systems examined Too often engineers have become reliant on readily available formulations and software this book offers an antidote promoting the recognition of artistic and humanitarian aspects and their integration in engineering works *Christianity and Social Scientific Perspectives on Sport* Tom Gibbons, Stuart Braye, 2020-06-29 There has been a dramatic increase in academic research activity and practical initiatives on the topic of sports and Christianity and its cultural significance during the past decade The Faculty of Health and Life Sciences at York St John University York UK hosted the Inaugural Global Congress on Sports and Christianity IGCSC 24 28th August 2016 in collaboration with the Bible Society at which there were 180 delegates from 22 countries in attendance For the area of sports studies the social scientific study of sport there was a thematic strand at the congress titled Christian sociological perspectives on sport from which a special edition of the journal *Sport in Society* partially emanated This book is based upon this journal special edition The papers selected for inclusion in the special edition were purposely eclectic in order to demonstrate the diversity of current research occurring in the area of Christianity and social scientific perspectives on sport The goal was to bridge divisions between various social science disciplines and theology or religious studies through varied novel and interesting explorations of sport in its various forms We hope this collection inspires further studies into this area The chapters in this book were originally published in a special issue in *Sport in Society* Philosophical and Scientific Perspectives on Downward Causation Michele Paolini Paoletti, Francesco Orilia, 2017-02-17 Downward causation plays a fundamental role in many theories of metaphysics and philosophy of mind It is strictly connected with many topics in philosophy including but not limited to emergence mental causation the nature of causation the nature of causal powers and dispositions laws of nature and the possibility of ontological and epistemic reductions *Philosophical and Scientific Perspectives on Downward Causation* brings together experts from different fields including William Bechtel Stewart Clark and Tom Lancaster Carl Gillett John Heil Robin F Hendry Max Kistler Stephen Mumford and Rani Lill Anjum who delve into classic and unexplored lines of philosophical inquiry related to downward causation It critically assesses the possibility of downward causation given different ontological assumptions and explores the connection between downward causation and

the metaphysics of causation and dispositions Finally it presents different cases of downward causation in empirical fields such as physics chemistry biology and the neurosciences This volume is both a useful introduction and a collection of original contributions on this fascinating and hotly debated philosophical topic *The Bible and Christianity in the Scientific Perspective* Byung Kook Hwang,2025-07-31 Korean Christianity must now be reborn as a biblical agape religion of love and life away from the religion of salvation and self love that seeks personal blessing God is love 1 John 4 8 Jesus is the source of life There is life in Jesus Christ John 1 4 and Jesus is the Word of life 1 John 1 1 The core of the Christian faith is faith alone in God and Jesus Christ True Christians must understand the Bible correctly obey and believe in God and live righteously and good according to the Bible and God s will The life of Jesus Christ is the highest standard of life for people to imitate Christians in Korea should live a life of action in practice according to God s word in the Bible at home and in society They should love one another in deed and truth not just in word or in tongue 1 John 3 18 Only when this agape style life of God s love takes root in Korean society a truly biblical Christian culture will be established in Korea True Christians have freedom in the Lord Jesus Christ and live a life of faith in obedience to God and Jesus Christ refusing to be servants of the world

Reason, Truth, and Theology in Pragmatist Perspective Paul D. Murray, 2004 In this work Paul Murray explores which style of rationality is most appropriate to Christian theology in the contemporary pluralist postfoundationalist postmodern context At its heart is a fresh consideration of the American pragmatist tradition focussing on the writings of Richard Rorty and Nicholas Rescher Where Rorty correctly diagnoses the failures of foundationalist objectivism Rescher's pragmatic idealism is presented as healing the ills in Rorty's own neo pragmatism The significant resonance between Rescher's view of rationality and Christian understanding of the trinity is explored In turn Donald MacKinnon's influential writings are presented as exemplifying just such an approach to theology Murray both articulates an enriched form of Christian postliberalism committed to receiving and learning from other traditions of thought and practice and probes the claim that the dynamics of human rationality can be expected to reflect the Trinitarian dynamics of God's being Paul Murray presents us here with an exhaustive and insightful study of recent pragmatic theory in which he sets up rhythms of healing and completion as well as interrogation particularly remarkable is his exploration of Christianity as the deep and in some sense final interlocutor of pragmatic tradition I strongly recommend this book Olivier Davis Professor of Christian Doctrine King's College London This is a mature wide ranging work that by uniting the intellectual and the practical carries both rational and ethical conviction It does equal justice to the classic teachings of Christianity and to the challenges to rethink them in dialogue with modern and postmodern approaches The result is a conception of Christianity both generously orthodox and deeply engaged with contemporary life and thought It is especially good to see the profound contribution of Donald MacKinnon understood and developed with such perception and relevance David F Ford Regius

Professor of Divinity University of Cambridge Paul Murray is currently Lecturer in Systematic Theology within the Department of Theology at the University of Durham England He has previously held posts at St Cuthbert's Seminary Ushaw College Durham and Newman College of Higher Education Birmingham Essays of his exploring issues in philosophical theology science and theology and contemporary Roman Catholic theology have appeared in leading journals and edited collections This is his first monograph

Clifford Geertz in Morocco Susan Slyomovics, 2013-09-13 Between 1963 and 1986 eminent American anthropologists Clifford and Hildred Geertz together and alone conducted ethnographic fieldwork for varying periods in Sefrou a town situated in north central Morocco south of Fez This book considers Geertz's contributions to sociocultural theory and symbolic anthropology Clifford Geertz made an immense impact on the American academy his interpretative and symbolic approaches reoriented anthropology analytically away from classic social science presuppositions while his publications profoundly influenced both North American and Maghribi researchers alike After his death at the age of 80 on October 30 2006 scholars from local national and international universities gathered at the University of California Los Angeles to analyze his contributions to sociocultural theory and symbolic anthropology in relation to Islam ideas of the sacred Morocco's cityscapes notably Sefrou's bazaar or suq colonialism and post independence economic development gender and political structures at the household and village levels This book looks back to a specific era of American anthropology beginning in the 1960s as it unfolded in Morocco and at the same time the contributions examine new lines of enquiry that opened up after key texts by Geertz were translated into French and introduced to generations of francophone Maghribi researchers who sustain lively and inventive meditations on his Morocco writings This book was published as a special issue of Journal of North African Studies

God, Evolution, and Animal Suffering Bethany N. Sollereeder, 2018-10-29 After the publication of On the Origin of Species in 1859 theologians were faced with the dilemma of God creating through evolution Suddenly pain suffering untimely death and extinction appeared to be the very tools of creation and not a result of the sin of humanity Despite this paradigm shift the question of non human suffering has been largely overlooked within theodicy debates overwhelmed by the extreme human suffering of the twentieth century This book redresses this imbalance by offering a rigorous academic treatment of the questions surrounding God and the suffering of non human animals Combining theological philosophical and biblical perspectives this book explores the relationship between God and Creation within Christian theology First it dismantles the popular theological view that roots violence and suffering in the animal kingdom in the fall of humanity Then through an exploration of the nature of love it affirms that there are multiple reasons to suggest that God and creation can both be good even with the presence of violence and suffering This is an innovative exploration of an under examined subject that encompasses issues of theology science morality and human animal interactions As such it will be of keen interest to scholars and academics of religion and science the philosophy of religion theodicy and biblical studies

How Does God Act in the World? David Wilkinson, 2025-05-29 Does God act in the

world and if God does then how These questions are central questions for Christian theology and Christian mission and ministry Is God simply a creator who then goes on holiday and leaves the universe to develop or is God the one who is embodied in Jesus the God of signs and wonders death and resurrection And what does this mean for signs and wonders today in the life of individuals and local churches From The Simpsons to a wedding in Cana from grace to quantum theory and from the problem of evil to eschatology David Wilkinson argues that the biblical picture of a God who acts in the world makes sense in the light of modern science but how God acts cannot be reduced to simple models **Modern Physical**
