Electroweak Effects at High Energies Harvey B. Newman, 2013-06-29 The first Europhysics Study Conference on Electroweak Effects at High Energies was held at the Ettore Majorana Centre for Scientific Culture in Erice, Sicily, from February 1-12, 1983. The conference was attended by 61 physicists from 11 countries. The conference was sponsored by the European Physical Society, the Italian Ministry of Public Education, the Italian Ministry of Technological Research, the Sicilian Regional Government, and the California Institute of Technology.

CONFERENCE FORMAT The Study Conference followed a new intensive format in which the state of our knowledge of the electroweak interaction and the relation of the electroweak sector to Grand Unified and Superunified Theories was reviewed in some depth. During the two-week conference, 54 experimental and theoretical talks were presented, and four evening discussion sessions were held. The Erice surroundings, the wide-ranging conference program, and the fact that nearly all of the participants were directly involved in recent major experimental or theoretical developments led to animated and very friendly discussions. Participants had the rare opportunity to view most of the major trends in high energy physics in a short interval of time and to discuss and contemplate the trends in the uniquely peaceful yet stimulating atmosphere, which is an Erice tradition.

Due Diligence and the High Seas Tony Cabus, 2021-12-21 There has been a rapid growth of interest in due diligence, especially in the fields of environmental law and the law of the sea. Yet confusion seems to surround this notion. Is

due diligence a principle a rule a standard or something else This book firstly explores thoroughly the concept of due diligence its purpose and its mechanisms in order to propose a comprehensive theory of due diligence in harmony with the general law of State responsibility In the meantime this book also explores the usefulness of due diligence to address modern challenges afflicting the high seas Indeed while the application of due diligence in transboundary contexts is well illustrated by jurisprudence its applicability in areas beyond national jurisdiction remains unclear Yet a proper usage of this concept may be crucial for the protection of the high seas as it allows for the intervention of international standards in this fragile area Hopefully the concept of due diligence can help compensate the insufficiencies of the United Nations Convention on the Law of the Sea concerning the high seas Examining in detail the theory of due diligence this book will interest international lawyers concerned with this notion It also offers a new perspective on the UNCLOS through the prism of due diligence and will interest lawyers dealing with the protection of the marine environment and fisheries
