## **Scientism Philosophy And The Infatuation With Science:**

**Scientism** Tom Sorell,2013-07-04 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company  
Knowledge and Knowing in Library and Information Science John M. Budd,2001-05-25 This landmark work traces the heritage of thought from the beginnings of modern science in the seventeenth century until today that has influenced the profession of library and information science     **The Oxford Handbook of Humanism** Anthony B. Pinn,2021 As a system of thought that values human needs and experiences over supernatural concerns humanism has gained greater attention amid the rapidly shifting demographics of religious communities This outlook has taken on global dimensions with activists artists and thinkers forming a humanistic response not only to religion but to the pressing social and political issues of the 21st century The Oxford Handbook of Humanism aims to explore the subject by analyzing its history its philosophical development and its influence on culture It will also discuss humanism as a global phenomenon an approach that has often been neglected in more Western focused works     **Practicing Art/Science** Philippe Sormani,Guelfo Carbone,Priska Gisler,2018-07-11 Over the last two decades multiple initiatives of transdisciplinary collaboration across art science and technology have seen the light of day Why by whom and under what circumstances are such initiatives promoted What does their experimental character look like and what can be learned epistemologically and institutionally from probing the multiple practices of art science at work In answer to the questions raised Practicing Art Science contrasts topical positions and insightful case studies ranging from the detailed investigation of art at the nanoscale to the material analysis of Leonardo's Mona Lisa and its cracked smile In so doing this volume brings to bear the practice turn in science and technology studies on the empirical investigation of multifaceted experimentation across contemporary art science and technology in situ Against the background of current discourse on artistic research the introduction not only explains the particular relevance of the practice turn in STS to tackle the interdisciplinary task at hand but offers also a timely survey of varying strands of artistic experimentation In bringing together ground breaking studies from internationally renowned scholars and upcoming researchers in sociology art theory and artistic practice as well as history and philosophy of science Practicing Art Science will be essential reading for practitioners and professionals in said fields as well as postgraduate students and representatives of higher education and research policy more broadly

**Origins** Ariel Adrean Roth,1998 Are the worlds of science and religion irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either

science's evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover **Marketing** Michael John Baker, 2001 Making Sense of Evolution Massimo Pigliucci, Jonathan Kaplan, 2010-02-15 Making Sense of Evolution explores contemporary evolutionary biology focusing on the elements of theories selection adaptation and species that are complex and open to multiple possible interpretations many of which are incompatible with one another and with other accepted practices in the discipline Particular experimental methods for example may demand one understanding of selection while the application of the same concept to another area of evolutionary biology could necessitate a very different definition Spotlighting these conceptual difficulties and presenting alternate theoretical interpretations that alleviate this incompatibility Massimo Pigliucci and Jonathan Kaplan intertwine scientific and philosophical analysis to produce a coherent picture of evolutionary biology Innovative and controversial Making Sense of Evolution encourages further development of the Modern Synthesis and outlines what might be necessary for the continued refinement of this evolving field A Postfoundationalist Comparative Christology David Muthukumar Sivasubramanian, 2022-03-28 Interreligious relationships are often hindered by epistemic disparity caused by the nexus between religions and state powers To solve this problem David Muthukumar Sivasubramanian develops a postfoundationalist epistemological framework to affirm the epistemic parity and plurality of religions while upholding their particularity and universality Building on this postfoundationalist epistemology a comparative Christology paradigm that uses insights from the extant comparative theology method is reformulated with a Christological focus This model seeks to affirm the exclusive faith assertions of Christianity and the corresponding universal claims for Christ It also sustains the particular religious identity of a comparative theologian over against any compulsion to assume hybrid identity in the interreligious cross learning This comparative Christology framework is exhibited through cross learning with the Tamil Saiva Siddhanta tradition This method is shown to affirm not only the particularity and universality of Christianity but also of the Tamil Saiva Siddhanta tradition by defining each religion's attempt at their revealed truth as a parallel quest for truth Thus it facilitates dialogue across religions by securing one's self identity and the other's alterity Faith, Reason, and Culture George Karuvelil, 2020-07-24 In this book George Karuvelil seeks to establish the rationality of religion and theology in the contemporary world Theology has always required some philosophical basis Moreover Christian theology has had a dynamic character that enabled it to adapt to more than one philosophy depending on the need of the time For instance it shifted in accordance with the change from Neo Platonism to Aristotelianism in the thirteenth century However this dynamism has been absent since the dawn of modernity when reason became identified with modern science to disastrous results While the advent of postmodernism has brought the limits of modernism to light it has done nothing to establish the rationality of religion other than to treat religion as a cultural phenomenon along with science This book conceives fundamental theology as a discipline that seeks religious truth in the midst of diverse perspectives ranging from militant atheism to violent

religious fanaticism     **Paul Churchland** Brian L. Keeley,2006 Offers an introduction to Churchland s work alongside a critique of his most famous philosophical positions     *Encyclopedia of Environmental Change* John A Matthews,2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences     [Re-Reading Beccaria](#) Antje du Bois-Pedain,Shachar Eldar,2022-10-06 Cesare Beccaria s slim 1764 volume On Crimes and Punishments influenced policy developments worldwide and over decades if not centuries after its publication For those who turn to Beccaria s work today the encounter is shaped by that knowledge Appreciative of On Crimes and Punishments dual nature as historical document and repository of ideas the contributions in this collection address different aspects of the criminal justice theory Beccaria offered his readers and face up to methodological questions raised by meeting a historical text of this kind unsystematic and by modern standards often under argued with modern scholarly conventions in mind Contributions in the first part of the book engage with Beccaria s political theory of criminal justice through the lenses of political and penal philosophy considering how Beccaria s blending of social contractarian foundations and proto utilitarian policy analysis interlinks with the concrete set of criminal justice practices Beccaria presents as justified This leads on to the second part where contributors approach Beccaria s ideas with present day reforms and developments in mind Many of his policy proposals and arguments remain significant from our contemporary perspective their limitations and omissions proving as instructive for the contemporary scholar as their more prescient elements The third part offers those looking at Beccaria s work today a glimpse into the practical difficulties facing the firebrand author turned public servant during his long career in the

Habsburg Lombardian administration It puts his work into the broader context of pathways to criminal justice reform in northern Italy Habsburgian Lombardy and the Austro Hungarian Empire in Beccaria's day *Toward Post Ageing* Katarina Friberg Felsted, Scott D. Wright, 2014-08-27 This book examines the emergent and expanding role of technologies that hold both promise and possible peril for transforming the ageing process in this century It discusses the points and counterpoints of technological advances that would influence a reconstruction of what it means to age when embedded in a post human vision for a post biological future The book presents a provocative interdisciplinary meta analysis that contrasts paradigms with inflection points making the case that society has entered a new inflection point provisionally labeled as Post Ageing It goes on to discuss the moderate and radical versions of this inflection point and the philosophical issues that need to be addressed with the advent of post ageing activities postponing and possibly ending ageing primarily through technological advances This book will be a valuable resource for professionals who wish to review the continuum of varied constructs and intersects of technologies ranging from those purporting to enhance the activities of daily living in older adults to those that would enable the older worker to stay competitive in the labor market to those that propose to extend longevity and ultimately claim to transcend ageing itself moving toward a transhumanistic domain and more specifically a post ageing inflection point

*The Nature of Philosophical Problems* John Kekes, 2014 We must all make choices about how we want to live We evaluate our possibilities by relying on historical moral personal political religious and scientific modes of evaluations but the values and reasons that follow from them conflict Philosophical problems are forced on us when we try to cope with such conflicts There are reasons for and against all proposed ways of coping with the conflicts but none of them has been generally accepted by reasonable thinkers The constructive aim of *The Nature of Philosophical Problems* is to propose a way of understanding the nature of such philosophical problems explain why they occur why they are perennial and propose a pluralist approach as the most reasonable way of coping with them This approach is practical context dependent and particular It follows from it that the recurrence of philosophical problems is not a defect but a welcome consequence of the richness of our modes of understanding that enlarges the range of possibilities by which we might choose to live The critical aim of the book is to give reasons against both the absolutist attempt to find an overriding value or principle for resolving philosophical problems and of the relativist claim that reasons unavoidably come to an end and how we want to live is ultimately a matter of personal preference not of reasons

*Collingwood on Philosophical Methodology* Karim Dharamsi, Giuseppina D'Oro, Stephen Leach, 2019-01-17 This book discusses Collingwood's conception of the role and character of philosophical analysis It explores questions such as is there anything distinctive about the activity of philosophizing If so what distinguishes philosophy from other forms of inquiry What is the relation between philosophy and science and between philosophy and history For much of the twentieth century philosophers philosophized with little self awareness Collingwood was exceptional in the attention he paid to the activity of philosophizing This book will be of interest

both to those who are interested in Collingwood's philosophy and more generally to all who are interested in the question what is philosophy    **Science Fiction and the Two Cultures** Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities. The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science; how H G Wells first showed the possibilities of combining scientific and humanistic perspectives; how writers influenced by Gernsback's ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress; and how more recent writers offer critiques of science and its practitioners

**The Great War and the Death of God** Charles A. O'Connor, 2014-04-07 A compelling analysis of how World War I spurred the rise of atheism and the subsequent effect on Western theology, philosophy, literature, and art. The catastrophic Great War left humanity in a world no longer trustworthy and reassuring but seemingly meaningless and indifferent. Instead of redressing humanity's cosmic alienation postwar, Western culture abandoned its concern for cosmic meaning, lost its confidence in human reason, and enabled the scientific worldview of neo-Darwinian materialism to emerge and eventually dominate the Western mind. According to the proponents of that worldview, science is the only source of genuine truth; nature is the product of a blind evolutionary process and reality at bottom is just physics and chemistry. Thus God is dead and continued belief in a transcendentally purposeful universe is intellectually indefensible and either disingenuous or delusional. By turning away from the eternal questions about the nature of reality, Western culture effectively ceded unwarranted credibility and prominence to neo-Darwinian materialism, including its recently strident New Atheism. O'Connor revisits the 20th century's journey from Nietzsche's declaration of the death of God to the rise of materialism as the dominant worldview of western intelligentsia. We live in a world that has largely expelled both mind and meaning from the citadels of serious intellectual pursuit and O'Connor's book is a fascinating and scholarly expedition into the how and why of that troubling development.

Carter Phipps author of *Evolutionaries* I found this topic to be top rate. The book is well researched and conceived, nicely narrated and analyzed, and an original body of inquiry into a challenging, fascinating intellectual tradition. Ronald M Johnson Professor Emeritus of American History Georgetown University    **Transformations of Electricity in Nineteenth-Century Literature and Science** Stella Pratt-Smith, 2017-05-15 Throughout the nineteenth century, practitioners of science, writers of fiction, and journalists wrote about electricity in ways that defied epistemological and disciplinary boundaries. Revealing electricity as a site for intense and imaginative Victorian speculation, Stella Pratt Smith traces the synthesis of nineteenth-century electricity made possible by the powerful combination of science, literature, and the popular imagination. With electricity resisting clear description even by those such as Michael Faraday and James Clerk Maxwell who knew it best, Pratt Smith argues that electricity was both metaphorically suggestive and open to imaginative speculation. Her book engages with Victorian scientific texts, popular and specialist periodicals, and the work of leading midcentury novelists including Charles Dickens, Charlotte Bronte, Emily

Bronte William Makepeace Thackeray and Wilkie Collins Examining the work of William Harrison Ainsworth and Edward Bulwer Lytton Pratt Smith explores how Victorian novelists attributed magical qualities to electricity imbuing it with both the romance of the past and the thrill of the future She concludes with a case study of Benjamin Lumley's Another World which presents an enticing fantasy of electricity's potential based on contemporary developments Ultimately her book contends that writing and reading about electricity appropriated and expanded its imaginative scope transformed its factual origins and applications and contravened the bounds of literary genres and disciplinary constraints

### **Columbia Companion to**

**Twentieth-Century Philosophies** Constantin V. Boundas, 2007 Columbia Companion to Twentieth Century Philosophies is the first guide to cover both the Anglo American analytic and European continental traditions Organized thematically the volume thoroughly discusses the major movements and fields of each tradition and features the contributions of highly distinguished specialists in their fields This book is divided into three sections The first is devoted to highlighting the multidimensional work of philosophers identified with the analytic tradition with Nicholas Rescher writing on neoidealism Josephine Donovan commenting on feminist philosophy Tyler Burge discussing the philosophy of language and mind and Robert Hanna reflecting on Kant's legacy The second section presents the thought of those who identified themselves with the continental tradition featuring Jean Grondin on hermeneutics Leonard Lawlor on phenomenology Charles Scott on postmodernism and Babette Babich on the philosophy of science This volume also covers logical positivism naturalism pragmatism aesthetics existentialism Marxism the Frankfurt School structuralism psychoanalysis political philosophy ethics and the philosophy of religion The final section addresses concurrent trends in Indian Chinese Japanese and African philosophy and a comprehensive introduction by the editor not only provides a thorough outline of the problems and issues of the analytic and continental traditions but also boldly challenges the conviction that the two approaches must be rivals Columbia Companion to Twentieth Century Philosophies is an invaluable overview of the ideas that have shaped a monumentally important century in the history of philosophy offering an unusually panoramic perspective that allows readers to form their own interpretations of original materials
