W. Wu,2021-06-10 Due to the competitive edge it confers on students educational institutions and non English speaking nations in a globalized economy English as a medium of instruction EMI has been gaining popularity in tertiary education in non native English speaking NNEST countries Institute wide EMI implementation has often been imposed by top down decisions in combination with the optimistic view that the horse should always be placed before the cart However emerging evidence suggests that the delivery of such programs to NNEST students has led to new pedagogical challenges and learning problems that go beyond the scope of language learning and teaching and deserve immediate attention For example how would an instructor respond to situations in which students learning of content is compromised by their limited language proficiency This book draws on the current practice of EMI in diverse disciplines and university settings and examines how these new pedagogical and learning issues can be addressed The discussion also involves a reflection on the essence of EMI in relation to the use of the first language L1 as the medium of instruction in tertiary education In addition the book includes discussion about how to ensure and maintain the quality of EMI programs and assess the readiness of stakeholders for such programs which include administrators teachers and students The discussion is led by exemplars in Hong Kong and Taiwan where the majority of students are native Chinese speakers in the hope of developing

critical perspectives and practical guidelines as references for EMI in other NNES settings The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Interdisciplinary Strategies for English and Social Studies

Classrooms Joseph John Nowicki, Kerry F. Meehan, 1997 With today's growing emphasis on creating educational situations which are collaborative and inclusive particularly in junior and senior high schools there is a strong push to involve students in their learning to let them create their own understandings to encourage critical thinking and to increase student responsibility for their schooling And while there is much said in the literature about this point as theory this is one of the first hands on books to link theory with practice This terrific new resource is written in a very inviting style and format for teachers adjusting to the effects of inclusion and heterogeneity in classrooms and for teachers and administrators looking to break the barriers erected by subject area isolation in junior and senior high schools In it you get nearly 50 interdisciplinary

strategies to link social studies and English classes around common themes to provide the highest quality educational experiences for all students The authors identify the common strengths gained by sharing areas of study while maintaining the unique character and integrity of English and social studies classes To aid in lesson planning the authors identify subject and shared facts skills and concepts between English and social studies lessons and how these relate to theme They also identify obstacles to interdisciplinary activity because of perceived differences between English and social studies teachers and offer suggestions for overcoming those obstacles EPIE Materials Report ,1980
