**Scorched Earth** Rocky Barker, 2013-09-24 In 1988 forest fires raged in Yellowstone National Park destroying more than a million acres As the nation watched the land around Old Faithful burn a longstanding conflict over fire management reached a fever pitch Should the U S Park and Forest Services suppress fires immediately or allow some to run their natural course When should firefighters be sent to battle the flames and at what cost In *Scorched Earth* Barker an environmental reporter who was on the ground and in the smoke during the 1988 fires shows us that many of today s arguments over fire and the nature of public land began to take shape soon after the Civil War As Barker explains how the government responded to early fires in Yellowstone and to private investors in the region led ultimately to the protection of 600 million acres of public lands in the United States Barker uses his considerable narrative talents to bring to life a fascinating but often neglected piece of American history *Scorched Earth* lays a new foundation for examining current fire and environmental policies in America and the world Our story begins when the West was yet to be won with a colorful cast of characters a civil war general and his soldiers America s first investment banker railroad men naturalists and fire fighters all of whom left their mark on Yellowstone As the truth behind the creation of America s first national park is revealed we discover the remarkable role the U S Army played in protecting Yellowstone and shaping public lands in the West And we see the developing efforts of conservation s great figures as they struggled to preserve our heritage With vivid descriptions of the famous fires that have raged in Yellowstone the heroes who have tried to protect it and the strategies that evolved as a result Barker draws us into the very heart of a debate over our attempts to control nature and people This entertaining and timely book challenges the traditional views both of those who arrogantly seek full control of nature and those who naively believe we can leave it unaltered And it demonstrates how much of our broader environmental history was shaped in the lands of Yellowstone

**Disobeying Hitler** Randall Hansen, 2024-10-10 A chilling look at Nazi Germany in collapse Globe and Mail Excellent Evening Standard Fascinating Ben Macintyre Raze Paris to the ground Burn the bridges Destroy all industry These were just a few of the insane orders issued by Hitler in the closing months of the Second World War as the Allies made their unstoppable advance on Germany Had it not been for the determination and bravery of a few Germans officers and ordinary civilians who disobeyed Hitler Europe might have been a scorched ruin Many paid with their lives Might Rommel have opened the Western Front to the Allies on 20 July 1944 had he not been shot at a few days earlier Did Albert Speer single handedly prevent the destruction of bridges factories and towns Did a Prussian general save Paris In this compelling book distinguished historian Randall Hansen explores the extraordinary phenomenon of disobedience as resistance and its effect on both the war and its aftermath A gripping account of German resistance to Hitler's tyranny in the last year of World War Two in its 80th anniversary year

**Masters of Terror** Gerry Van Klinken, Richard Tanter, Desmond Ball, 2006-06-16 The terror campaign by pro Indonesian armed groups before during and after East Timor's independence referendum in 1999 was a blatant challenge to the international community as many of the acts of murder political intimidation destruction and mass deportation took place before the eyes of the world Yet still the ultimate responsibility has been denied and obscured Masters of Terror provides an authoritative analysis and documentation of the brutal operations carried out by the Indonesian army and its East Timorese allies The authors carefully assemble detailed accounts of the actions of the major Indonesian officers and East Timorese militia commanders accused of gross human rights violations This indispensable work explores a horrific frontal attack on democracy and calls for the establishment of an international tribunal for crimes against humanity in East Timor

**Final Solutions** Benjamin A. Valentino, 2013-01-19 Benjamin A Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society Mass killing in his view is a brutal political or military strategy designed to accomplish leaders most important objectives counter threats to their power and solve their most difficult problems In order to capture the full scope of mass killing during the twentieth century Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide Rather he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50 000 or more deaths within five years as a quantitative standard Final Solutions focuses on three types

of mass killing communist mass killings like the ones carried out in the Soviet Union China and Cambodia ethnic genocides as in Armenia Nazi Germany and Rwanda and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing

**Cosmopolitan Belongingness and War** Matthew Leep, 2021-05-01 In *Cosmopolitan Belongingness and War* Matthew Leep develops a cosmopolitan account of war that blends sharp inquiry into interspecies politics with original poetry on animals loss and war Informed by the works of Jacques Derrida this book is not only a somber and sobering exploration of the loss of animal lives during the Iraq War from the initial US invasion to later struggles with ISIS but also an imaginative tracing of animal experiences in spectral poetic moments By emphasizing elegies poetic space and multispecies belonging Leep envisions the cosmopolitan text as a hybrid form of critical and poetic engagement with animal others An insightful mix of cosmopolitan poetics poetry and analysis of the Iraq War in its multispecies entanglements *Cosmopolitan Belongingness and War* connects contemporary concerns with political violence memory and interspecies politics to imagine a more spectral posthumanist and poetic cosmopolitanism Interdisciplinary in scope this book will engage scholars of international relations political theory US foreign policy animal studies poetry and Derrida as well as those interested in human animal relations in perilous times

**Rainbow of Mysteries** Norman C. Habel, 2012 Have you ever wondered how you can connect with the sacred in nature or whether there is anything sacred in nature Has the Christian tradition obscured the sacredness of nature Is the Bible alive to the wonder of creation How can we sustain a sense of mystery and an appreciation of the sacred in nature In the biblical Flood narrative the rainbow was the sign of God s covenant promise to never again to destroy the Earth with ood waters The rainbow served to remind God of God s own bond with Earth My rainbow says Habel represents my covenant promise to explore my bonds with Earth my spiritual connections with creation Each colour represents an often overlooked aspect of creation and inspires the reader to consider our place in nature Using poetry and prose Norman Habel journeys deep into his personal experiences of the sacred in nature from his initial sense of alienation from Earth to his eventual homecoming Along the way he investigates seven wonders of nature and their spiritual dimensions or mysteries He explores biblical texts that praise or suppress creation and examines each mystery through the lens of ecology and his own experiences Ultimately his goal is to discern how to sustain each mystery and its spiritual dimension The book includes a suggested workshop outline and seven rites to explore mystery in nature
