Learning From Textbooks Bruce K. Britton, Arthur Woodward, Marilyn Binkley, 2012-11-12 It is surprising that there is so little research on textbooks given their centrality to teaching and learning in elementary and secondary schools Textbooks have become a focus of political and cultural controversy advocating a multicultural curriculum that has sparked some vigorous protests Research is absent in this debate therefore questions of legitimate knowledge the role of textbooks textbook design policy selection issues and economic issues concerning the marketplace are not part of the current debate Without insights of research on considerate text mentioning illustrations and so forth the current controversy will result in publishers responding to demands for more content not less thus textbooks will become compendia of information that on the surface satisfy everyone This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools and thus inform policymakers publishers and those involved in textbook selection Representing pure and applied approaches researchers present papers on the quality of writing the role of questions the role of pictures and illustrations and the role of auxiliary materials in the design of effective textbooks The chapters provide insight into research and its application to textbook design and improvement stimulating others to follow this lead Research Trends in Mathematics Teacher Education Jane-Jane Lo, Keith R. Leatham, Laura R. Van Zoest, 2014-05-28 Research on the preparation and continued development of mathematics teachers is becoming an increasingly important subset of mathematics education research Such research explores the attributes knowledge skills and beliefs of mathematics teachers as well as methods for assessing and developing these critical aspects of teachers and influences on teaching Research Trends in Mathematics Teacher Education focuses on three major themes in current mathematics teacher education research mathematical knowledge for teaching teacher beliefs and identities and tools and techniques to support teacher learning Through careful reports of individual research studies and cross study syntheses of the state of research in these areas the book provides insights into teachers learning processes and how these processes can be harnessed to develop effective teachers Chapters investigate bedrock skills needed for working with primary and secondary learners writing relevant problems planning lessons being attentive to student learning and illustrate how knowledge can be accessed assessed and nurtured over the course of a teaching career Commentaries provide context for current research while identifying areas deserving future study Included among the topics Teachers curricular knowledge Teachers personal and classroom mathematics Teachers learning journeys toward reasoning and sense making Teachers transitions in noticing Teachers uses of a learning trajectory as a tool for mathematics lesson planning A unique and timely set of perspectives on the professional development of

mathematics teachers at all stages of their careers Research Trends in Mathematics Teacher Education brings clarity and practical advice to researchers as well as practitioners in this increasingly critical arena **Innovative Curriculum Materials** ,1999 An Outline for Teaching Conservation in Urban Elementary Schools United States.
