House. Committee on Education and Labor. Subcommittee on Select Education,1979 Family Law, Gender and the State Alison Diduck,Felicity Kaganas,2012-02-07 The third edition of this work on family law comprising text cases and materials provides not only an explication of legal principle but also explores primarily from a feminist perspective some of the assumptions about and constructions of gender sexual orientation class and culture that underlie the law It examines the ideology of the family and in particular the role of the law in contributing to and reproducing that ideology Structured around the themes of equality welfare and family privacy the book aims to offer the benefits of a textbook while also giving students a wide ranging set of materials for classroom discussion As well as providing a firm grounding in family law the text sets the law in its social and historical context and encourages a critical approach by students to the subject It provides an ideal introduction to family law for undergraduates but will be equally helpful for postgraduate students of family law for whom it provides a challenging selection of materials set within a theoretical framework rich in ideas and arguments Review of the second edition Diduck and Kaganas examine legal developments to shed light on society principally by investigating the ways in which family law constructs and regulates family life and responsibilities Theirs is an important and ambitious book that aims ultimately at a feminist restatement of family law T he book is written and referenced in such depth that it is a useful resource for legal as well as social science researchers at all levels whether looking for theoretical inspiration or drawing up a literature review The range of diverse sources that Diduck and Kaganas draw on is impressive they seem to have included every bit of material that helps feminists make sense of family law There is a well pitched selection of further reading of such material at the end of each chapter What s more they undersell themselves by describing their book as Text Cases and Materials because they have woven by far the largest proportion of the cases and materials into the text Helen Reece Times Higher Education May 2007 Reviews of first edition A stimulating work which attempts to situate family law in its social historical and political context Its appeal should not be confined to family law students as its commitment to a critical and analytical approach offers insights and ideas with broader significance Mary Childs Child and Family Law Quarterly

Morewitz, 2004-05-31 DOMESTIC VIOLENCE AND MATERNAL CHILD HEALTH is one of the first books to evaluate the impact of intimate partner abuse on maternal and child health New abuse patterns against pregnant women and their unborn babies and children are described based on quantitative and qualitative findings from the Stalking and Violence Project SVP case studies from a clinical psychologist's private practice and a review of the literature See Appendix A Research Methods and Appendix B Study Results Tables 1-9 Intimate partner abuse is prevalent and can endanger the lives of pregnant women their fetuses and their children The long term societal impacts of violence are significant for the cycle of violence can be transmitted one from generation to the next Despite the research studies that have been conducted in this area little is known about the risk factors for partner abuse and the impact of that abuse on maternal child health and adult health More research needs to be

done about how nurses physicians social workers and therapists can better diagnose and treat partner violence during and after pregnancy Effective interventions by the police courts and legislators also need further investigation One of the central assumptions in this book is that partner abuse is a patterned set of behaviors developed by the batterer to exert power over women in intimate and non intimate relationships **Locked in A Violent Embrace** Zvi Eisikovits, Eli Buchbinder, 2000-04-15 Representing an entirely new approach to domestic violence interventions this book is based on data accumulated by the authors over the past 12 years from a series of qualitative studies clinical practice with battered women and their batterers and as champions of the cause of battered women After 25 years practitioners in the field are starting to question the original models of intervention Both types of practitioners and settings for service are expanding rapidly The approach advocated in this book is likely to become an important part of a new wave of alternatives available to practitioners in the coming years This accessible practical volume describes and analyzes the experience of violence in dyadic life by focussing on couples who choose to remain together in spite of violence while trying to make sense of a life in the shadow of pain guilt terror and humiliation **Treating Couples** Gerald R. Weeks, 2013-05-24 In some ways the development of the theory and practice of marital therapy seems like a relative newcomer to those clinicians who practice systems therapy Most of the books in the field stress the total family as the unit of treatment in terms of understanding the dynamics of family interactions and intervention techniques For the past 15 or 20 years clinicians interested in systems work sought training in family therapy programs and at family therapy workshops This training led to a dramatic shift in the practice of psychotherapy away from the individual as the unit of treatment to the family Much less emphasis has been given to the marital dyad or couple as the unit of treatment **Domestic Homicides and Death Reviews** Myrna Dawson, 2017-05-19 This edited collection highlights international research on domestic homicides and death reviews which are a rapidly growing intervention prevention initiative in various countries Chapters focus on the impetus for the international development of such initiatives the identification of risk factors and recommendations for improving systemic responses the uptake and impact of these recommendations and finally the social and public policy implications of outcomes for developed and developing countries Despite rapid growth the current state of research and knowledge about domestic violence death review initiatives is limited fragmented and primarily descriptive largely comprising annual public reports The authors of this book bridge this significant gap by analysing the wide range of models currently in development and operation A bold and important examination this work will have a powerful impact on policy makers and scholars of social science theory women's studies and domestic violence
