Security In The Information Age New Challenges New Strategies:

Security in the Information Age, 2002 **Security in the Information Age** United States. Congress. Joint Economic Committee, 2002 *Security in the Information Age* Robert F. Bennett, 2001-01-01 Over the years the Joint Economic Committee of the U S Congress has investigated a wide range of threats to the U S and its economy Following its June 2001 hearing entitled Wired World Cyber Security and the U S Economy it became clear that we needed to better understand an increasingly complicated set of diffuse security threats Senator Robert F Bennett volunteered to identify individuals whose perspectives about critical infrastructure protection would be of value to the Congress and compile a study This compendium represents a range of perspectives on infrastructure protection from definitions and strategies to business challenges and policy actions *Security In The Information Age New Challenges, New Strategies, Etc., May 2002*, 2002 National Security in the Information Age Emily O. Goldman, Silvio Pons, Federico Romero, 2004 This book examines how technology has affected national security focusing on issues such as definitions of peace and war the conduct of and military organization for war and the growing role of the private sector in providing security This is a *107-2 Hearing: Cyberterrorism: Is The Nation's Critical Infrastructure Adequately Protected?*, July 24, 2002, * , 2003 Cyberterrorism United States. Congress. House. Committee on Government Reform. Subcommittee on Government Efficiency, Financial Management, and Intergovernmental Relations, 2003 **Critical infrastructure protection significant challenges need to be addressed** , The United States General Accounting Office GAO presents a report entitled Critical Infrastructure Protection Significant Challenges in Developing National Capabilities published in April 2001 The report is for the Subcommittee on Technology Terrorism and Government Information of the Committee on the Judiciary for the U S Senate The report discusses the progress of the National Infrastructure Protection Center NIPC in developing national capabilities for analyzing cyber threat and vulnerability data and enhancing capabilities for responding to cyber attacks The New Millennium: Challenges and Strategies for a Globalizing World Sai Felicia Krishna-Hensel, 2017-11-22 This title was first published in 2000 An important look at the complexity of the challenges faced by the international system at the beginning of the new millennium The shape of the New World Order is being driven largely by forces unleashed through factors such as economic globalization and technological development The book emphasizes the importance of interdisciplinary analysis in order to understand the extent and diversity of the factors which condition the dynamics of this transformation Essential reading for students of human rights security finance and technology *Rethinking Leadership and "whole of Government" National Security Reform* Joseph R. Cerami, Jeffrey A. Engel, Army War College (U.S.). Strategic Studies Institute, 2010 On June 24 2009 The Bush School of Government and Public Service and The Scowcroft Institute of International Affairs at Texas A M University and the U S Army War College Strategic Studies Institute SSI conducted a conference on Leadership and Government Reform in Washington DC Two panels discussed Leader Development in Schools of Public Affairs and Leadership National

Security and Whole of Government Reforms The panelists and authors reflected on the nature of external internal and transnational threats to U S security and the need for changes in developing people organizations and institutions to more effectively efficiently and ethically improve the U S Government s capacity to address the need for change The authors in this book share the belief of many in the international and public affairs community that the world is changing in fundamental ways and our traditional models for understanding America s role do not appear to be working very well A new era of reform is needed for this new age In response panelists in their detailed remarks and subsequent papers offer suggestions to reform the United States national security system to meet 21st century threats while simultaneously developing the leaders who can implement a serious and broad scale reform agenda

Strategic Warfare in Cyberspace Gregory J. Rattray, 2001 A comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies In the information age information systems may serve as both weapons and targets Although the media has paid a good deal of attention to information warfare most treatments so far are overly broad and without analytical foundations In this book Gregory Rattray offers a comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies Rattray begins by analyzing salient features of information infrastructures and distinguishing strategic information warfare from other types of information based competition such as financial crime and economic espionage He then establishes a conceptual framework for the successful conduct of strategic warfare in general and of strategic information warfare in particular Taking a historical perspective he examines U S efforts to develop air bombardment capabilities in the period between World Wars I and II and compares them to U S efforts in the 1990s to develop the capability to conduct strategic information warfare He concludes with recommendations for strengthening U S strategic information warfare defenses

Handbook of Defence Politics Isaiah "Ike" Wilson III, James J.F. Forrest, 2011-03-28 Issues of defence politics and policy have long been at the forefront of political agendas and defining of international affairs However the dramatic changes to the global system that have taken place since the end of the Cold War and particularly since the terror attacks on the USA on 11 September 2001 have amplified the world s attention toward political and policy issues of national regional and global security The focus of this volume is on examining the fundamental causes of and defence policy responses to this new post 9 11 security environment Edited by Isaiah Ike Wilson III and James J F Forrest of the US Military Academy West Point USA this volume is international in scope with pieces written by experts in the field offering a collection of up to date and balanced insights on key contemporary issues of concern to defence policymakers The book will be an invaluable reference tool for academics and students researchers in international relations policymakers media professionals and government officials

Security in the Information Age, 2002 Compendium of papers solicited by Senator Bennett on protection of critical infrastructures against security threats Includes definitions strategies business challenges and policy actions

American Technology Policy J. D. Kenneth Boutin, 2012-12-31 Since the end of

the Cold War U S policymakers have faced the challenge of addressing the technological requirements of both economic competitiveness and national security Promoting the technological objectives of competitiveness and security poses a daunting task as these objectives can differ significantly in terms of autonomy the private sector s role and the time frame involved The difficulties inherent in meeting these competing needs for technological investment and resources are exacerbated by growing technological globalization American Technology Policy analyzes the ongoing efforts of politicians legislators policymakers and industry leaders to balance their often conflicting technological requirements J D Kenneth Boutin examines recent trends and developments in American technology policy as it strives to support high technology firms without undermining national security He then considers issues of autonomy relations between the federal government and industry and the time frame involved in formulating and implementing policy initiatives all in the context of globalization Though satisfying the ambitious American technological agenda is difficult it is impossible for authorities to avoid making the effort given the high stakes involved Boutin s analysis is intended to inform those who are charged with prioritizing and balancing the technological needs of national defense and economic growth Although the post Cold War technology policy of the United States has been characterized by efforts to achieve a balance between these two competing priorities the dominant focus remains on national security Boutin explains the ways in which American authorities seek to limit the extent of compromise necessary by working with local and foreign actors and by encouraging structural changes in the environment for technological development application and diffusion

Shaping American Military Capabilities after the Cold War

Richard Lacquement, 2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations
