The vision of ubiquitous computing and ambient intelligence describes a world of technology which is present anywhere anytime in the form of smart sensible devices that communicate with each other and provide personalized services However open interconnected systems are much more vulnerable to attacks and unauthorized data access In the context of this threat this book provides a comprehensive guide to security and privacy and trust in data management **Data Privacy and Trust in**

Cloud Computing Theo Lynn, John G. Mooney, Lisa van der Werff, Grace Fox, 2020-10-13 This open access book brings together perspectives from multiple disciplines including psychology law IS and computer science on data privacy and trust in the cloud Cloud technology has fueled rapid dramatic technological change enabling a level of connectivity that has never

been seen before in human history. However, this brave new world comes with problems. Several high profile cases over the last few years have demonstrated cloud computing's uneasy relationship with data security and trust. This volume explores the numerous technological processes and regulatory solutions presented in academic literature as mechanisms for building trust in the cloud, including GDPR in Europe. The massive acceleration of digital adoption resulting from the COVID-19 pandemic is introducing new and significant security and privacy threats and concerns. Against this backdrop, this book provides a timely reference and organising framework for considering how we will assure privacy and build trust in such a hyper-connected, digitally dependent world. This book presents a framework for assurance and accountability in the cloud and reviews the literature on trust, data privacy and protection, and ethics in cloud computing.
