Latchford,2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are At a time when interest in DNA and ancestry is exploding Frances Latchford questions the idea that knowing one s bio genealogy is integral to personal identity or a sense of family and belonging Upending our established values and beliefs about what makes a family *Steeped in Blood* examines the social and political devaluation of adoptive ties It takes readers on an intellectual journey through accepted wisdom about adoption twins kinship and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us sometimes violently to our

families Latchford exposes how our desire for bio genealogical knowledge understood as it is by family and adoption experts pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation Rejecting the idea that a love of the self same is fundamental to family bonds her book is a reaction to the wounds families suffer whenever they dare to revel in their difference A rejoinder to rhetoric that defines adoptees adoptive kin and their family intimacies as inferior and inauthentic Steeped in Blood s view through the lens of critical adoption studies decentres our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood

The Blood of the Colony Owen White, 2021-01-12 The surprising story of the wine industry s role in the rise of French Algeria and the fall of empire We owe to wine a blessing far more precious than gold the peopling of Algeria with Frenchmen stated agriculturist Pierre Berthault in the early 1930s In the last decades of the nineteenth century Europeans had displaced Algerians from the colony s best agricultural land and planted grapevines Soon enough wine was the primary export of a region whose mostly Muslim inhabitants didn t drink alcohol Settlers made fortunes while drawing large numbers of Algerians into salaried work for the first time But the success of Algerian wine resulted in friction with French producers challenging the traditional view that imperial possessions should complement not compete with the metropole By the middle of the twentieth century amid the fight for independence Algerians had come to see the rows of vines as an especially hated symbol of French domination After the war Algerians had to decide how far they would go to undo the transformations the colonists had wrought including the world s fourth biggest wine industry Owen White examines Algeria s experiment with nationalized wine production in worker run vineyards the pressures that resulted in the failure of that experiment and the eventual uprooting of most of the country s vines With a special focus on individual experiences of empire from the wealthiest Europeans to the poorest laborers in the fields The Blood of the Colony shows the central role of wine in the economic life of French Algeria and in its settler culture White makes clear that the industry left a long term mark on the development of the nation
