The Credit Monthly , 1923 [Disaster Safety Review](#) , 2004 **When Disaster Strikes** Louise Sperling, 2008 *Science Under Attack* Ralph B. Alexander, 2018-12-01 Evidence and logic are lacking in many areas of public debate today on hot button issues ranging from dietary fat to vaccination In *Science Under Attack* Dr Alexander shows how science is being abused sidelined or ignored making it difficult or impossible for the public to form a reasoned opinion about important issues Readers will learn why science is becoming more corrupt and also how it is being abused for political and economic gain support of activism or the propping up of religious beliefs To

illustrate how science is being ignored and abused the author examines six different issues and the way they are currently discussed evolution dietary fat climate change vaccination GMO crops and continental drift In his research he has gone back to the original source wherever possible rather than quoting second hand sources adding a degree of accuracy and nuance often missing The controversial assertion that science does not support the conventional wisdom on climate change should be of particular interest Alexander shows that the scientific evidence for a substantial human contribution to climate change is actually flimsy and he demonstrates the fallacy of comparing the strong link between smoking and lung cancer to the much weaker connection between human activity and global warming Seeds of disaster ...
