Chalmers,1996-05-09 What is consciousness How do physical processes in the brain give rise to the self aware mind and to feelings as profoundly varied as love or hate aesthetic pleasure or spiritual yearning These questions today are among the most hotly debated issues among scientists and philosophers and we have seen in recent years superb volumes by such eminent figures as Francis Crick Daniel C Dennett

Gerald Edelman and Roger Penrose all firing volleys in what has come to be called the consciousness wars Now in *The Conscious Mind* philosopher David J Chalmers offers a cogent analysis of this heated debate as he unveils a major new theory of consciousness one that rejects the prevailing reductionist trend of science while offering provocative insights into the relationship between mind and brain Writing in a rigorous thought provoking style the author takes us on a far reaching tour through the philosophical ramifications of consciousness Chalmers convincingly reveals how contemporary cognitive science and neurobiology have failed to explain how and why mental events emerge from physiological occurrences in the brain He proposes instead that conscious experience must be understood in an entirely new light as an irreducible entity similar to such physical properties as time mass and space that exists at a fundamental level and cannot be understood as the sum of its parts And after suggesting some intriguing possibilities about the structure and laws of conscious experience he details how his unique reinterpretation of the mind could be the focus of a new science Throughout the book Chalmers provides fascinating thought experiments that trenchantly illustrate his ideas For example in exploring the notion that consciousness could be experienced by machines as well as humans Chalmers asks us to imagine a thinking brain in which neurons are slowly replaced by silicon chips that precisely duplicate their functions as the neurons are replaced will consciousness gradually fade away The book also features thoughtful discussions of how the author's theories might be practically applied to subjects as diverse as artificial intelligence and the interpretation of quantum mechanics All of us have pondered the nature and meaning of consciousness Engaging and penetrating *The Conscious Mind* adds a fresh new perspective to the subject that is sure to spark debate about our understanding of the mind for years to come *Edinburgh Medical Journal*

condensed form judicial pronouncements by the superior courts of records as they relate to practice and procedures in civil litigation in Nigeria Judicial pronouncements on civil aspects of the law in Nigeria are on the increase rendering brief writing more challenging if not herculean in the absence of a resource guide for the citation of authorities and knowing which changes have taken place in the law For lawyers not to be taken by surprise in courts when issues relating to practice and procedures are raised without notice makes the need to have a resource book that should serve as a quick guide the more compelling This book is thus intended to be a reference guide *Resurrection: Faith or Fact?* Carl Stecher,Craig L.

Blomberg,2019-04-09 Is there enough evidence to believe Jesus rose from the dead or must such a judgment be based only on faith Can the resurrection story be considered a fact of history or should it be viewed as an ahistorical account Two renowned professors atheist Carl Stecher and Christian Craig Blomberg engage in a groundbreaking new debate on these very questions Other experts on the resurrection atheist Richard Carrier and Christian Peter S Williams comment on the

outcome Presenting new approaches to these centuries old questions and taking into account the latest scholarly research Resurrection Faith or Fact is a must have not only for all those following the resurrection question but also for those skeptics and Christians alike who are interested in determining for themselves the truth behind this foundational doctrine of the Christian faith     The Law Journal Reports Henry D. moral standards regarding what to do and how to be are not only objectively authoritative but essentially so. Rather than arising from personal schemes or collective ideals, morality flows from the nature of things. One of the principal aims of the book is to show how this view accommodates and explains a wide range of data concerning the metaphysical and normative dimensions of morality. Along the way, the book offers novel characterizations of moral realism and nonnaturalism, defends and explains the existence of substantive moral conceptual truths, supplies a new treatment of moral supervenience, substantiates the categoricity and importance of moral reasons, and presents a strategy for identifying the source of morality. Exemplifying a commitment to the integrity of moral philosophy, *The Moral Universe* also tackles fundamental issues in value theory and normative ethics in the service of developing a systematically potent version of nonnaturalist realism.

**Quality Control in Fact-Finding** Morten Bergsmo, 2013-11-16. This book discusses how fact-finding mechanisms for alleged violations of international human rights, humanitarian and criminal law can be improved. There has been a significant increase in the use of international, internationalised and domestic fact-finding mechanisms since 1992, including by the United Nations human rights system, international commissions of inquiry, truth and reconciliation commissions, and NGOs. They are analysed and assessed in detail by 19 authors under the common theme *Quality Control in Fact-Finding*. The authors include Richard J. Goldstone, Martin Scheinin, Liu Daqun, Charles Garraway, David Re Simon, De Smet FAN, Yuwen Isabelle, Lass e WU Xiaodan, Dan Saxon, Chris Mahony, Dov Jacobs, Catherine Harwood, Lyal S. Sunga, Wolfgang Kaleck, Carolijn Terwindt, Ilia Utmelidze, and Marina Aksenova. Serge Brammertz has written the Preface and LING Yan a Foreword. The book emphasises quality awareness and improvement in non-criminal justice fact work. This quality control approach recognises, inter alia, the importance of leadership in fact-finding mechanisms, the responsibility of individual fact-finders to continuously professionalise, and the need for fact-finders to be mandate-centred. It is an approach that invites the consideration of how the quality of every functional aspect of fact-finding can be improved, including work processes to identify, locate, obtain, verify, analyse, corroborate, summarise, synthesise, structure, organise, present and disseminate facts. The book also considers regulatory approaches to enhance quality and professionalisation.
