Seeing Statistics Cd Rom:

Seeing Statistics CD-ROM Gary H. McClelland, 2002-12 Seeing statistics is a new approach to teaching and learning about statistics using the World Wide Web *Proceedings of a Workshop on Statistics on Networks (CD-ROM)* National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Applied and Theoretical Statistics, 2007-12-18 A large number of biological physical and social systems contain complex networks Knowledge about how these networks operate is critical for advancing a more general understanding of network behavior To this end each of these disciplines has created different kinds of statistical theory for inference on network data To help stimulate further progress in the field of statistical inference on network data the NRC sponsored a workshop that brought together researchers who are dealing with network data in different contexts This book which is available on CD only contains the text of the 18 workshop presentations The presentations focused on five major areas of research network models dynamic networks data and measurement on networks robustness and fragility of networks and visualization and scalability of networks *Statistics for Management and Economics* Gerald Keller, Brian Warrack, 2003 STATISTICS FOR MANAGEMENT AND ECONOMICS is the worldwide best selling business statistics text It is currently being used at hundreds of colleges and universities throughout the world This text teaches students how to apply statistics to real business problems through the authors unique three step approach to problem solving Students learn to IDENTIFY the right technique by focusing on the relationship between the problem and data type They then learn to COMPUTE the answer either by hand using Excel or using MINITAB Finally they INTERPRET the results in the context of the problem This approach enhances student comprehension as well as practical skills and offers maximum flexibility to instructors wishing to teach concepts by hand or with the computer or by using both hand and computer methods *Statistical Literacy at School* Jane M. Watson, 2013-05-13 This book reveals the development of students understanding of statistical literacy It provides a way to see student thinking and gives readers a deeper sense of how students think about important statistical topics Intended as a complement to curriculum documents and textbook series it is consistent with the current principles and standards of the National Council of Teachers of Mathematics The term statistical literacy is used to emphasize that the purpose of the school curriculum should not be to turn out statisticians but to prepare statistically literate school graduates who are prepared to participate in social decision making Based on ten years of research with reference to other significant research as appropriate the book looks at students thinking in relation to tasks based on sampling graphical representations averages chance beginning inference and variation which are essential to later work in formal statistics For those students who do not proceed to formal study as well as those who do these concepts provide a basis for decision making or questioning when presented with claims based on data in societal settings Statistical Literacy at School Growth and Goals establishes an overall framework for statistical literacy in terms of both the links to specific school curricula and the wider

appreciation of contexts within which chance and data handling ideas are applied demonstrates within this framework that there are many connections among specific ideas and constructs provides tasks adaptable for classroom or assessment use that are appropriate for the goals of statistical literacy presents extensive examples of student performance on the tasks illustrating hierarchies of achievement to assist in monitoring gains and meeting the goals of statistical literacy and includes a summary of analysis of survey data that suggests a developmental hierarchy for students over the years of schooling with respect to the goal of statistical literacy

Statistical Literacy at School Growth and Goals is directed to researchers curriculum developers professionals and students in mathematics education as well those across the curriculum who are interested in students cognitive development within the field to teachers who want to focus on the concepts involved in statistical literacy without the use of formal statistical techniques and to statisticians who are interested in the development of student understanding before students are exposed to the formal study of statistics
