Seeking New Horizons A Perceptual Approach To Geographic Education:

Seeking New Horizons Henry W. Castner, 1990-04-01 Castner developed this innovative perspective on geographic education through observation of the Orff Schulwerk technique of music education This pedagogical method provides an organizational framework within which the primitive elements and concepts of music can be introduced experienced and explored and auditory discrimination developed The process of improvisation is the focal point of the Schulwerk Castner suggests that the numerous educational benefits of improvisation can be obtained in geographic education by the process of mapping He defines mapping as graphic description analysis and presentation in a problem solving context After more than two decades of research in cartographic communication Castner concludes that success in examining and analysing landscapes and images representative of them is dependant upon developed skills in visual discrimination Seeking New Horizons describes a rationale for linking basic visual discriminations to their logical extensions in the concepts that are fundamental to geographic thinking thus providing challenging approaches to developing spatial awareness graphic literacy and geographic understanding In addition Castner identifies eight basic concepts which would allow students and teachers to work interactively with spatial information and over time with increasingly complex and sophisticated tools and at increasingly abstract levels of generalization

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

Learning and Teaching with Maps Patrick Wiegand, 2006-01-31 A comprehensive and authoritative account of how primary school children and teachers can use maps to enhance learning and deepen understanding of this essential skill It includes all aspects of map use such as reading and interpreting maps and using maps to find the way covering maps of all scales including globes and atlases The text is extensively illustrated with examples including maps made by children themselves using conventional materials as well as computer software A particular feature of the book is the integration of digital and conventional mapping and Internet and CD ROM cartography together with simple applications of Geographic Information Systems GIS appropriate to the needs of children right through primary and secondary education This book will be of great use to all primary teachers and subject

teachers in secondary school as well as non specialist geography teachers and will enable children to use all types of maps in new compelling and thoughtful ways

The Child's World Margaret Robertson, Rodney Gerber, 2000 Young people who live most of their lives in the 21st century face dilemmas hardly experienced in the 20th century world the rapid compression of space and time an unprecedented rate of cultural and technological change the dissolution of many traditional boundaries Already children live in a world unknown to us in our childhood they surf the net play virtual games and interact with cyberspace What skills are required to help children navigate these very different spaces How

The Power of Maps Denis Wood, John Fels, 1992-01-01 This volume ventures into terrain where even the most sophisticated map fails to lead through the mapmaker's bias Denis Wood shows how maps are not impartial reference objects but rather instruments of communication persuasion and power Like paintings they express a point of view By connecting us to a reality that could not exist in the absence of maps a world of property lines and voting rights taxation districts and enterprise zones they embody and project the interests of their creators Sampling the scope of maps available today illustrations include Peter Gould's AIDS map Tom

Van Sant's map of the earth U S Geological Survey maps and a child's drawing of the world THE POWER OF MAPS was published in conjunction with an exhibition at the Cooper Hewitt Museum the Smithsonian Institution's National Museum of Design

Map Projections Erik W. Grafarend, Rey-Jer You, Rainer Syffus, 2014-09-11 In the context of Geographical Information Systems GIS the book offers a timely review of Map Projections The first chapters are of foundational type We introduce the mapping from a left Riemann manifold to a right one specified as conformal equiareal and equidistant perspective and geodetic In particular the mapping from a Riemann manifold to a Euclidean manifold plane and the design of various coordinate systems are reviewed A speciality is the treatment of surfaces of Gaussian curvature zero The largest part is devoted to the mapping the sphere and the ellipsoid of revolution to tangential plane cylinder and cone pseudo cone using the polar aspect transverse as well as oblique aspect Various Geodetic Mappings as well as the Datum Problem are reviewed In the first extension we introduce optimal map projections by variational calculus for the sphere respectively the ellipsoid generating harmonic maps The second extension reviews alternative maps for structures namely torus pneu hyperboloid cooling tower paraboloid parabolic mirror onion shape church tower as well as clothoid Hight Speed Railways used in Project Surveying Third we present the Datum Transformation described by the Conformal Group C_{10}^3 in a threedimensional Euclidean space a ten parameter conformal transformation It leaves infinitesimal angles and distance ratios equivariant Numerical examples from classical and new map projections as well as twelve appendices document the Wonderful World of Map Projections
