Seeking Success in E-Business Kim Viborg Andersen, Steve Elliot, Paula M.C. Swatman, E.M. Trauth, Niels Bjørn-Andersen, 2013-06-29 In the foreword to this volume of conference proceedings for IFIP Working Group 8.4 it is appropriate to review the wider organization to which the Working Group belongs. The International Federation of Information Processing (IFIP) is a non-governmental non-profit umbrella organization for national societies working in the field of information processing that was established in 1960 under the auspices of UNESCO. IFIP's mission is to be the leading truly international apolitical organization which encourages and assists in the development, exploitation and application of Information Technology for the benefit of all people. At the heart of IFIP lie its Technical Committees that between them count on the active participation of some two thousand people world wide. These Groups work in a variety of ways to share experience and to develop their specialised knowledge. Technical Committees include TC 1 Foundations of Computer Science, TC 2 Software Theory and Practice, TC 3 Education, TC 6 Communication Systems, TC 7 System Modelling and Optimization, TC 9 Relationship between Computers and Society, TC 11 Security and Protection in Information Processing Systems, TC 12 Artificial Intelligence and TC 13 Human Computer Interaction. The IFIP website www.ifip.org has further details. Technical Committee 8 (TC8) is concerned with Information Systems in organisations. Within TC8 there are different Working Groups focusing on particular aspects of Information Systems. *Global Electronic Business Research: Opportunities and Directions* Al-Qirim, Nabeel, 2005-12-31 This book discusses the progress of e-commerce research in small to medium sized enterprises in different countries in the world. DeGross, 2006-04-11 Information Systems Research: Relevant Theory and Informed Practice comprises the edited proceedings of the WG8.2 conference Relevant Theory and Informed Practice: Looking Forward from a 20 Year Perspective on IS Research which was sponsored by IFIP and held in Manchester, England, in July 2004. The conference attracted a record number of high quality manuscripts, all of which were subjected to a rigorous reviewing process in which four to eight track chairs, associate editors and reviewers thoughtfully scrutinized papers by the highly regarded as well as the newcomers. No person or idea was considered sacrosanct and no paper made it through this process unscathed. All authors were asked to revise the accepted papers, some more than once, thus good papers got better. With only 29 percent of the papers accepted, these proceedings are significantly more selective than is typical of many conference proceedings. This volume is organized in 7 sections with 33 full research papers providing panoramic views and reflections on the Information Systems (IS) discipline, followed by papers featuring critical interpretive studies, action research, theoretical perspectives on IS.
