The Routledge Handbook of the Bioarchaeology of Human Conflict Christopher Knüsel, Martin Smith, 2013-12-17 If human burials were our only window onto the past what story would they tell Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine Warfare is often described as senseless and as having no place in society Consequently its place in social relations and societal change remains obscure The studies in The Routledge Handbook of the Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the remains of past people themselves in order to explore the social contexts in which such injuries were inflicted A broadly chronological approach is taken from prehistory through to recent conflicts however this book is not simply a catalogue of injuries illustrating weapon development or a narrative detailing progress in warfare but rather provides a framework in which to explore both continuity and change based on a range of important themes which hold continuing relevance throughout human development

The Poetics of Processing Anna J. Osterholtz, 2020-12-01 In 2002 Neil Whitehead published *Dark Shamans* Kanim and the Poetics of Violent Death in which he applied the concept of poetics to the study of violence and observed the power of violence in the creation and expression of identity and social relationships The Poetics of Processing applies Whitehead's theory on violence to mortuary and skeletal assemblages in the Andes Mexico the US Southwest Jordan Ethiopia Egypt and Turkey examining the complex cultural meanings of the manipulation of remains after death The contributors interpret postmortem treatment of the physical body through a poetics lens examining body processing as a mechanism for the re creation of cosmological events and processing

s role in the creation of social memory They analyze methods of processing and the ways in which the living use the physical body to stratify society and gain power as evidenced in rituals of body preparation and burial around the world objects buried with the dead and the hierarchies of tomb occupancy the dissection of cadavers by medical students the appropriation of living spaces once occupied by the dead and the varying treatments of the remains of social outsiders prisoners of war and executed persons The Poetics of Processing combines social theory and bioarchaeology to examine how the living manipulate the bodies of the dead for social purposes These case studies ranging from prehistoric to historic and modern and from around the globe explore this complex material relationship that does not cease with physical death This volume will be of interest to mortuary archaeologists bioarchaeologists and cultural anthropologists Contributors Dil Singh Basanti Roselyn Campbell Carlina de la Cova Eric Haanstad Scott Haddow Christina Hodge Christopher Knusel Kristin Kuckelman Clark Spencer Larsen Debra Martin Kenneth Nystrom Adrienne Offenbecker Megan Perry Marin Pilloud Beth K Scaffidi Mehmet Somel Kyle D Waller

Becoming Villagers Matthew S. Bandy, Jake R. Fox, 2010-12-15 The shift from mobile hunting and gathering to more sedentary usually agricultural lifeways was one of the most significant milestones in the prehistory of humanity This transformation was spurred by an alignment of social and ecological forces pressures and adaptations and it took place in broadly comparable ways in many prehistoric settings Based on a Society for American Archaeology symposium and subsequent Amerind Advanced Seminar in 2006 *Becoming Villagers* examines this transformation at various places and times across the globe by focusing not on the origins of agriculture and village life but rather on their consequences The goal of the volume is to identify regularities in the ways that societies developed in the centuries and millennia following a transition to village life Using cases that range from China to Bolivia and from the Near East to the American Southwest leading archaeologists situate their specific areas of specialization in a broad comparative context They consider the forces acting to divide and fragment early villages and the social technologies and practices by which those obstacles were in some cases overcome Finally the volume examines the long term historical trajectories of these early village societies This transformative collection makes a powerful case for a renewed and invigorated archaeological focus on large scale comparative studies It will be an essential read for anyone interested not only in early village societies but also in the ways in which archaeology relates to anthropology other social sciences and history

Abundance Monica L. Smith, 2017-06-15 Using case studies from around the globe including Mesoamerica North and South America Africa China and the Greco Roman world and across multiple time periods the authors in this volume make the case that abundance provides an essential explanatory perspective on ancient peoples choices and activities Economists frequently focus on scarcity as a driving principle in the development of social and economic hierarchies yet focusing on plenitude enables the understanding of a range of cohesive behaviors that were equally important for the development of social complexity Our earliest human ancestors were highly mobile hunter gatherers who sought out places that provided ample food water and raw materials Over time humans accumulated and displayed an increasing quantity and variety of goods In households shrines tombs caches and dumps archaeologists have discovered large masses of materials that were deliberately gathered curated distributed and discarded by ancient peoples The volume s authors draw upon new economic theories to consider the social ideological and political implications of human engagement with abundant quantities of resources and physical objects and consider how individual and household engagements with material culture were conditioned by the quest for abundance Abundance shows that the human propensity for mass consumption is not just the result of modern production capacities but fulfills a longstanding focus on plenitude as both the assurance of well being and a buffer against uncertainty This book will be of great interest to scholars and students in economics anthropology and cultural studies Contributors Traci Ardren Amy Bogaard Elizabeth Klarich Abigail Levine Christopher R Moore Tito E Naranjo Stacey Pierson James M Potter Francois G Richard Christopher W Schmidt Carol Schultze Payson Sheets Monica L Smith Kathryn C Twiss Mark D Varien Justin St P Walsh Mar a Nieves Zede o **Puebloan Societies** Peter M.
