**Current History**, 1922      *The annals of Newberry : in two parts* John Belton O'Neill, 1892-01-01      *Ben Franklin Stilled the Waves* Charles Tanford, 1989 Benjamin Franklin was the first to report the phenomenon of oil's power to still troubled waters and to speculate on why it happened A century later Lord Rayleigh

performed an identical experiment Irving Langmuir did it with minor variations in 1917 and won a Nobel Prize for it Then Langmuir's work was followed by a Dutch pediatrician in 1925 p Each experimenter saw a little more in the result than his predecessor had seen and the sciences of physics chemistry and biology have all been illuminated by the work p Charles Tanford reflects on the evolving nature of science and of individual scientists Recounting innovations in each trial he follows the classic experiment from Franklin's drawing room to our present day institutionalized scientific establishments and speculates on the ensuing changes in our approach to scientific inquiry [Information Service](#) National Council of the Churches of Christ in the United States of America. Goicoechea, 2013-03-13 Goicoechea explains Nietzsche's thesis that the agapeic love of Jesus is humankind's highest affirmation even for sinners like the author's father Joe Goicoechea who lived it out existentially Already before the Q scholars Nietzsche saw this love as the essence of the Sermon on the Mount and based his philosophy upon it Throughout the Catholic tradition agape fulfilled the affection of Empedocles the eros of Plato the friendship of Aristotle and the agape of Plotinus While as Anders Nygren shows modernists protested such syntheses now postmodernists once again let agape and the four loves contribute to one another *Scarcity and Frontiers* Edward B. Barbier, 2010-12-23 Throughout much of history a critical driving force behind global economic development has been the response of society to the scarcity of key natural resources Increasing scarcity raises the cost of exploiting existing natural resources and creates incentives in all economies to innovate and conserve more of these resources However economies have also responded to increasing scarcity by obtaining and developing more of these resources Since the agricultural transition over 12 000 years ago this exploitation of new frontiers has often proved to be a pivotal human response to natural resource scarcity This book provides a fascinating account of the contribution that natural resource exploitation has made to economic development in key eras of world history This not only fills an important gap in the literature on economic history but also shows how we can draw lessons from these past epochs for attaining sustainable economic development in the world today
