Sauter, 2021-06-06 This book explores the main currents of European thought between 1350 and 1992 which it approaches in two principal ways culture as produced by place and the progressive unmooring of thought from previously set religious and philosophical boundaries The book reads the period against spatial thought s history spatial sciences such as geography or Euclidean geometry to argue that Europe cannot be understood as a continent in intellectual terms or its history organized with respect to traditional spatial geographic categories Instead we need to understand European intellectual history in terms of a culture that defined its own place as opposed to a place that produced a given culture It then builds on this idea to argue that Europe s overweening drive to know more about humanity and the cosmos continually breached the boundaries set by venerable religious and philosophical traditions In this respect spatial thought foregrounded the human at the unchanging s expense with European thought slowly becoming unmoored as it doggedly produced knowledge at wisdom s expense Michael J Sauter illustrates this by pursuing historical themes across

different chapters including European thought s exit from the medieval period the Renaissance the Reformation the Scientific Revolution the Enlightenment and Romanticism the Industrial Revolution and war and culture offering a thorough overview of European thought during this period The book concludes by explaining how contemporary culture has forgotten what early modern thinkers such as Michel de Montaigne still knew namely that too little skepticism toward one s own certainties makes one a danger to others Offering a comprehensive introduction to European thought that stretches from the late fourteenth to the late twentieth century this is the perfect one volume study for students of European intellectual history *Catalogue of Title Entries of Books and Other Articles Entered in the Office of the Register of Copyrights, Library of Congress, at Washington, D.C.* Library of Congress. Copyright Office,1948 *Faith* Tony Hassall,2023-09-07 Faith Reason to Believe is a unique book seeking to restore faith in a power greater than ourselves using logic and reason rather than religious dogma The author laments the decline in faith especially Christian faith where modern day acceptance of anything goes has been accompanied by a fall in moral standards depression and despair as well as threatening the survival of our western civilisation The book explains how atheism is irrational and is just another religion It is critical of relativism and environmentalism that have become part of the atheist dogma in particular the current obsession with climate change The author is also critical of religions that use fear based tactics to maintain their followers and explains how one can determine truth from falsehood in religious teaching The book connects the Eastern doctrine of karma with the Christian Golden Rule that we should treat others the way we would like to be treated and explains how all natural laws of morality can be derived from these moral anchors The author explains how faith can give your life meaning enable you to live a happier and more fulfilled life and may make you a better person **El-Hi Textbooks in Print** ,1982 **A Guide to Technical Writing** William George Crouch,Robert L. Zetler,1954 **Books in Series, 1876-1949: Authors** ,1982 *Hamlet* William Shakespeare,1946 **Traditional British Ballads** ,1955 **Traditional British Ballads** Bartlett Jere Whiting,1955
