

Map of the Silk Roads

The Silk Roads

The silk roads include the land silk routes and maritime silk routes. The silk road (the land silk road) was a vast network of trade routes that spanned the entire continent of Asia from China's Chang'an, connecting parts of north Africa and the Mediterranean sea area.

The maritime silk road spreads outward from the South China Sea, with several branches connecting North Korea, Japan, Ryukyu, and other countries in today's Indochina Peninsula, Southeast Asian coastal islands, South Asia, Central and Western Asia, North Africa, and Europe.

Silk In Africa A Region At Risk:

The Investment Opportunities and Risks of the Belt and Road Initiative Fan Zhang, Lisa Zhang, 2023-08-23 The Belt and Road Initiative BRI is an ambitious infrastructure construction program designed and financially supported by the Chinese government. It spans the globe and is active in about 150 countries, affecting the international order, government policies, and ordinary people's daily lives. The BRI uses a version of China's domestic development model set in an international environment. Using a wealth of documents, cases, multi-country input-output models, and a project database created by the authors, this book provides a complete picture of the BRI, its benefits, risks, and implications. The book explores the institutional roots of the problems of the BRI, including debt problems, and argues that the debt problem is a soft budget constraint problem and discusses the redesign and reorganising of its future versions. This book aims to help policymakers, researchers, students, and everyone interested in political science, economics, and country-specific research to understand and rethink the advantages and risks of the BRI.

Geopolitical Risks in Europe and the Indo-Pacific Region Sang Chul Park, Yun-Chen Lai, 2025-06-25 This book explores the geopolitical risks in Europe and the Indo-Pacific region and interaction between the two regions in the rapidly changing global political landscape. The book explores the reasons for Europe extending its reach and engagement in the Indo-Pacific region and the Indo-Pacific region increasing its ties with Europe. The book goes on to consider the impact and implications of these engagements on the global order, analyzing cases of potential geopolitical risks brought on by EU-India relations, EU-China relations, EU-Peru-China relations, EU in the Sino-Philippine territorial disputes, and EU's role in North Korean Nuclear matters. The book would be a valuable read for scholars of international relations and politics, policymakers, and those interested in the interactions between the two regions.

A New Era of Risk David Morris, 2025-01-24 China is at the centre of a perfect storm of new risks to the global system, international economy, and climate. Yet the author argues that the West's binary geopolitical and geoeconomic thinking is catastrophizing risks and simultaneously failing to develop adequate responses to the complexity of the disruptions underway. The book draws upon a wide range of research, interviews with international experts, stakeholders, and practitioners to comprehend the rise of China in an important series of case studies and points to the need for a new sustainable internationalism that proportionately manages risks and builds interdependence rather than driving binary conflict. The concept of sustainable internationalism draws on confidence in Asia that a new cooperative security and globalization can be achieved, such as argued by Kishore Mahbubani, Stephen Roach, and others. The book presents important new political risk research on diverse case studies of China's new forms of interdependence from an multilateral institution, the Asian Infrastructure Investment Bank, and a communications technology firm, Huawei, to Belt and Road infrastructure projects in South East Asia and across Eurasia.

Security and Safety in the Era of Global Risks Radomir Compel, Rosalie Arcala-Hall, 2021-07-28 The concept of risk in global life has not been fully understood and explored, and this book attempts to examine what it entails in the fast

changing interconnected and complex world As a foundational component of safety systems risk has been considered relatively simple predictable and therefore assessable and manageable phenomenon Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival Risk has become more human made and intentional today and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions

Regional Mutual Benefit and Win-win Under the Double Circulation of Global Value Wei Liu,Hui Zhang,2019-06-29 The book offers an in depth research of the economic situations along the Belt and Road and the initiative s cooperation prospects opportunities and challenges It draws on economic data including those on trade investment infrastructure urban distribution industrial cooperation financial integration and revision of historical and political background The Belt and Road initiative BRI comes from not only the ancient Silk Road but also a long term international cooperation between China and relevant countries As a China led initiative the BRI is built upon China s international vision according to its development process Therefore the book also discusses how China balances its own development process among different domestic regions and how the Initiative fits into the changes of global economic system and brings positive change for developing and developed economies involved on the long haul Furthermore this book aims to find out precise direction of the initiative in order to assess appropriate implication on development under current globalization and provide valuable experience for future economic synergetic development by reviewing the past cooperative experience as references for policy making and prospective engagement In terms of methodology analyses were conducted applying multi methods with best available evidence to enrich the understanding of the potential of the BRI in terms of socio economic impact on cooperation and difference and similarities of economic cultural characteristics and political system among countries

China's BRI in Different Regions of the World Sanjeev Kumar,2023-06-02 China s Belt and Road Initiative BRI is completing a decade There have been varied responses to the Initiative from countries and regions besides the emergence of alternative initiatives and narratives This sets the stage for evaluating the robustness of the Initiative its implementation as well as its implications from the perspective of individual countries and regions across the globe This book begins by examining China s domestic economic maritime and strategic interests as drivers for the Initiative BRI has been analysed in country specific regional and continental contexts It brings out the experiences and responses from South Asia Eurasia East Asia Southeast Asia the Arab world Latin America the Caribbean as well as from Europe and Africa Further BRI has been studied in the larger context of the US China competition The final section explores BRI in the context of the twin challenges of recent times i e the pandemic and Russia Ukraine conflict The book concludes with an epilogue which outlines the broad trends related to BRI that have emerged from this study of ICWA

Health-Related Emergency Disaster Risk Management (Health-EDRM) Emily Ying Yang Chan ,Holly Ching Yu Lam,2020-12-29 Disasters such as earthquakes cyclones floods heat waves nuclear accidents and large scale pollution

incidents take lives and cause exceptionally large health problems. The majority of large scale disasters affect the most vulnerable populations which are often comprised of people of extreme ages in remote living areas with endemic poverty and with low literacy. Health related emergency disaster risk management Health EDRM 1 refers to the systematic analysis and management of health risks surrounding emergencies and disasters. It plays an important role in reducing hazards and vulnerability along with extending preparedness response and recovery measures. This concept encompasses risk analyses and interventions such as accessible early warning systems, timely deployment of relief workers and the provision of suitable drugs and medical equipment to decrease the impact of disaster on people before, during and after disaster events. Disaster risk profiling and interventions can be at the personal, household, community and system political levels; they can be targeted at specific health risks including respiratory issues caused by indoor burning, re-emergence of infectious disease due to low vaccination coverage and gastrointestinal problems resulting from unregulated waste management. Unfortunately, there has been a major gap in the scientific literature regarding Health EDRM. The aim of this Special Issue of IJERPH was to present papers describing reporting the latest disaster and health risk analyses as well as interventions for health related disaster risk management in an effort to address this gap and facilitate major global policies and initiatives for disaster risk reduction.

CHINA IN INDIAN OCEAN REGION Dr. Sidda Goud, Manisha Mookherjee, 2015-02-28. This edited book is the outcome of the International Conference on China in Indian Ocean Region held on 13th-14th November 2014 organized by UGC Centre for Indian Ocean Studies, Osmania University, Hyderabad. Indian Ocean, third largest ocean in the world, surpasses the Atlantic and Pacific Oceans as the world's largest and most strategically significant trade corridor. Indian Ocean Region (IOR) which is surrounded by Africa, Asia and Australia, serves as a maritime highway linking trans-continental human and economic relationships. Being the world's most populated region, one-third of the world's bulk cargo and around two-thirds of world's oil ship tankers pass through it. China's interest in the Indian Ocean Region (IOR) can be traced back to the early 1960s. Ever since, Beijing has been increasingly deepening its presence in the IOR for a variety of reasons: oil trade security, etc. Over 30 per cent of China's seaborne trade worth about US 300 billion transits across IOR. Sharing a quarter of the world's population, China faces ever-increasing demand for energy. China has little choice but to look beyond its borders for its energy needs. About 77 per cent of its oil imports are sourced from West Asia and Africa and these are transported through the Indian Ocean. Thus, China's dependence on the Indian Ocean continues to grow for energy imports from the Gulf to import resources from Africa and trade with Europe. With China steadily spreading its footprints in the Indian Ocean Region with increasing military presence and with the rapidly growing Navy being equipped with warships, destroyers and nuclear submarines, this book analyses in depth growing Chinese influence in Indian Ocean Region (IOR). Geopolitical interests of China, Security and Economic implication for India. This volume will be of considerable interest to the students and scholars of international relations in the contemporary situation.
