Alexander,2000-01-01 The Museum in America captures the life stories of thirteen visionary museum leaders who helped transform the 19th century s collection of curios into today s institution of public service and education In the lively style of Museum Masters Alexander recounts the stories of pioneers in American history science art and general museums For anyone interested in the history of the museum this volume is the place to start **Why the Museum Matters** Daniel H. Weiss,2022-11-29 A powerful reflection on the universal art museum considering the values critical to its history and anticipating its evolving place in our cultural future Art museums have played a vital role

in our culture drawing on Enlightenment ideals in shaping ideas advancing learning fostering community and providing spaces of beauty and permanence In this thoughtful and often personal volume Daniel H Weiss contemplates the idea of the universal art museum alongside broad considerations about the role of art in society and what defines a cultural experience The future of art museums is far from secure and Weiss reflects on many of the difficulties these institutions face from their financial health to their collecting practices to the audiences they engage to ensuring freedom of expression on the part of artists and curators In grappling with these challenges Weiss sees a solution in shared governance His tone is one of optimism as he looks to a future where the museum will serve a greater public while continuing to be a steward of culture and a place of discovery discourse inspiration and pleasure This poignant questioning and affirmation of the museum explores our enduring values while embracing the need for change in a rapidly evolving world *Museums and American Intellectual Life, 1876-1926* Steven Conn, 1998 Conn's study includes familiar places like the Metropolitan Museum of Art and the Academy of Natural Sciences but he also draws attention to forgotten ones like the Philadelphia Commercial Museum once the repository for objects from many turn of the century world's fairs What emerges from Conn's analysis is that museums of all kinds shared a belief that knowledge resided in the objects themselves Using what Conn has termed object based epistemology museums of the late nineteenth century were on the cutting edge of American intellectual life By the first quarter of the twentieth century however museums had largely been replaced by research oriented universities as places where new knowledge was produced According to Conn not only did this mean a change in the way knowledge was conceived but also and perhaps more importantly who would have access to it **Rogues' Gallery** Michael Gross, 2010-05-11 Behind almost every painting is a fortune and behind that a sin or a crime With these words as a starting point Michael Gross leading chronicler of the American rich begins the first independent unauthorized look at the saga of the nation's greatest museum the Metropolitan Museum of Art In this endlessly entertaining follow up to his bestselling social history 740 Park Gross pulls back the shades of secrecy that have long shrouded the upper class's cultural and philanthropic ambitions and maneuvers And he paints a revealing portrait of a previously hidden face of American wealth and power The Metropolitan Gross writes is a huge alchemical experiment turning the worst of man's attributes extravagance lust gluttony acquisitiveness envy avarice greed egotism and pride into the very best transmuting deadly sins into priceless treasure The book covers the entire 138 year history of the Met focusing on the museum's most colorful characters Opening with the lame duck director Philippe de Montebello the museum's longest serving leader who finally stepped down in 2008 Rogues Gallery then goes back to the very beginning highlighting among many others the first director Luigi Palma di Cesnola an Italian born epic phony whose legacy is a trove of plundered ancient relics some of which remain on display today John Pierpont Morgan the greatest capitalist and art collector of his day who turned the museum from the plaything of a handful of rich amateurs into a professional operation dedicated sort of to the public good John D Rockefeller Jr who never served the Met in any official capacity but who during

the Great Depression proved the only man willing and rich enough to be its benefactor which made him its behind the scenes puppeteer the controversial Thomas Hoving whose tenure as director during the sixties and seventies revolutionized museums around the world but left the Met in chaos and Jane Engelhard and Annette de la Renta a mother daughter trustee tag team whose stories will astonish you think Casablanca rewritten by Edith Wharton With a supporting cast that includes artists forgers and looters financial geniuses and scoundrels museum officers like its chairman Arthur Amory Houghton head of Corning Glass who once ripped apart a priceless and ancient Islamic book in order to sell it off piecemeal trustees like Jayne Wrightsman the Hollywood party girl turned society grand dame curators like the aging Dietrich von Bothmer a refugee from Nazi Germany with a Bronze Star for heroism whose greatest acquisitions turned out to be looted and donors like Irwin Untermyer whose collecting obsession drove his wife and children to suicide and with cameo appearances by everyone from Vogue editors Anna Wintour and Diana Vreeland to Sex Pistols front man Johnny Rotten Rogues Gallery is a rich satisfying alternately hilarious and horrifying look at America's upper class and what is perhaps its greatest creation

Civil Society, Associations and Urban Places Boudien de Vries, 2016-12-05 In recent years the concept of civil society has become central to the historian's understanding of class cultural and political power in the nineteenth century town and city Increasingly clubs and voluntary societies have been regarded as an important step in the formation of formal political parties particularly for the working and middle classes The result of this is the assertion that the more associations existing in a particular society the deeper democracy becomes entrenched In order to test this hypothesis this volume brings together essays by an international group of urban historians who examine the construction of civil society from associational activity in the urban place From their studies it soon becomes clear that such simple propositions do not adequately reflect the dynamics of nineteenth century urban society and politics Urban associations were ideological in purpose and deliberately discriminatory and as such set the boundaries of civil society Thus competing and segmented associations were not only an indication of pluralism and strength but also highlighted a fundamental weakness when faced down by the interests of the state Through a wide array of urban associations in a broad range of settings comprising Austria and Bratislava France and Italy the Netherlands Austro-Hungary England Scotland and the US this volume reflects on the construction of class nation and culture in the associations of the nineteenth century urban place In so doing it shows that a deep and interlocking civil society does not automatically lead to a rise in democratic activity Expansion of the networks of urban association could equally result in greater subdivision and to the fragmentation and isolation of certain groups Partition as much as coherence is our understanding of civil society and associations in the nineteenth century urban place

The Invention of the American Art Museum Kathleen Curran, 2016-07-01 American art museums share a mission and format that differ from those of their European counterparts which often have origins in aristocratic collections This groundbreaking work recounts the fascinating story of the invention of the modern American art museum starting with its roots in the 1870s in the craft

museum type which was based on London's South Kensington now the Victoria and Albert Museum. At the turn of the twentieth century American planners grew enthusiastic about a new type of museum and presentation that was developed in Northern Europe particularly in Germany, Switzerland, and Scandinavia. Called *Kulturgeschichte* cultural history museums, they were evocative displays of regional history. American trustees, museum directors, and curators found that the *Kulturgeschichte* approach offered a variety of transformational options in planning museums, classifying and displaying objects, and broadening collecting categories including American art and the decorative arts. Leading institutions including the Museum of Fine Arts, Boston, and the Metropolitan Museum of Art in New York adopted and developed crucial aspects of the *Kulturgeschichte* model. By the 1930s such museum plans and exhibition techniques had become standard practice at museums across the country.

The New York Market for French Art in the Gilded Age, 1867-1893 Leanne M. Zalewski, 2022-12-15. This transatlantic study analyses a missing chapter in the history of art collecting: the first art market bubble in the United States. In the decades following the Civil War, French art monopolized art collections across the United States. During this Gilded Age, picture rush, the commercial art system, art dealers, galleries, auction houses, exhibitions, museums, art journals, press coverage, art histories, and collection catalogues established a strong foothold it has not relinquished to this day. In addition, a pervasive concern for improving aesthetics and providing the best contemporary art to educate the masses led to the formation not only of private art collections but also of institutions such as the Metropolitan Museum of Art and to the publication of art histories. Richly informed by collectors' and art dealers' diaries, letters, stock books, journals, and hitherto neglected art histories, *The New York Market for French Art in the Gilded Age, 1867-1893* offers a fresh perspective on this trailblazing era.

In Pursuit of Privilege Clifton Hood, 2016-11-08. A history that extends from the 1750s to the present, *In Pursuit of Privilege* recounts upper class New Yorkers' struggle to create a distinct world guarded against outsiders, even as economic growth and democratic opportunity enabled aspirants to gain entrance. Despite their efforts, New York City's upper class has been drawn into the larger story of the city, both through class conflict and through their role in building New York's cultural and economic foundations. *In Pursuit of Privilege* describes the famous and infamous characters and events at the center of this extraordinary history, from the elite families and wealthy tycoons of the eighteenth and nineteenth centuries to the Wall Street executives of today. From the start, upper class New Yorkers have been open and aggressive in their behavior, keen on attaining prestige, power, and wealth. Clifton Hood sharpens this characterization by merging a history of the New York economy in the eighteenth century with the story of Wall Street's emergence as an international financial center in the late nineteenth and early twentieth centuries, as well as the dominance of New York's financial and service sectors in the 1980s. Bringing together several decades of upheaval and change, he shows that New York's upper class did not rise exclusively from the Gilded Age but rather from a relentless pursuit of privilege affecting not just

the urban elite but the city's entire cultural economic and political fabric Classical New York Elizabeth Macaulay-Lewis, Matthew McGowan, 2018-09-04 Essays on the historical Greco Roman influence on the evolving architectural landscape of New York City During its rise from capital of an upstart nation to global metropolis the visual language of Greek and Roman antiquity played a formative role in the development of New York's art and architecture This compilation of essays offers a survey of diverse reinterpretations of classical forms in some of the city's most iconic buildings public monuments and civic spaces Classical New York examines the influence of Greco Roman thought and design from the Greek Revival of the late eighteenth and early nineteenth centuries through the late nineteenth century American Renaissance and Beaux Arts period and into the twentieth century's Art Deco At every juncture New Yorkers looked to the classical past for knowledge and inspiration in seeking out new ways to cultivate a civic identity and to structure their public and private spaces Specialists from a range of disciplines archaeology architectural history art history classics and history focus on how classical art and architecture are repurposed to help shape many of New York City's most evocative buildings and works of art Federal Hall evoked the Parthenon as an architectural and democratic model the Pantheon served as a model for the creation of libraries at New York University and Columbia University Pennsylvania Station derived its form from the Baths of Caracalla and Atlas and Prometheus of Rockefeller Center recast ancient myths in a new light during the Great Depression This examination of post Revolutionary art politics and philosophy enriches the conversation about how we shape space be it civic religious academic theatrical or domestic and how we make use of that space and the objects in it **The Museum Is Open** Andrea Meyer, Benedicte Savoy, 2013-12-12 Museum science museum analysis museum history and museum theory all this expanding terminology underscores the growing scholarly interest in museums A recurring assertion is that as an institution the museum has largely functioned as a venue for the formation of specifically national identities This volume by contrast highlights the museum as a product of transnational processes of exchange focusing on the period from 1750 to 1940 **Asian Art at the Metropolitan Museum The Metropolitan Museum of Art Bulletin, v. 73, no. 1 (Summer, 2015)** Maxwell K. Hearn, 2015-08-13 This Bulletin marks the centennial celebration of the founding of the Department of Asian Art at The Metropolitan Museum of Art Showcasing some of the Met's most beautiful examples of Asian Art along with archival material this Bulletin is a compact but lushly illustrated account of one of the world's most comprehensive collections of the paintings sculptures textiles and decorative arts of Asia **Old Masters, New World** Cynthia Saltzman, 2008-08-14 A spellbinding account of the rapacious pursuit of the most exquisite paintings in the world In the Gilded Age newly wealthy and culturally ambitious Americans began to compete for Europe's extraordinary Old Master pictures causing a major migration of art across the Atlantic Old Masters New World is a backstage look at the cutthroat competition financial maneuvering intrigue and double dealing often involved in these purchases not to mention the seductive power of the ravishing paintings that drove these collectors including financier J Pierpont Morgan sugar king H O
