Merthyr Tydfil Iron Metropolis Life In A Welsh Industrial Town:

Merthyr Tydfil, Iron Metropolis Keith Strange, 2005 This is a comprehensive study of life in the Welsh town of Merthyr Tydfil from 1750 to the middle decades of the 19th century when the iron industry was at its zenith *The Iron Industry* Richard Hayman, 2016-02-25 The iron industry was the catalyst for the Industrial Revolution producing a vital source of iron without which none of the great engineering achievements of the Victorian age would have been possible This book charts the growth of iron making from the Middle Ages covering the importation of blast furnace methods in the fifteenth century the adoption of coke as a fuel in the eighteenth century and the invention of mass produced steel in the nineteenth century The developing techniques of iron making all explained in a non technical style make a story in their own right but combined with the experiences of the masters and workmen who laboured at the furnaces and forges this volume offers a truly comprehensive account of one of the most important industries of recent centuries **The Georgians** Penelope J. Corfield, 2022-02-08 A comprehensive history of the Georgians comparing past views of these exciting turbulent and controversial times with our attitudes today The Georgian era is often seen as a time of innovations It saw the end of monarchical absolutism global exploration and settlements overseas the world's first industrial revolution deep transformations in religious and cultural life and Britain's role in the international trade in enslaved Africans But how were these changes perceived by people at the time And how do their viewpoints compare with attitudes today In this wide ranging history Penelope J Corfield explores every aspect of Georgian life politics and empire culture and society love and violence religion and science industry and towns People's responses at the time were often divided Pessimists saw loss and decline while optimists saw improvements and light Out of such tensions came the Georgian culture of both experiment and resistance Corfield emphasizes those elements of deep continuity that persisted even within major changes and shows how new developments were challenged if their human consequences proved dire **The Ironmasters' Bags** Paul Reynolds, 2010-06-19 During its development and at the time that the south Wales iron industry was at its most successful the only way other than by personal contact in which contact between the different branches of the industry could be maintained was by letter Thus the postal service both the General Post Office and a multiplicity of private posts made a vital contribution to the success of the industry which so far has received little attention This work traces the development of the postal service in the south Wales valleys from its primitive state in the mid 18th century to what had become a recognisably modern postal service a hundred years later It is based on information derived from the archives of the Post Office itself and of the various iron companies from contemporary newspapers and from oral tradition recorded by later historians in the Valleys **The Company Town** John Garner, 1992-10-01 Built by industrialists whose early businesses contributed to the escalation of the Industrial Revolution company towns flourished in countries that embraced capitalism and open market trading In many instances the company town came to symbolize the wrecking of the environment especially in places associated with

extractive industries such as mining and lumber milling Some resident industrialists however took a genuine interest in the welfare of their work forces and in a number of instances hired architects to provide a model environment Overtaken by time these towns were either abandoned or caught up in suburban growth The most thorough going and only international assessment of the company town this collection of essays by specialists and authorities of each region offers a balanced account of architectural and social history and provides a better understanding of the architectural and urban experiences of the early industrial age

Claiming the Streets Paul O'Leary, 2012-10-15 Street processions were a defining feature of life in the Victorian town They were diverse in character and took place regularly throughout the year in all towns They provided opportunities for men and women to display themselves in public carrying banners and flags and accompanied by musical bands Much of the history of nineteenth century Wales has been written around political demonstrations and revolt but this book examines how urban communities in Victorian Wales created inclusive civic identities by using the streets for peaceful processions

Disability in the Industrial Revolution David M. Turner, Daniel Blackie, 2018-04-03 This electronic version has been made available under a Creative Commons BY NC ND open access license An electronic version of this book is also available under a Creative Commons CC BY NC ND license thanks to the support of the Wellcome Trust The Industrial Revolution produced injury illness and disablement on a large scale and nowhere was this more visible than in coalmining Disability in the Industrial Revolution sheds new light on the human cost of industrialisation by examining the lives and experiences of those disabled in an industry that was vital to Britain's economic growth Although it is commonly assumed that industrialisation led to increasing marginalisation of people with impairments from the workforce disabled mineworkers were expected to return to work wherever possible and new medical services developed to assist in this endeavour This book explores the working lives of disabled miners and analyses the medical welfare and community responses to disablement in the coalfields It shows how disability affected industrial relations and shaped the class identity of mineworkers The book will appeal to students and academics interested in disability occupational health and social history

Slave Wales Chris Evans, 2010-09-30 Atlantic slavery does not loom large in the traditional telling of Welsh history Yet Wales like many regions of Europe was deeply affected by the forced migration of captive Africans Welsh commodities like copper and brass made in Swansea were used to purchase slaves on the African coast and some Welsh products such as woollens from Montgomeryshire were an important feature of plantation life in the West Indies In turn the profits of plantation agriculture flowed back into Wales to be invested in new industries or to be lavished on country mansions This book looks at Slave Wales between 1650 and 1850 bringing the most up to date scholarship on Atlantic slavery to bear on the Welsh experience New research by Chris Evans casts light on previously unknown episodes such as Welsh involvement with slave based copper mining in nineteenth century Cuba and illuminates in new and disturbing ways familiar features of Welsh history like the woollen industry that have previously unsuspected slave dimensions Many Welsh people turned against slavery in the late

eighteenth century but Welsh abolitionism was never a particularly powerful force Indeed Chris Evans demonstrates that Welsh participation the slave Atlantic lasted well beyond the abolition of Britain s slave trade in 1807 and the ending of slavery in Britain s Caribbean empire in 1834 Our Mothers' Land Angela V John,2011-02-15 This volume marks the twentieth anniversary of the first publication of this groundbreaking book It reflects the pioneering research of its contributors to the development of modern Welsh women s history The eight chapters range widely across time 1830 1939 and place from exploring working class women s community sanctions and the perils facing collier s wife to the very different lifestyles of ironmasters wives They also tackle the idealised images of respectable Welsh women in periodicals and the tragic reality of those who took their own lives as well as showing us the transgressive actions of suffrage rebels They examine how women carved out space within movements such as temperance and track the fluctuating fortunes of women s employment and domestic life from the Great War to the eve of the Second World War This volume makes available once more a book that has become a classic in its field and a vital part of the historiography of modern Wales This expanded edition also brings us up to date It reveals the research and publications of the last two decades and comments upon the extent to which Wales has moved beyond being the familiar land of our fathers Written in a lively and accessible style it nevertheless draws upon a wealth of research and expertise and should appeal to both the academic community and to a much wider readership

The History of the Iron, Steel, Tinplate and ... Other Trades of Wales Charles Wilkins (of Merthyr-Tydfil.),1903 The South Wales Coal Trade and Its Allied Industries from the Earliest Days to the Present Time Charles Wilkins (of Merthyr-Tydfil.),1888 *Morgannwg* ,2006 **Wales** Prys Morgan,2005 In this book a highly distinguished team of historians tell the story of Wales from the formation of the land to the development of modern Wales as a vibrant 21st century state This richly illustrated history recalls the drama of Roman conquest and settlement the wealth and wars of the Welsh kings and the recurring revolts against English rule romantically embodied by the rebel Owain Glyn Dwr Wales and its people played key roles in the great events of English and European history while the impact of the Reformation printing and wider education ensured the development and growth of a unique culture characterised by Puritanism Romanticism radicalism and revolt This book brings to life the legend and reality of this proud nation

Railways and Industry on the Brecon & Merthyr John Hodge,Ray Caston,2022-07-20 This book as part of the South Wales Valleys series deals with the former Brecon Merthyr Railway line which ran from Bassaleg north of Newport to Brecon and Rhymney B M the latter line being closed north of New Tredegar in 1930 due to a landslide one of several in that area The most important and lucrative traffic was of course coal from the many collieries on the line much bound for Newport Docks though there was a regular passenger service both to Brecon and New Tredegar which ran to Rhymney B M before 1930 At Machen the line diverted to Caerphilly and Pontypridd again with coal and passenger services mostly covered by auto trains Each location along all lines in the area is covered in detail with copious photographs to illustrate and an OS Map

from the start of the 20th C to present a detailed coverage of the area around each location The line is still open from Bassaleg to Machen Quarry for occasional trains of stone traffic using modern traction and wagons

Society and Economy in Modern Britain 1700-1850 Richard Brown, 2002-11-01 For both contemporaries and later historians the Industrial Revolution is viewed as a turning point in modern British history There is no doubt that change occurred but what was the nature of that change and how did it affect rural and urban society Beginning with an examination of the nature of history and Britain in 1700 this volume focuses on the economic and social aspects of the Industrial Revolution Unlike many previous textbooks on the same period it emphasizes British history and deals with developments in Wales Scotland and Ireland in their own right It is the emphasis on the diversity not the uniformity of experience on continuities as well as change in this crucial period of development which makes this volume distinctive In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain's political system and in its religious affiliations

Mastering Iron Anne Kelly Knowles, 2013-01-15 Veins of iron run deep in the history of America Iron making began almost as soon as European settlement with the establishment of the first ironworks in colonial Massachusetts Yet it was Great Britain that became the Atlantic world's dominant low cost high volume producer of iron a position it retained throughout the nineteenth century It was not until after the Civil War that American iron producers began to match the scale and efficiency of the British iron industry In Mastering Iron Anne Kelly Knowles argues that the prolonged development of the US iron industry was largely due to geographical problems the British did not face Pairing exhaustive manuscript research with analysis of a detailed geospatial database that she built of the industry Knowles reconstructs the American iron industry in unprecedented depth from locating hundreds of iron companies in their social and environmental contexts to explaining workplace culture and social relations between workers and managers She demonstrates how ironworks in Alabama Maryland Pennsylvania and Virginia struggled to replicate British technologies but in the attempt brought about changes in the American industry that set the stage for the subsequent age of steel Richly illustrated with dozens of original maps and period art work all in full color Mastering Iron sheds new light on American ambitions and highlights the challenges a young nation faced as it grappled with its geographic conditions
