Metadesigning Designing in the Anthropocene John Wood,2022-06-08 Long sighted radical and provocative this book offers a foundational framework of concepts principles and methods exemplified with selected tools to enable metadesigners to manage and reinvent their practices The book reminds readers that designers are albeit unwittingly helping to shape the Anthropocene Despite their willingness to deliver greener products and services designers find themselves part of an industry that has become the go to catalyst for dividends and profit If our species is to achieve the rehabilitation and metamorphosis we may need to design at the level of paradigms genres lifestyles and currencies This would mean making design more integrated comprehensive adaptive transdisciplinary self reflexive and relational The book therefore advocates a

Metro Letters University of Minnesota. Design Institute,2003 The development of the first city specific typeface Can a typeface communicate the unique character of a city This is the question the University of Minnesota Design Institute proposed when it began the project Typeface Twin Cities and commissioned six teams of talented typographers to create a custom font for Minneapolis and St Paul Typeface Twin Cities was an experiment to further understand the relationship between typography and urban identity that sought not to brand the cities themselves but to engage the public s awareness and appreciation of design and typography throughout the metro area What began as an attempt to discover a subtle form of civic identity evolved into the invention of a truly unique concept The Twin font is accompanied by a software program that can link the typeface via the Internet with live databases detailing the Twin Cities s urban conditions wind temperature traffic congestion and these variations visibly affect the type s appearance *Metro Letters* recounts the complete process behind the development of a font that aims to visually represent the diversity of the Twin Cities and inspires other designers to devise their own new ideas innovative prototypes and creative experiments Distributed for the University of Minnesota

and people in knowledge intensive activities and processes Provided by publisher An A-Z of Type Designers Neil Macmillan,2006 This illustrated A Z features outstanding type designers from around the world from Gutenberg to the present day Arranged alphabetically by designer s name the book contains over 260 biographical profiles Entries are illustrated by key typefaces taken from a wide range of sources including type specimens original posters private press editions and magazine covers and also give a list of work and where applicable further reading references and a website address An essential reference for typographers graphic designers and students the book also features a full index and eight short texts by leading typographers Jonathan Barnbrook Erik van Blokland Clive Bruton John Downer John Hudson Jean Francois Porchez Erik Spiekermann and Jeremy Tankard that cover a variety of different aspects of type design including typeface revivals font piracy designing fonts for corporate identities and the role of nationality in type design **Design for Micro-Utopias** John Wood,2017-03-02 Everyone is already painfully aware of our predicament ecological extinctions dwindling fossil fuel reserves and economic chaos The solutions are less obvious despite the many opportunities that surround us We have never had more access to resources knowledge and technology but this is not the problem What we lack most is creative thinking fuelled by collective optimism In a pragmatic world run by careerist experts this is hardly surprising As voters and consumers we are trained to choose and complain but not how to envisage what we really really want How can we design a better world unless we revive the art of dreaming For without dreams we are lost Perhaps it should be the duty of all citizens to imagine alternative futures in effect to think more like designers After all designers have always been dreamers and have often found ways to realize their dreams Design for Micro Utopias does not advocate a single monolithic Utopia Rather it invites readers to embrace a more pluralized and mercurial version of Thomas More s famous 1516 novel of the same name It therefore encourages the proliferation of many micro utopias rather than one Utopia This requires a less negative critical and rational approach Referencing a wide range of philosophical thinking from Aristotle to the present day western and eastern spiritual ideals and scientific biological and systems theory John Wood offers remedies for our excessively individualistic mechanistic and disconnected thinking and asks whether a metadesign approach might bring about a new mode of governance This is a daring idea Ultimately he reminds us that if we believe that we will never be able to design miracles we make it more likely that this is so The first step is to turn the impossible into the thinkable

End-User Development Volkmar Pipek,Mary-Beth Rosson,Volker Wulf,2009-02-24 Work practices and organizational processes vary widely and evolve constantly The technological infrastructure has to follow allowing or even supporting these changes Traditional approaches to software engineering reach their limits whenever the full spectrum of user requirements cannot be anticipated or the frequency of changes makes software reengineering cycles too clumsy to address all the needs of a specific field of application Moreover the increasing importance of infrastructural aspects particularly the mutual dependencies between technologies usages and domain competencies calls for a differentiation of roles beyond the classical

user designer dichotomy End user development EUD addresses these issues by offering lightweight use time support which allows users to configure adapt and evolve their software by themselves EUD is understood as a set of methods techniques and tools that allow users of software systems who are acting as non professional software developers to 1 create modify or extend a software artifact While programming activities by non professional actors are an essential focus EUD also investigates related activities such as collective understanding and sense making of use problems and solutions the interaction among end users with regard to the introduction and diffusion of new configurations or delegation patterns that may also partly involve professional designers
