range of social settings and the moral issues raised in qualitative research. These themes are related to practical issues which are illustrated by a breadth of examples and in depth case studies. The contributors look at the methods and strategies that they have used to study everyday life and make suggestions to readers on why and how they might conduct their own studies. They raise issues that go beyond cookbook discussions of issues such as how to enter social settings, manage the subjects of one's research and ask good questions in the process of formulating research strategies. These issues are addressed within the framework of the larger purposes and uses of qualitative research where specific methodological problems are not used as ends in themselves.

**Historical Perspectives on Erklären and Verstehen** Uljana Feest, 2009-12-15 twentieth century literature about the distinction between explanation and understanding. Second, can we do justice to a particular writer's notion of that category by taking at face value what he writes about his own motivation for adopting it? In response to both types of questions, there is by now a consensus amongst many historians of science and of philosophy that an intellectual history like other kinds of history has to be careful not to uncritically adopt actors' categories and, more generally, even the actors' own thinking about a particular issue has to be contextualized vis-à-vis their other intellectual commitments and interests as well as the complex conditions that make the totality of their commitments possible. Such conditions include cognitive as well as practical, institutional and cultural factors. The articles in this volume respond to these challenges in several ways. For example, one author, Christopher Pincock, seeks to read some of the nineteenth century philosophical writings about *Erklären* and *Verstehen* as standing for a more fundamental problem which he terms the problem of the unity of experience.
