Politically Speaking John Wilson, 1990-01-01 **Political Vocabularies** Conal Condren, 2017 Considers how political language has changed through time looking at concrete examples from English and other languages **The Cumulative Book Index**, 1991 A world list of books in the English language **Discourse Markers in Doctoral Supervision Sessions** Samira Bakeer, 2023-09-29 Language is a complex system that transfers ideas feelings experiences beliefs and cultures to others One of the interactional resources that are utilised to make this transmission more coherent and effective is Discourse Markers DMs This monograph analyses these markers in doctoral supervisions but uses a multimodal approach to provide a deeper understanding of these DMs and uncovers potential hidden meanings that would escape a purely verbal analysis Using a dataset consisting of a corpus of video recorded doctoral supervision meetings this book provides an innovative and cutting edge approach to the analysis of DMs and sheds new light on the complexity and dynamicity of naturally occurring discourse where meaning making rests on a close coordination of both verbal and embodied conducts The book makes very useful reading for scholars in the fields of discourse markers conversation analysis corpus linguistics and multimodality It could collaterally be appealing to anyone simply interested in the study of human communication

their language there is one opinion that always comes first All politicians are liars They are smooth talkers who promise things they cannot fulfil only to get more votes in the coming up election and they use beautiful words to paraphrase and disguise social injustices And in some points this opinion is right There really is a specific political language used by the politicians to follow certain aims but this has not always to be disguise or circumscription What many of the citizens simply ignore is the fact that politicians are dependent from the mass Without the public there would be no need for politicians And the same goes for political discussions Politicians don't argue with each other because they like it It is always the fact that a political actor starts political relations with another actor and at the same time with the public If two politicians talk to each other on the television this is always orchestrated for the people who watch the show see Dieckmann 1981 265 The main reason for every politician to lie or to use special vocabulary is for the purpose of being convincing This paper analyses the language used by politicians in certain situations to convince people of the correctness of their point of view in its roots mainly based on the book Politically Speaking The Pragmatic analysis of Political Language by John Wilson The main focus of this paper is put to the question of the use of the pronominal forms I and we in political talk under which conditions the one is used and when the other and what for It is not arguable that politicians always have a reason for using I or we in different contexts especially in written speeches that are planned and very well prepared Also the difference between scripted and unscripted speeches will be touched in this paper To employ the theoretical basis that is provided here in the last section the famous Sportpalast speech of Joseph Goebbels from 1943 will be analysed with regard to the use of different pronominal forms The final summary shall bundle the gained information to a logical minimum and draw some conclusions from it It will show if political use of speech is intentionally manipulating and disguising facts especially in the example of Goebbels or if the use of language in politics does not differ in great parts from the day to day use at home

at the same time with the public If two politicians talk to each other on the television this is always orchestrated for the people who watch the show see Dieckmann 1981 265 The main reason for every politician to lie or to use special vocabulary is for the purpose of being convincing This paper analyses the language used by politicians in certain situations to convince people of the correctness of their point of view in its roots mainly based on the book Politically Speaking The Pragmatic analysis of Political Language by John Wilson The main focus of this paper is put to the question of the use of the pronominal forms I and we in political talk under which conditions the one is used and when the other and what for It is not arguable that politicians always have a reason for using I or we in different contexts especially in written speeches tha **The Pragmatics of Political Discourse** Anita Fetzer, 2013-01-29 The volume promotes a pragmatic perspective to the analysis of political discourse as multilayered mediated discourse The chapters cross the disciplinary and methodological boundaries of speech act theory social positioning theory and argumentation theory and rhetorics They address the strategic use of address terms and irony the form and function of questions and the expression of certainty in the contexts of parliamentary discourse interview talkshow phone in programme and motion of support across different discourse domains Different cultural contexts are represented including Africa the Middle East different parts of Europe and the United States
