Politics And Ecology:

Political Ecology Across Spaces, Scales, and Social Groups Susan Paulson, Lisa L. Gezon, 2005 Environmental issues have become increasingly prominent in local struggles national debates and international policies In response scholars are paying more attention to conventional politics and to more broadly defined relations of power and difference in the interactions between human groups and their biophysical environments Such issues are at the heart of the relatively new interdisciplinary field of political ecology forged at the intersection of political economy and cultural ecology This volume provides a toolkit of vital concepts and a set of research models and analytic frameworks for researchers at all levels The two opening chapters trace rich traditions of thought and practice that inform current approaches to political ecology They point to the entangled relationship between humans politics economies and environments at the dawn of the twenty first century and address challenges that scholars face in navigating the blurring boundaries among relevant fields of enquiry The twelve case studies that follow demonstrate ways that culture and politics serve to mediate human environmental relationships in specific ecological and geographical contexts Taken together they describe uses of and conflicts over resources including land water soil trees biodiversity money knowledge and information they exemplify wide ranging ecological settings including deserts coasts rainforests high mountains and modern cities and they explore sites located around the world from Canada to Tonga and cyberspace

Taylor,Patrick T. Hurley,2016-05-26 This book is about politics and planning outside of cities where urban political economy and planning theories do not account for the resilience of places that are no longer rural and where local communities work hard to keep from ever becoming urban By examining exurbia as a type of place that is no longer simply rural or only tied to the economies of global resources e g mining forestry and agriculture we explore how changing landscapes are planned and designed not to be urban that is to look function and feel different from cities and suburbs in spite of new home development and real estate speculation The book s authors contend that exurbia is defined by the persistence of rural economies the conservation of rural character and protection of natural ecological systems all of which are critical components of the contentious local politics that seek to limit growth Comparative political ecology is used as an organizing concept throughout the book to describe the nature of exurban areas in the U S and Australia although exurbs are common to many countries The essays each describe distinctive case studies with each chapter using the key concepts of competing rural capitalisms and uneven environmental management to describe the politics of exurban change This systematic analysis makes the processes of exurban change easier to see and understand Based on these case studies seven characteristics of exurban places are identified rural character access local economic change ideologies of nature changes in land management coalition building and land use planning This book will be of interest to those who study planning conservation and land development issues especially in areas of high natural amenity or environmental value There is no political ecology book quite like this neither one solely focused on cases from the developed world in this case the United States and Australia nor one that specifically harnesses different case studies from multiple areas to develop a central organizing perspective of landscape change The Political Ecology of the State Antonio Augusto Rosotto Ioris,2014-03-26 The contemporary state is not only the main force behind environmental change but the reactions to environmental problems have played a crucial role in the modernisation of the state apparatus especially because of its mediatory role The Political Ecology of the State is the first book to critically assess the philosophical basis of environmental statehood and regulation addressing the emergence and evolution of environmental regulation from the early twentieth century to the more recent phase of ecological modernisation and the neoliberalisation of nature The state is understood as the result of permanent socionatural

interactions and multiple forms of contestation from a critical politico ecological approach This book examines the tension between pro and anti commons tendencies that have permeated the organisation and failures of the environmental responses put forward by the state It provides a reinterpretation of the achievements and failures of mainstream environmental policies and regulation and offers a review of the main philosophical influences behind different periods of environmental statehood and regulation It sets out an agenda for going beyond conventional state regulation and grassroots dealings with the state and as such redefines the environmental apparatus of the state

Political Ecology and Environmentalism in Britain Brendan Prendiville, David Haigron, 2020-02-24 This collection of essays highlights the different dimensions of the contemporary British environmentalist movement from a multidisciplinary viewpoint Beginning with an historical overview of the movement the reader is then presented with an analysis of the politics of climate change from a political science perspective This is followed by a sociological examination of climate change protesters and environmental activism among young people The volume also includes an analysis of the ideological relationship between

political ecology and the British Left as well as a case study of environmentalism in Wales against the backdrop of devolution. The book is based on two distinct yet complementary perspectives: environmentalism and political ecology. What is this distinction and what is its significance? Answers to these questions and others can be found in these essays, which are a must read for both students and researchers interested in environmental politics in Britain and British area studies.

Third World Political Ecology Raymond L. Bryant, Sinéad Bailey, 1997. By drawing on examples from throughout the Third World, Bryant and Bailey explain the development and characteristics of environmental problems that plague parts of Asia, Africa, and Latin America and their political and economic bases.

Principles of Political Ecology Adrian Atkinson, 1991. Political ecologists, the theorists of the Green movement, assert that if we do not fundamentally change the way in which our society makes use of nature, then we will destroy the physical basis of our social existence within the foreseeable future. In the light of this insight, this book is concerned to unearth the foundations of our cultural attitudes towards nature and to start the process of building philosophical foundations that could provide the basis of a sustainable relationship between society and the environment. The objective is to provide a critique and reorientation of social theory at the level of epistemology and to question the nature of rationality, the role of ideology, and assumptions about human nature which underpin conventional academic social theory. The heart of the analysis comprises a critique of the core values of the Enlightenment that have shaped modern Western thought: Science, Progress, and Individualism. To political ecology, these represent fundamental problem concepts, and the intention of this book is to broaden and deepen our understanding of existing social processes, particularly those identified as the post-modern condition of aimless consumerism in relation to environmental issues. The analysis includes sketches of concepts and practices with which political ecology might transcend these values and shows how transformed attitudes can contribute towards solving environmental problems. This is a challenging and original synthesis of philosophy and theory directed towards the greatest issue of our time. It will be essential reading for everyone concerned with the future of the planet.
